

USDA APHIS has been advised that effective December 15, 2025, US feather and down processing, production, and export facilities will need to be registered by General Administration of Customs of the People's Republic of China (GACC) to be eligible to export feathers and down to China. This must be done prior to export.

We are working with USDA FAS China to compile a list of US Feather and Down facilities and exporters to provide GACC. If a facility needs to be registered, please directly contact the FAS China Office at email: FASChinaDAPQRegistrations@usda.gov
