

Milk and Milk-Products Intended for Human Consumption

The Agricultural Marketing Service (AMS) endorses the certificates required by the EU for dairy for human consumption imported into or transiting the EU. APHIS does not endorse or countersign these certificates.

Even though they are not members of the EU, Iceland, Norway, Liechtenstein, and Switzerland require the same certification for dairy products for human consumption as the EU. AMS endorses the certificates for shipment to these countries.

AMS can be contacted at:
