

Yellow Grease/Used Vegetable Oil for Biodiesel

The European Union does not currently have harmonized requirements for the import of yellow grease (used cooking oil) for the production of biodiesel. The individual importing country decides whether or not to allow the import, and if so establishes requirements. These imports are not under Regulation (EU) 142/2011.

For information APHIS has confirmed regarding individual EU country requirements (including if the country allows the import), please go back and select the page on the specific importing country.
