

EXPORT OF INSECT MEAL FOR PET AND ORNAMENTAL FISH FOOD OR LIVESTOCK FEED TO CANADA

- This certificate should be used only for the export of insect meal for pet and ornamental fish food or for livestock feed.
- Insect meal for inclusion in livestock feeds must be derived from Black Soldier Fly (*Hermetia illucens*), and may only be incorporated into feeds for poultry or salmonid fish. The product must be registered with the Animals Feed Division of the CFIA prior to entering Canada.
- The product may not contain any ingredients of animal origin, may not be cross contaminated with any other ingredients and must be manufactured in the U.S.
