

Poultry Digest for Pet Food Production

Poultry digest may be imported into Korea under the following circumstances:

- Korean importers should confirm with Korean animal health authorities prior to export that the specific shipment will be allowed entry.
- No plant inspection is believed to be required.
- No BSE certifications/certificates are required.
- One of the following heat treatments is required (product would require certification of this treatment): 70 degrees Celsius for at least 30 minutes; or 75 degrees Celsius for at least 5 minutes; or 80 degrees Celsius for at least 1 minute.
- Product is subject to AI test which takes up to 30 days.
- Product must not be rendered.
- Other certification requirements have not been determined.
