**VETERINARY HEALTH CERTIFICATE FOR EXPORT OF CATTLE  
FROM THE UNITED STATES OF AMERICA TO THE REPUBLIC OF ZIMBABWE**

<b>Veterinary Authority</b> UNITED STATES DEPARTMENT OF AGRICULTURE	<b>Date Of Issue</b>	<b>Certificate Number</b>
--	----------------------	---------------------------

**II. CERTIFICATION STATEMENTS:**

I, the undersigned USDA accredited veterinarian, certify to the following statements.

- All cattle for export were born and reared in the United States.
- The United States is free of contagious bovine pleuropneumonia and foot and mouth disease.
- The United States is recognized by the World Organization for Animal Health (OIE) as a country having a negligible risk status for bovine spongiform encephalopathy (BSE).
- The state(s) of origin is officially free of brucellosis and tuberculosis.
- The herd of origin has been free of clinical cases of bovine leukosis, infectious bovine rhinotracheitis, campylobacteriosis and trichomoniasis for the last 12 months prior to export.
- The animals were isolated for at least 21 days immediately prior to export, in a facility approved by a USDA accredited veterinarian.
- The animals were inspected within 21 days prior to export and found to be free from clinical evidence of communicable diseases.

**III. TEST REQUIREMENTS:**

The cattle must be tested within 60 days of export with negative results for the diseases listed below.

- Tuberculosis:** Intradermal test using bovine PPD tuberculin **OR** other test accepted by USDA.  
Test date(s) \_\_\_\_\_
- Brucellosis:** Complement fixation test at a 1:10 dilution **OR** buffered *Brucella* antigen test (i.e., card test) **OR** Enzyme- linked immunosorbent assay (ELISA) or standard tube test **OR** fluorescent Polarization Assay (FPA) **OR** plate agglutination test at a 1:50 dilution **OR** other test accepted by USDA. Test date(s) \_\_\_\_\_
- Enzootic Bovine Leukosis:** Enzyme- linked immunosorbent assay (ELISA) **OR** agar gel immunodiffusion (AGID) test **OR** other test accepted by APHIS.  
Test date(s) \_\_\_\_\_
- Johne's Disease (paratuberculosis):** Enzyme- linked immunosorbent assay (ELISA) **OR** complement fixation (CF) test **OR** other test accepted by APHIS.  
Test date(s) \_\_\_\_\_
- Leptospirosis:** Either tested negative within 60 days of export, **OR** vaccinated against leptospirosis within 60 days of export, **OR** treated once against leptospirosis with 20 mg/kg of long acting oxytetracycline within 14 days of export.  
Test or Vaccination date(s) \_\_\_\_\_
- Campylobacteriosis (vibriosis) and Trichimoniasis:** Either tested negative within 60 days of export, **OR** animals for export have never been naturally mated.  
Test date(s), if applicable: \_\_\_\_\_

**IV. OTHER VETERINARY TREATMENTS AND INSPECTIONS**

- Within 21 days prior to the export, the animals were inspected and treated for internal and external parasites.  
Date(s) of treatment: \_\_\_\_\_ Name(s) of product: \_\_\_\_\_
- Within 60 days prior to export, the animals were vaccinated against infectious bovine rhinotracheitis (IBR), bovine viral diarrhea (BVD), parainfluenza and Leptospirosis.
- The animals will receive a USDA veterinary inspection at the port of embarkation, within 48 hours of export, and only those found free of evidence of communicable disease and fit for travel will be permitted for export.
