

Certification for thermally processed poultry products and by-products exported from the United States to Argentina

The certificate below is for the export of thermally processed poultry products and by-products to Argentina for animal consumption. This includes poultry meals.

Production facilities must be inspected and approved by USDA APHIS Veterinary Services at least annually. If the facility has been assigned an APHIS approval number for export to another country, this number should be cited in the certificate below. If the facility has had an approval number in the past that is no longer active, the Service Center must be made aware of this by the exporter and the inclusion of this number on the certificate will be determined on a case-by-case basis. For facilities which do not have a current APHIS number and have not had one in the past, no number should be included in the certificate at this time.

The exporting facility must be registered with Argentina's Competent Authority (SENASA) and must have an import permit issued by Argentina prior to export. This can be accomplished through the importer in Argentina. The facility must be able to ensure that the material to be exported is not cross contaminated with mammalian material.

Facility registration may require that APHIS countersign a process document (monograph) to facilitate this process. Follow the instructions described at this link: [Facility Registration Requirement for Argentina for Certain Animal Products](#)

SENASA has agreed that the slaughter plant information does not need to be listed on this certificate if the rendering facility is not part of the slaughter plant in section II.1 below.
