

Bacterial Products (Not of Animal Origin)

Ukraine requires the “NON-ANIMAL ORIGIN BACTERIAL PRODUCTS EXPORTED TO UKRAINE” certificate for the import of some bacterial products that are not derived from animal-origin sources (and that do not include media derived from animal-origin sources). Ukraine has other requirements the importer must meet prior to obtaining import permission for these products. APHIS is not involved in that process, and does not endorse any documentation for these products other than the “NON-ANIMAL ORIGIN BACTERIAL PRODUCTS EXPORTED TO UKRAINE” certificate. For more information on the other requirements, exporters should have their importers contact the following Ukrainian authorities: State Service of Ukraine for Food Safety and Consumer Protection (SSUFSCP).
