Certification Statements:

1. The swine to be exported have resided in the United States since birth or have been resident in the U.S.A. for at least sixty(60) days immediately prior to the date of exportation.
2. The animals were inspected by me on: _____. This is within thirty (30) days preceding the date of exportation.
3. The animals were found to be free from any communicable disease.
4. The animals were, to my best knowledge and belief, not exposed to any communicable disease within sixty (60) days preceding the date of inspection.
5. The animals are free from:
 - a. Pseudorabies, as determined by negative results on (date) : _____ having been obtained using: serum neutralization test, indirect ELISA against whole virus antigen, or blocking ELISA detecting antibodies against the gB antigen of the Pseudorabies virus/Aujeszky's Disease (PRV/ADV gB Ab ELISA Test), and the test was conducted within thirty (30) days preceding the date of shipment from the place where the animal was kept.

And,

 - b. Brucellosis, as determined by negative results on (date): _____ having been obtained using Fluorescence Polarization Assay (FPA) Indirect ELISA(I- ELISA) or other test _____ approved by the Canadian Food Inspection Agency for this purpose, and the test was conducted within thirty (30) days preceding the date of shipment from the place where the animal was kept.
 - c. The tests were performed in a laboratory that is approved to perform the test by the official veterinary service of the country of export. The results of the brucellosis test (including the type of test performed) are shown on the required health certificate for the animal to be imported.
6. The herd in which the animals was kept during the twelve (12) months preceding the date of shipment has been free from pseudorabies and brucellosis during such period so far as can be determined by blood test or from herd history.
7. After due inquiry, I am satisfied that, the swine to be exported have not been fed garbage at any time.
8. The animals are transported in vehicles that have been cleaned and disinfected.
9. The animals being presented for importation have not come into contact with any animals, products, or equipment of lesser health status during the period between required testing and export to Canada. In addition, no new animals were added to the group intended for export, unless these animals had sanitary guarantees similar to those of the rest of the group.
10. All states in which the animal(s) have resided in the past twenty-one (21) days were free from clinical and epidemiological evidence of vesicular stomatitis during the twenty-one (21) days immediately prior to export to Canada.

Note: All line-outs must be initialed
