Important Information Regarding Known Trade Bans on Various Products

I. Avian Influenza Bans

No known avian influenza related bans at this time.

II. New Castle Disease Bans

On January 17, 2019, Belarus published a decree announcing a prohibition on the import various poultry products from California. On March 31, 2020, Belarus decreased the banned products from California to:

- Edible (in shell) eggs; and
- Feed and feed additives of animal origin (with the exception of feed additives for cats and dogs, as well as prepared feeds for cats and dogs, that were heat-treated), derived from poultry.
