

## Treated Blood Products for Technical Purposes

Serbia requires the bilingual “HEALTH CERTIFICATE for treated blood products, excluding of equidae, for the manufacture of derived products for purpose outside the feed chain for farmed animals, intended for dispatch to or for transit through the Republic of Serbia (RS)” for the import (or transit) of treated blood products intended for technical purposes.

This certificate mimics the requirements of the Regulation (EC) 142/2011 (as amended) “CHAPTER 4(D) Health certificate For treated blood products, excluding of equidae, for the manufacture of derived products for purposes outside the feed chain for farmed animals, intended for dispatch to or for transit through the European Union”. Prior to endorsement of the “HEALTH CERTIFICATE for treated blood products, excluding of equidae, for the manufacture of derived products for purpose outside the feed chain for farmed animals, intended for dispatch to or for transit through the Republic of Serbia (RS)” the pertinent exporting/processing facilities must be approved by APHIS Veterinary Services for endorsement of the Regulation (EC) 142/2011 (as amended) “CHAPTER 4(D) Health certificate For treated blood products, excluding of equidae, for the manufacture of derived products for purposes outside the feed chain for farmed animals, intended for dispatch to or for transit through the European Union”. For information on how to receive this required approval, a facility should contact the [Veterinary Services service center](#) covering the area where the facility is located.

**Advisory regarding commercial documents e.g. company certificates of origin or analysis: Consignments of blood products could be rejected if accompanied by commercial documents containing more specific information than the “HEALTH CERTIFICATE for treated blood products, excluding of equidae, for the manufacture of derived products for purpose outside the feed chain for farmed animals, intended for dispatch to or for transit through the Republic of Serbia (RS)” lined out as indicated on the versions posted on the previous page. APHIS strongly recommends that exporters not include commercial documents (or other paper work) with the consignments that make any claims regarding the origin of the blood products or about other information addressed in these certificates. The pre-lined out versions on the previous page contain the most specific assurances APHIS can provide for these consignments.**

This certificate is only available from APHIS for blood products from Artiodactyla, Perrissodactyla, Proboscidea, Suidae, Tayassuidae, and avian animals.
