

## **Pet Food (Canned)**

Serbia requires the bilingual “HEALTH CERTIFICATE For canned petfood intended for dispatch to or for transit through the Republic of Serbia (RS)” for the import (or transit) of canned (hermetically sealed through retort processing) pet food.

This certificate mimics the requirements of the Regulation (EC) 142/2011 (as amended) “CHAPTER 3(A) Health certificate For canned petfood intended for dispatch to or for transit through the European Union”. Prior to endorsement of the “HEALTH CERTIFICATE For canned petfood intended for dispatch to or for transit through the Republic of Serbia (RS)” the pertinent exporting/processing facilities must be approved by APHIS Veterinary Services for endorsement of the Regulation (EC) 142/2011 (as amended) “CHAPTER 3(A) Health certificate For canned petfood intended for dispatch to or for transit through the European Union”. For information on how to receive this required approval, a facility should contact the [Veterinary Services service center](#) covering the area where the facility is located.
