

Dairy Products Imported to Russia

Russia has announced new requirements for the import of dairy products. These requirements include extensive public health attestations that cannot be made under the U.S. Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS) authority. Currently, the USDA cannot issue certificates meeting these requirements. APHIS is seeking a solution with the Agricultural Marketing Service and the Food and Drug Administration, the competent authority for issuing public health certificates.

As of February 2009, APHIS believes that Russia may be accepting shipments of dairy products accompanied by the following certificate (which pre-dates the new requirements).

Because this certificate does not technically meet the Russian import requirements, exporters are shipping at their own risk. APHIS recommends that exporters have their importers confirm with Russian authorities prior to shipping that the certificate is acceptable for their shipment. APHIS cannot issue any other certificates or documents for dairy products exported to Russia.

Prior to endorsement of the below certificate:

- The certificate must be prepared and verified consistent with APHIS policies; and
- The signatory must cross out and initial the statement about the BSE status of the U.S.

Health Certificate No. _____
(Valid Only if the USDA Veterinary
Seal Appears Over the Certification #)

VETERINARY CERTIFICATE
FOR NON-FAT DRY MILK, DERIVED FROM THE
CATTLE, EXPORTED INTO THE RUSSIAN FEDERATION

Exporting country: The United States (USA)

Competent authority: Ministry of Agriculture

Establishment issuing this certificate: _____

Administrative-territorial unit: _____

1. Identification of products:

Name of products _____

Number of packages _____

Net weight _____

Name (No.) And address of the establishment, approved by the Government Veterinary Service:

2. Kind of package _____

3. Identification marks _____

4. Conditions of storing and transportation (temperature, etc.) _____

Health Certificate No. _____
(Valid Only if the USDA Veterinary
Seal Appears Over the Certification #)

5. Information about destination:

Countries of transit _____

Point into Russia _____

Name and address of consignee _____

Means of transport _____

(Specify the flight number, name of the ship)

6. Certificate on the fitness of the goods for the consumption:

Herewith it is certified that:

Milk was received from the clinical healthy cattle. Milk products were received at the dairy plants, which fulfill the necessary veterinary sanitary requirements and are under permanent control of the Government Veterinary Service of the USA.
