

**Dairy Products Intended for Animal Consumption**  
**(Not including retort processed or extruded pet foods/treats)**  
**Containing Animal-Origin Ingredients other than those Derived from**  
**Dairy**

Effective November 1, 2017, Japan requires the **“Veterinary Certificate for raw milk and milk products from cloven-hoofed animals to be exported to Japan from the United States for animal consumption (not including extruded or retort processed pet foods) also containing animal-origin materials other than those derived from milk/milk products”** for consignments of dairy products (other than extruded or retort processed pet foods/chews) intended for animal consumption and containing other animal origin ingredients.

The **“Veterinary Certificate for raw milk and milk products from cloven-hoofed animals to be exported to Japan from the United States for animal consumption (not including extruded or retort processed pet foods) also containing animal-origin materials other than those derived from milk/milk products”** is used as **continuation pages with the VS Form 16-4 required for the other animal origin ingredients** (in this case the VS Form 16-4 required for “poultry meat powder.” For example if the VS Form 16-4 (and VS Form 16-4A) are pages 1-2 of the certificate, the VS Form 16-4 should be numbered as “Page 1 of 4”; the VS Form 16-4A should be numbered as “Page 2 of 4”; and the first page of the **“Veterinary Certificate for raw milk and milk products from cloven-hoofed animals to be exported to Japan from the United States for animal consumption (not including extruded or retort processed pet foods) also containing animal-origin materials other than those derived from milk/milk products”** would be numbered as “Page 3 of 4”.

If the dairy origin ingredient is derived from bovine milk, **“BOVINE (DAIRY)”** should be listed in the **PRODUCT** section of page 1 of the VS Form 16-4 along with the species of origin for the chicken component.

For additional information on the **““Veterinary Certificate for raw milk and milk products from cloven-hoofed animals to be exported to Japan from the United States for animal consumption (not including extruded or retort processed pet foods) also containing animal-origin materials other than those derived from milk/milk products”**, please go back to the previous page and see the information under **“Dairy products for animal consumption (not including retort processed or extruded pet food/treats) containing dairy plus other animal origin ingredients.”**
