Materials Not of Animal-Origin

APHIS-Veterinary Services does not endorse certificates for consignments to the EU of pet foods and feeds that do not contain animal-origin materials. The EU does not require APHIS-Veterinary Services certificates for these commodities. If a border inspection post in the EU asks for certification that products do not contain animal-origin ingredients, it is likely that the importer is using the wrong H.S. (tariff) code to declare the import or that the product is improperly labeled.
