

## NON-ANIMAL ORIGIN ANIMAL FEED PRODUCTS EXPORTED TO TURKEY

The “NON-ANIMAL ORIGIN ANIMAL FEED PRODUCTS EXPORTED TO TURKEY” certificate should accompany shipments of non-animal origin feed to Turkey. To access this certificate, please go back to the previous page and select the appropriate link. The certificate may only be endorsed for non-animal origin products intended for feeding to animals. No additional certificate or certifications may be endorsed by Veterinary Services for these materials exported to Turkey.

The government of Turkey has not confirmed the acceptability of this certificate for all products. As always, the exporter should have their importer confirm with the appropriate officials within the Turkish government prior to shipment that the certificate meets all necessary requirements. If the exporter requires additional certifications, we recommend that they contact FDA for assistance.

Prior to the endorsement of this certificate, Turkey requires the pertinent manufacturing facility to be assigned an APHIS-VS reference number. The address for this manufacturing facility must be noted on the export certificate. For more information, including how to obtain an APHIS reference number, please contact your local [Veterinary Services service center](#) and request the “Registration Package for Non-Animal Origin Feed Products Exported to Turkey”

After completing the process to obtain an APHIS-VS reference number, the exporter must also submit to the [Veterinary Services service center](#) the affidavit referenced with the prepared certificate. The referenced affidavit must be provided by the **manufacturer** of the exported product, and signed by an official working for the manufacturer that has firsthand knowledge of the accuracy of the statement. The affidavit must be presented to the endorsing Veterinary Services office with the certificate, but does not become part of the certificate nor need to be provided to Turkish officials.
