Summary of Studies Supporting USDA Product Licensure

Establishment Name	Diamond Animal Health, Inc.
USDA Vet Biologics Establishment Number	213
Product Code	1155.20
True Name	Bovine Rhinotracheitis-Virus Diarrhea Vaccine, Killed Virus
Tradename(s) / Distributor or Subsidiary (if different from manufacturer)	Diamond Animal Health, Inc. Master Guard 3 - Elanco Animal Health - Diamond Animal Health, Inc.
Date of Compilation Summary	December 20, 2023

Disclaimer: Do not use the following studies to compare one product to another. Slight differences in study design and execution can render the comparisons meaningless.

Study Type	Efficacy
Pertaining to	Bovine Virus Diarrhea (BVD) Type 1
Study Purpose	To demonstrate efficacy of against BVD virus Type 1
Product Administration	Two doses by subcutaneous or intramuscular injection to healthy, susceptible cattle
Study Animals	Bovine
Challenge Description	BVD Type 1, NY-1 Strain (CVB-L lot 97-12)
Interval observed after challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	January 27, 1999

Study Type	Efficacy
Pertaining to	Bovine Virus Diarrhea (BVD) Type 2
Study Purpose	To demonstrate efficacy of product for BVD virus Type 2
Product Administration	Two doses by subcutaneous or intramuscular injection
Study Animals	Bovine
Challenge Description	BVD virus Type 2, 890 Strain (lot 1444-57, from CVB-L lot 91-3)
Interval observed after challenge	14 days
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	January 27, 1999

Study Type	Efficacy
Pertaining to	Infectious Bovine Rhinotracheitis (IBR)
Study Purpose	To demonstrate efficacy of product for IBR virus
Product Administration	Two doses by intramuscular or subcutaneous injection
Study Animals	Bovine
Challenge Description	Cooper Challenge Strain IBR Virus Lot 50980
Interval observed after challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	July 15, 1986

Study Type	Safety
Pertaining to	ALL
Study Purpose	Demonstrate safety of product under typical use conditions
Product Administration	Two doses 14 days apart subcutaneously or intramuscularly
Study Animals	Bovine
Challenge Description	NA
Interval observed after challenge	NA
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	August 12, 1999
