

Egg Powder Intended for Animal Consumption (Includes Spray-Dried Egg)

Japan requires all imported egg powder to be certified as fit for human consumption. Therefore, only egg powder bearing the FSIS Legend of Inspection and certified by FSIS may be imported into Japan. Exporters of egg powder that bears the FSIS Legend of Inspection should contact FSIS for certification for export to Japan.

Currently, inedible egg powder not bearing the FSIS Legend of Inspection is not eligible for import into Japan.
