Quantity of product (e.g., net weight/#of packages): \_\_\_\_\_

Port of export: \_\_\_\_\_

**II. VETERINARY ATTESTATIONS**

I, the undersigned, full time, salaried veterinarian of the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) after due inquiry and to the best of my knowledge, do hereby certify that the product covered by this export certificate and Import Permit #A (indicate Import Permit number): \_\_\_\_\_

- 1) Was produced only from bovine livers originating from slaughterhouses supervised by USDA-FSIS.
- 2) Was produced at an establishment that does not receive, handle, or store any ruminant origin materials other than:
  - a) The following bovine materials – milk and milk products, gelatin or collagen (bone or hide-derived), rawhide, or tallow containing a maximum level of 0.15% insoluble impurities.
  - b) Bovine origin materials originating from a slaughterhouse under the supervision of USDA-FSIS that can be verified free of Specified Risk Material
  - c) Ovine or caprine origin materials originating from a slaughterhouse under the supervision of USDA-FSIS that can be verified to be derived from animals less than 12 months of age
  - d) Ruminant origin materials legally imported from Australia or New Zealand

(Valid Only if the USDA Veterinary Seal Appears Over the Certificate #)

3) Does not contain and has not been cross-contaminated with any Specified Risk Material as defined by Canada:

(i) the distal ileum of all ages of cattle, and (ii) the palatine tonsils, the skull including the brain, trigeminal ganglia and eyes, the spinal cord and the vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), from cattle aged 30 months or older

4) The product label bears the following statements “The product contains prohibited material, as defined by section 162 of the Health of Animals Regulations. DO NOT FEED TO CATTLE, SHEEP, DEER, OR OTHER RUMINANTS”
