

# **Summary of Studies Supporting USDA Product Licensure**

| Establishment Name  | Boehringer Ingelheim Animal Health USA Inc.  |
|---|--|
| USDA Vet Biologics<br>Establishment Number                                      | 124  |
| Product Code  | 44C9.21  |
| True Name   | Bovine Rhinotracheitis-Virus Diarrhea-Parainfluenza 3-<br>Respiratory Syncytial Virus Vaccine, Modified Live Virus,<br>Haemophilus Somnus Bacterin |
| Tradename(s) / Distributor or<br>Subsidiary<br>(if different from manufacturer) | Express 5-HS - No distributor specified  |
| Date of Compilation<br>Summary  | April 08, 2019   |

Disclaimer: Do not use the following studies to compare one product to another. Slight differences in study design and execution can render the comparisons meaningless.

124 44C9.21 Page 1 of 16

| Study Type                    | Efficacy  |
|-------------------------------|---|
| Pertaining to                 | Bovine Virus Diarrhea (BVD)   |
| Study Purpose                 | Demonstration of efficacy against BVD Type 1 (respiratory   |
| _                             | disease)  |
| <b>Product Administration</b> |   |
| Study Animals                 | Bovine  |
| Challenge Description         | BVD Type 1 isolate NY-1   |
| Interval observed after       |   |
| challenge                     |   |
| Results                       | Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date. |
| <b>USDA Approval Date</b>     | November 9, 1998  |

#### Outcome =

- Positive if any day was positive (+) for BRSV virus isolation
- Negative if all days were negative (-) for BRSV virus isolation

## Nasal swab results =

- + if BRSV was detected by virus isolation
- - if BRSV was not detected by virus isolation

### **Outcome (Overall) for Lungs =**

- Positive if any parameter is positive (visual lesions, palpable lesions, VI, FA)
- Negative if all parameters are negative (visual lesions, palpable lesions, VI, FA)

# **Total Score for Lungs =**

- Sum of scores for all lung lobes (see following pages for each lung lobe).
- Scores range from 0 (negative / normal) to 32. Any score of 1 or higher is considered positive.

#### **BRSV Virus Isolation (VI) =**

- Positive if BRSV was isolated from lung tissue
- Negative if BRSV was not isolated from lung tissue

#### Fluorescent Antibody (FA) Testing =

- Positive if BRSV specific staining was observed in lung tissue
- Negative if BRSV specific staining was not observed in lung tissue
