

The annual cooperative Karnal Bunt Survey, initiated in 1996, samples representative host material in significant areas of production. The goal of the survey is to ensure continued freedom from Karnal bunt (*Tilletia indica*) in the U.S. marketplace. Counties shown in green participated in the survey and met the official sampling requirements, without detection of Karnal bunt.

\* AK, HI, PR, and U.S. Territories (not shown) do not participate in the annual national survey.
