Purpose

As defined by the Convention, the appendixes are as follows:

◆ Appendix I includes those timber species that are the most endangered among CITES-listed plants, and are threatened with extinction; CITES generally prohibits commercial international trade in specimens of these species

◆ Appendix II includes those timber species which are not necessarily threatened with extinction, but may become so unless trade in specimens of such species is subject to strict regulation in order to avoid utilization which is incompatible with the species’ survival

◆ Appendix III includes those timber species that have been added at the request of a Party that already regulates trade in the species and that needs the cooperation of other countries to prevent unsustainable or illegal exploitation of the species
Scope

What the Manual Covers

The manual is divided into the following chapters:
- Introduction
- Importation of CITES Timber Species
- Re-exportation of CITES Timber Species
- Violations, Seizures, and Forfeitures

The Introduction provides basic information about the manual, such as the purpose, scope, users, related documents, directions for using the manual, and a description of conventions used throughout the manual.

The Importation of CITES Timber Species chapter provides the procedures for verifying and handling importing of articles produced from timber species listed as CITES Appendix I, Appendix II, and Appendix III.

The Re-exportation of CITES Timber Species chapter provides the procedures for verifying and handling re-exporting of articles produced from timber species listed as CITES Appendix I, Appendix II, and Appendix III.

The Violations, Seizures, and Forfeitures chapter provides the procedures for documenting violations, and seizing and forfeiting of illegally-traded CITES regulated material.

The appendixes provide supplemental information to assist CBP Agricultural Specialists, PPQ Plant Health Safeguarding Specialists, and PPQ Export Certification Specialists who use the manual with carrying out specific duties.

The Glossary defines specialized words, abbreviations, and acronyms, and other terms that are used in the difficult or unfamiliar identification of lumber.

The Index contains topics and page numbers for quick reference.
What the Manual Does Not Cover

The manual does not cover the following:

◆ Information about medicinals and other derivatives that are intended for human consumption and derived from CITES Appendix I, Appendix II, or Appendix III timber species (see the Wood and Wood Byproducts section of Agricultural Commodity and Import Requirements database)

◆ Information about woody species and species that simulate the growth habit of woody species (such as cycads and palms), that are used solely for medicinal or herbal medicines or used solely as horticultural specimens (see the Wood and Wood Byproducts section of the Agricultural Commodity and Import Requirements database))

◆ Port policies or guidelines

◆ Wood identification detailed techniques (see the CITES Identification Guide—Tropical Woods)

Users

This manual is written for use by CBP Agricultural Specialists, PPQ Plant Health Safeguarding Specialists, PPQ Export Certification Specialists, and other CBP and PPQ personnel; State cooperators; and collaborators at airports and maritime locations. The experience level of users will vary, but the CBP Agricultural Specialists and PPQ Plant Health Safeguarding Specialists and PPQ Export Certification Specialists have, at minimum, a working knowledge of using PPQ manuals to make regulatory decisions.

Related Documents

Authority

The regulatory authority for taking the actions listed in this manual is contained in the following Acts:

◆ Civil Asset Forfeiture Reform Act of 2000
◆ Endangered Species Act of 1973 (ESA)¹
◆ Homeland Security Act of 2002²

¹ The Endangered Species Act of 1973 authorizes the USDA to enforce the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES).
The Code of Federal Regulations (CFR) provide the authority for the regulatory action taken and are enforced by CBP and PPQ. The restrictions and prohibitions listed in this manual are covered by Titles 7 and 50.

Title 7CFR contains the following parts:

- Part 355, for specifics on endangered species regulations concerning plants
- Part 356, for specifics on forfeiture procedures

Title 50CFR, Parts 1 to 199 contains the following parts for regulating endangered species:

- Part 17.12, Endangered and Threatened Plants
- Part 23, Endangered Species Convention
- Part 24, Importation and Exportation of Plants at Designated Ports

**Homeland Security Act of 2002**

The Homeland Security Act of 2002 contains the following section:

- Title 4, Section 421

Refer to the *Code of Federal Regulations* for the full text of the CFRs listed above. Refer to the full text of the CITES Convention and Decisions and Resolutions of the Conference of the Parties (all are used to make regulatory decisions), at [http://www.CITES.org](http://www.CITES.org).

**Application**

The *CITES I-II-III Timber Species Manual* contains the policies and guidelines for the tasks associated with regulating CITES Appendix I, Appendix II, and Appendix III timber species. The manual informs CBP Agriculture Specialists, PPQ Plant Health Safeguarding Specialists, PPQ Export Certification Specialists, and their managers with instructions to perform various clearance tasks.
Conventions

Conventions\(^3\) used in this manual are established by custom and are widely recognized and accepted. Major conventions used in this manual follow.

Advisories

Advisories are used throughout the *CITES I-II-III Timber Species Manual* to bring important information to your attention. Please carefully review each advisory. The definitions coincide with American National Standards Institute (ANSI), and are in the format shown below:

- **DANGER**
  - DANGER is used to indicate the event of imminent risk of death or serious injury.

