

## **\*Bovine Blood/Blood Products (Live Collection): Export to Vietnam**

These requirements are for certifying bovine blood and blood products derived from live donor cattle intended for technical use (e.g., in-vitro laboratory/diagnostics) for export to Vietnam. The specific blood products must be identified, and the intended end-use must be declared on the export certificate.

\*Blood products for the purposes of this certificate include whole blood, serum, plasma, and other components of blood such as albumin (including bovine serum albumin), globulin, and their derivatives.

The VS National Center for Import and Export (NCIE) Animal Products Exports Staff believes that the government of Vietnam, Department of Animal Health (DAH), will accept these products with certification as described below. Exporters are responsible, however, for coordinating with their Vietnamese importers to ensure that all requirements for importation are met and the products will be allowed entry.

### **General Instructions for Exporters**

1. Use the fillable VS Form 16-4 (MAR 2010), “Export Certificate for Animal Products” which can be accessed at the following link through the home page of the International Animal Product Regulations: <http://www.aphis.usda.gov/regulations/vs/iregs/products/>
2. Prepare a notarized affidavit with the required certification statements noted under “Export Certification Requirements” below. If assistance is needed in preparing a proper notarized affidavit, please work with the VS Area Office that will be endorsing your export certificates. Contact information for VS Area Offices can be found at: [http://www.aphis.usda.gov/animal\\_health/area\\_offices/](http://www.aphis.usda.gov/animal_health/area_offices/)
3. Complete all applicable sections of the VS 16-14, including a product description which identifies the species of origin (bovine) and the specific type of blood product (e.g., whole blood, serum, plasma). Please see general instructions on the home page of the International Animal Product Regulations: <http://www.aphis.usda.gov/regulations/vs/iregs/products/> If assistance is needed, please contact the VS Area Office that will be endorsing your export certificates.
4. Provide documentation, as needed, to support claim that the blood products were derived from clinically healthy donor cattle (e.g., proof that the donor animals are under veterinary care).

### **Export Certification Requirements**

The following certification statements must be included in the “Additional Declarations” section of VS Form 16-4 (MAR 2012), “Export Certificate for Animal Products.” These statements must not be modified except as noted (the notarized affidavit line should include the actual name of the manufacturer/exporter; specific blood product or derivative must be identified in statement #1; specific intended end-use must be identified in statement #2).

This office has on file a notarized affidavit from [**manufacturer/exporter**] verifying the accuracy of the statements below.

1. The certified products are U.S. origin and are [**insert type of blood product, e.g., whole blood; serum; plasma; <blood derivatives> such as albumin or globulin**].
2. The products are intended to be used for [**insert intended end use, e.g., in-vitro laboratory or diagnostic purposes**].
3. The products were manufactured from bovine blood or one of its components or derivatives.
4. The blood used in the manufacture of the products was derived from cattle determined to be clinically healthy at the time of blood collection.
5. The products were manufactured in a facility approved by the competent authority and meet the requirements of the United States for domestic sale and use.
6. The products were manufactured in accordance with U.S. laws and regulations intended to ensure that they are unlikely to transmit disease agents, including transmissible spongiform encephalopathies (TSEs).
7. Adequate precautions were taken following processing to prevent product contamination with microbiological pathogens.
