

Guidance for Completion of the  
*Milk and Milk Products Exported From the United States to Albania*  
Certificate

The Albanian General Directorate of Food Safety & Consumer Protection has agreed to accept the attached *Milk and Milk Products Exported from the United States to Albania* certificate for the importation of milk and milk products for animal or human consumption.

The only statement that appears on this certificate is a declaration regarding the animal health status of the United States. Therefore, exporters are not required to provide any supporting documents (e.g. affidavit, certificate from State Dairy Board indicating products are "fit for human consumption"). The statement is endorsed by APHIS Veterinary Services as a direct attestation.

Please note, this is a bilaterally agreed to certificate, therefore no changes to the language or format can be made.