- **WARNING**
  - WARNING is used to indicate the event of possible risk of serious injury.

- **CAUTION**
  - CAUTION is used to indicate tasks involving minor-to-moderate risk of injury.

- **NOTICE**
  - NOTICE is used to alert the reader of import information or Agency policy.

- **SAFETY**
  - SAFETY is used for general instructions or reminders related to safety.

**Boldface**

Boldfaced type is used to emphasize important words throughout this manual. These words are: *always, cannot, do not, does not, except, lacks, must, neither, never, no, nor, not, only, other than.*

---

\(^3\) In this context, conventions means the devices and techniques used in the manual and *not* the Convention of International Trade in International Trade of Wild Fauna and Flora (CITES).
Bullets
Bulleted lists indicate there is no order for the information listed.

Change Bars
A black change bar (see left margin) is used to indicate a change and appears on the revised page. Unfortunately, change bars do not always appear when text is merely deleted. Change bars from the previous update are deleted when the chapter or appendix is revised.

Chapters
This manual contains the following chapters: Introduction, Importation of CITES Protected Timber, Re-exportation of CITES Protected Timber, and Violations, Seizures, and Forfeitures of CITES Protected Timber.

Contents
Every chapter has a table of contents that lists the heading titles within.

Control Data
Control data is located at the top and bottom of each page to help manual users keep track of where they are in the manual and to be aware of updates to specific chapters, sections, appendixes, etc., in the manual. At the top of each page is the chapter title and first-level heading for that page. At the bottom of each page is the transmittal number (month, year, number), title of the manual, page number, and unit responsible for content.

Decision Tables
Decision tables are used throughout the manual. The first and middle columns in each table represent conditions, and the last column represents the action to take after all conditions listed for that row are considered. Begin with the column headings and move left-to-right, and if the condition does not apply, then continue one row at a time until you find the condition that does apply.

Table 1-1 How to Use Decision Tables

<table>
<thead>
<tr>
<th>If you:</th>
<th>And if the condition applies:</th>
<th>Then:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Read this column cell and row first</td>
<td>Continue in this cell</td>
<td>TAKE the action listed in this cell</td>
</tr>
<tr>
<td>Find the previous condition did not apply, then read this column cell</td>
<td>Continue in this cell</td>
<td>TAKE the action listed in this cell</td>
</tr>
</tbody>
</table>
Examples
Examples are used to clarify a point by applying a real-world situation.

**EXAMPLE** Examples are graphically placed boxes within the text as a means of visually separating information from other information on the page. Examples *always* appear in a box like this.

Footnotes
Footnotes comment on or cite a reference to text and are referenced by number. The footnotes used in this manual include general text footnotes, figure footnotes, and table footnotes.

General text footnotes are located at the bottom of the page.

When space on the page allows, table and figure footnotes are located directly below the associated figure or table. However, for multi-page figures or tables that cover the length of a page, footnote numbers and footnote text *cannot* be listed on the same page. To locate figure footnote text or table footnote text, be sure to check the last page and the page following the end of the associated table.

Heading Levels
Within each chapter there are three heading levels. The first heading is indicated by a horizontal line, and the heading follows directly below and across both the left and right columns. The second heading is in the right-hand column with text beginning below. The third heading is in the left-hand column and the text is in the right-hand column.

Highlighting and Hypertext Links
Figures, headings, and tables are cross-referenced in the body of the manual are highlighted in boldface type. These appear in blue hypertext in the on-line manual.

**EXAMPLE** See Figure 2-1.

Indentions
Entry requirements which are summarized from CFRs, permits, or policies are indented on the page.
Italics
The following items are italicized throughout the *CITES I-II-III Timber Species Manual*:

- Cross-references to headings and titles
- Publication names
- Scientific names of commodities

Numbering Scheme
A two-level numbering scheme is used in this manual for figures, pages, and tables. The first number represents the chapter. The second number represents the page, figure, or table. This numbering scheme allows for identifying and updating. Dashes are used in page numbering to differentiate page numbers from decimal points.

Transmittal Number
The transmittal number contains the month, year, and a consecutively-issued number (beginning with -01 for the first edition and increasing consecutively for each update to the edition). The transmittal number is only changed when the specific chapter sections, appendixes, or glossary, tables, or index is updated. If no changes are made, then the transmittal number remains unchanged. The transmittal number only changes for the entire manual when a new edition is issued or changes are made to the entire manual.

**EXAMPLE**
The transmittal number is located in the control date at the bottom of each page in this manual.
10/2019-67 is the transmittal number for this update.
10 is the month the update was listed
2019 is the year the update was issued
67 is the number issued (original new edition was 01 plus 49 updates)

Using the Manual
Review the and the contents of this manual to get a feel for the scope of material covered. Glance through the section that you will be using, and familiarize yourself with the organization of the information. Use the table of contents to find the information you need. If the table of contents is not specific enough, then turn to the index to find the topic and corresponding page number.

