

Fetal Bovine Serum

Fetal bovine serum exported to Brazil must be accompanied by an animal health certificate in English and Portuguese issued by the Official Veterinary Service of the exporting country.

In order to ensure compliance with the conditions of this protocol APHIS Veterinary Services will conduct an inspection to approve the facility producing the product.

The bovine fetal serum covered on these requirements must be accompanied by an official document identifying the origin (country of origin) and provide the following statements.

1. The product was produced from fetuses obtained from cattle born and raised in a country until slaughter classified by the OIE as BSE negligible or controlled risk. / *O produto foi obtido de fetos cujas matrizes tenham nascido e permanecido de forma ininterrupta até o abate em país(es) classificado(s) pela OIE como de risco insignificante ou controlado para EEB.*

2. The product was obtained from establishments located and animals that were born and reared in a country meeting the requirements of the OIE to be considered free of Rift Valley Fever and that has been recognized by the OIE as free of contagious bovine pleuropneumonia, foot-and-mouth disease and rinderpest. / *O produto foi obtido de estabelecimentos localizados e animais que nasceram e foram criados em país livre de febre do vale do Rift de acordo com o Código Sanitário para os Animais Terrestres da OIE, e país livre de pleuropneumonia contagiosa bovina, febre aftosa e peste bovina com reconhecimento da OIE.*

(Certify either option)

3. The adult cattle from which the product derives were slaughtered in an establishment under official governmental inspection, subjected to antemortem inspection for infectious and contagious diseases specific to cattle, approved for slaughter and further subjected to post mortem inspection. / *O produto é derivado de animais que foram abatidos em estabelecimentos com inspeção oficial, submetidos a inspeção antemortem para doenças infecto-contagiosas próprias da espécie e aprovados para o abate e submetidos a inspeção de postmortem.*

(Or / Ou)

3. The product was obtained from animals that were subjected to ante-mortem veterinary control, and their carcasses and viscera were subjected to post-mortem sanitary inspection performed by the Official Veterinary Service. / *O produto foi obtido de animais que foram reconhecidos como são durante controle veterinário ante-mortem, realizado pelo Serviço Veterinário Oficial.*

4. The animals from which the product was derived were not slaughtered as a result of a control or eradication program to control infectious diseases of cattle. / *O produto é derivado de animais que não tenham sido sacrificadas em consequência de programas de controle ou erradicação de doenças infecto-contagiosas próprias da espécie.*

5. The product was processed and packed in an establishment that was inspected and approved by the official service of the exporting country. / *O produto foi processado e envasado em estabelecimento habilitado pelo Serviço Oficial do país exportador.*

6. The product was handled in a manner to prevent contamination with foreign matter or pathogenic agents. / *O produto foi manuseado de forma a evitar contaminação com matéria estranha ou agentes patológicos.*

7. The product was packed for transport in manner to avoid leakage. / *O produto foi devidamente embalado para seu transporte em embalagens seguras de maneira a evitar vazamentos.*
