

Export of Dairy Products for Human Consumption to Cuba

Cuba's IMV has confirmed that dairy products for human consumption produced in the United States should be certified by the USDA Agricultural Marketing Service, Dairy Programs. Cuba has negotiated an AMS certificate as the appropriate document for these products. Please see <http://www.ams.usda.gov/services/imports-exports/dairy-exports> and <http://www.ams.usda.gov/services/imports-exports/dairy-sanitary-certificates>, or email Carrie.Sayasithsena@ams.usda.gov.

Imported products for reexport to Cuba:

It may be possible to export dairy products such as milk, yogurt, cheese, and milk powder that have been imported from another country and have not been processed in the United States. The exporter must provide a government-issued veterinary certificate from the originating country that gives appropriate statements about the origin of imported materials or how materials were processed in the originating country. The Veterinary Services export certificate that accompanies the shipment shall indicate that the product was legally imported and was not processed in the U.S. and shall appropriately reference the export certificate of the country of origin (e.g., certificate number).
