

Summary of Studies Supporting USDA Product Licensure

Establishment Name	Zoetis Inc.
USDA Vet Biologics Establishment Number	190
Product Code	47K1.20
True Name	Canine Distemper-Adenovirus Type 2-Parainfluenza- Parvovirus Vaccine, Modified Live Virus, Leptospira Canicola- Grippotyphosa-Icterohaemorrhagiae-Pomona Bacterin
Tradename(s) / Distributor or Subsidiary (if different from manufacturer)	Duramune + 5L4 - No distributor specified Vanguard DAPP+L4 - No distributor specified Vanguard Plus 5 L4 - Agrimatco Limited Algeria Vanguard Plus 5 L4 - No distributor specified Vanguard Plus 5 L4 - Not Listed Vanguard Plus 5 L4 - Zoetis Algentina Vanguard Plus 5 L4 - Zoetis Argentina Vanguard Plus 5 L4 - Zoetis Argentina Vanguard Plus 5 L4 - Zoetis Colombia S.A.S. Vanguard Plus 5 L4 - Zoetis Mexico Vanguard Plus 5 L4 - Zoetis Russia
Date of Compilation Summary	October 15, 2022

Disclaimer: Do not use the following studies to compare one product to another. Slight differences in study design and execution can render the comparisons meaningless.

Study Type	Efficacy
Pertaining to	Canine Adenovirus Type 2 (CAV-2)
Study Purpose	Demonstrate effectiveness against CAV-2 and CAV-1
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	September 14, 1977

Study Type	Efficacy	Efficacy				
Pertaining to	Leptospira interrogans serovar Canicola					
Study Purpose	To demonstrate	effectiven	ess agai	nst <i>Leptos</i>	pira inte	rrogans
	serovar Canicol	a				
Product Administration	Two doses, administered subcutaneously 3 weeks apart.					
Study Animals	Study involved of age.	Study involved 16 vaccinated and 16 placebo puppies, 5-7 weeks of age				
Challenge Description	Challenged with following admin	n <i>Leptospii</i> nistration c	<i>ra interr</i> of the se	<i>ogans</i> serc	ovar Can nation.	icola, 25 days
Interval observed after	After challenge	dogs were	e observ	ed for 28 d	lavs for	clinical signs
challenge	of disease. Sam	ples were	collecte	d post chal	llenge to	detect the
	presence of Lep	tospiral or	ganisms	5.	U	
Results	Efficacy was de	termined b	y Lepto	spirosis an	d Lepto	spiruria.
	Leptospirosis w	as based of	n cultur	e of Leptos	spiral org	ganisms from
	tissue samples (excluding	blood, u	rine, and r	enal tiss	ue) in
	conjunction wit	h clinical s	igns of	disease pre	esent on	one or more
	days. Leptospin	ruria was d	efined a	s positive	culture c	of Leptospiral
	organisms from	urine or re	enal tiss	ue.

Table 6. Individual animal data for Vaccinated animals

Study Type	Efficacy
Pertaining to	Leptospira Canicola
Study Purpose	Demonstrate effectiveness against L. canicola
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	December 22, 2004

Study Type	Efficacy
Pertaining to	Leptospira Grippotypohosa
Study Purpose	Demonstrate effectiveness against L. grippotypohosa
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	June 03, 2004

Study Type	Efficacy
Pertaining to	Leptospira Icterohaemorrhagiae
Study Purpose	Demonstrate effectiveness against L. icterohaemorrhagiae
Product Administration	Subcutaneously
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	December 22, 2004

Study Type	Efficacy
Pertaining to	Leptospira Pomona
Study Purpose	Demonstrate effectiveness against L. pomona
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	August 20, 2004

Study Type	Efficacy
Pertaining to	Canine Parainfluenza Virus (CPI)
Study Purpose	Demonstrate effectiveness against CPI
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	July 11, 1979

Study Type	Efficacy
Pertaining to	Canine Parainfluenza Virus (CPI)
Study Purpose	Demonstrate effectiveness against CPI
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	August 04, 1976

Study Type	Efficacy
Pertaining to	Canine Parainfluenza Virus (CPI)
Study Purpose	Demonstrate effectiveness against CPI
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	January 25, 1977

Study Type	Efficacy
Pertaining to	Canine Distemper Virus (CDV)
Study Purpose	Demonstrate effectiveness against CDV
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	November 15, 1976

Study Type	Efficacy
Pertaining to	Canine Distemper Virus (CDV)
Study Purpose	Demonstrate effectiveness against CDV
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	May 01, 1970

Study Type	Efficacy
Pertaining to	Canine Parvovirus (CPV)
Study Purpose	Demonstrate effectiveness against CPV
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	July 28, 1995

Study Type	Efficacy
Pertaining to	Canine parvovirus (CPV)
Study Purpose	To demonstrate efficacy against CPV Type 2c
Product Administration	Two doses, administered 3 weeks apart
Study Animals	30 beagles 6-8 weeks of age were randomly divided into either
	controls (T01, n=10) or vaccinates (T02, n=20)
Challenge Description	All animals were challenged 5 weeks after the second
	vaccination (study day 56) with CPV-2c orally and intranasally
Interval observed after	Clinical observations and rectal body temperatures were
challenge	observed twice daily for 2 weeks following challenge.
Results	Requirements per 9 CFR 113.317 were met.
	All dogs were negative for canine parvovirus serum neutralizing antibody and for fecal shedding of virus on Day 0 for the study. Control dogs remained negative through the day of challenge. All control dogs (10 of 10) met at least 3 criteria of parvovirus infection.* The vaccine was efficacious with no vaccinated dogs (0 of 20) having more than 1 criteria of infection, nor any virus shedding. *Criteria for CPV infection include: temperature ≥103.4 °F; lymphopenia of
	$\geq 50\% of prechallenge normal; clinical signs such as diarrhea, mucus in feces, or blood in feces; and viral hemagglutinins at a level of \geq 1:64 in a 1:5 dilution of feces or a test of equal sensitivity.Raw data is available on the following pages.$

Table 6. Summary of virus isolation results by treatment group and Study Day

*Negative (≤10 ^{3.0} TCID₅₀ / gram), positive (≥ 10 ^{3.3} TCID₅₀ / gram). **Animals in treatment group T01 were euthanized on study D61 [(n=5) 5 days post challenge] and study D62 [(n=5) 6 days post challenge] as a result of clinical signs associated with challenge.

Study Type	Efficacy
Pertaining to	Canine Parvovirus (CPV)
Study Purpose	Demonstrate effectiveness against CPV in the face of low levels
	of maternal antibody.
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	July 03, 1995

Study Type	Safety
Pertaining to	Canine Adenovirus Type 2 (CAV-2)
Study Purpose	Safety Evaluation to demonstrate the development of corneal
	opacity is not associated with the use of this product.
Product Administration	
Study Animals	Dogs
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	15 August, 1977

Study Type	Safety
Pertaining to	ALL
Study Purpose	To demonstrate safety under field conditions
Product Administration	
Study Animals	Canine
Challenge Description	
Interval observed after	
challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	January 28, 2005