**EXAMPLE**
To find information on the species identified as CITES Appendix I, Appendix II, and Appendix III timber species, see *Step 1: Confirm the Identity of the Timber or Articles* on page 2-5.
Reporting Problems With or Suggestions for the Manual

Use Table 1-2 to report problems, situations, disagreements, or improvements which directly affect the contents of this manual.

1 CBP and PPQ: To determine the name, phone number, and address of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.

### Manual Updates

The PPQ Manuals Unit issues and electronically maintains manuals on the Manuals Unit Web site. These on-line manuals contain the most up-to-date information.

Immediate update revisions to the manual are issued and distributed via e-mail to CBP Agricultural Specialist and all PPQ employees.

Each immediate update contains the following information:

- Link to access and download the on-line manual
- List of the revised pages
- Purpose of the revision(s)
Transmittal number

Ordering Additional Manuals and Revisions
Although using the on-line manuals is the preferred method, APHIS employees may order paper copies of manuals from the APHIS Printing, Distribution, and Mail Services Center in Riverdale, Maryland. See the Riverdale Print Shop Web site for detailed information and printing costs. The Manuals Unit is not responsible for printing costs.

Required Documents for Importation of Appendix I Timber Species 2-29

Required Documents for Importation of Appendix II Timber Species 2-32

Required Documents for Importation of Appendix III Timber Species 2-67

Step 5: Collect the Appropriate Documents Associated with the Shipment 2-97

Timber for Importation that Has Been Re-exported from Another Country 2-97

Step 6: Verify the CITES Document Is Authentic and Acceptable 2-98

Replacement CITES Documents 2-102
Retrospective CITES Documents 2-103

Step 7: Ensure the Protected Plant Permit Has Not Expired 2-105

Confirm PPP Valid or Apply for a PPP 2-105

Step 8: Verify the Quantities Are Authorized 2-106

Step 9: Inspect the Shipment 2-107

Step 10: Cancel CITES Documents By Stamp and Endorsement 2-109

Step 11: Distribute the CITES Documents 2-110
The Importation of CITES Timber Species chapter provides the guidelines for handling the importation of CITES Appendix I, Appendix II, and Appendix III protected timber species. These guidelines are to be used for the following:

- Confirming that the commodity is in a form which is regulated;
- Determining which permits and/or certificates are required;
- Verifying that the documents are valid;
- Inspecting the commodity to verify that the quantity in the shipment matches the quantity listed on the CITES document;
- Instructing the user on how to validate a CITES document; and
- Distributing and filing the paperwork.

**NOTICE**

Use these guidelines in conjunction with 7CFR 319.40 (see the Wood and Wood Byproducts section of the Agricultural Commodity and Import Requirements database) and the Plant Protection Act. When applying these guidelines, first apply the regulations that prevent the entry of plant pests. In addition to a USDA-APHIS ePermits-issued Protected Plant Permit, many wood and forest products also require PPQ Form 597, Import Permit for Plants and Plant Products (see also PPQ Form 585, Application to Import Timber or Timber Products).
Preparation

As with other port documents, copies of CITES documents must be filed in an organized, consistent manner. The CITES files and copies maintained at your port are important in case the originals become lost or destroyed. An accessible filing system will also enable you to comply with requests for information made by other government and non-government agencies and the general public through the Freedom of Information Act (FOIA).

Filing System

If you already have a filing system for retaining CITES records in place at your port, then review these instructions to be sure your system is functional. If you do not have a filing system in place, then follow the instructions below.

To set up a filing system, do as follows:

1. Decide on the filing system that is most practical for your location. Select one of the following methods to keep the records complete and accessible:
   - File alphabetically by permittee’s name
   - File chronologically by month and year

2. Select the documents to be filed. At a minimum, you must file the following in the order listed below:
   A. CITES document (must be a validated copy)
   B. Customs entry
   C. Dimensional specification sheets (if applicable)
   D. Invoice/packing list
   E. Lading bill or air waybill
   F. Phytosanitary Certificate (if required)

After filing the documents, you must maintain each file for a minimum of five years, counting from the date the importation occurred.

EXAMPLE A file must be maintained until January 24, 2017 for an importation that occurred on January 24, 2012.
The procedures for handling the importation of CITES Appendix I, Appendix II, and Appendix III protected timber species are summarized in Table 2-1.

Table 2-1 Summary of Procedures for Handling the Importation of CITES Appendix I, Appendix II, and Appendix III Protected Timber Species

<table>

<td>If the shipment is in order, then validate the CITES documents by stamp and endorsement.</td>
</tr>
<tr>
<td>11.</td>
<td>Distribute and file the endorsed documents.</td>
</tr>
</tbody>
</table>

Follow the steps below when handling the importation of CITES Appendix I, Appendix II, and Appendix III protected timber species used for lumber or other wood products.

**FWS-USDA-CITES Clearance of Musical Instruments**

The agreement between the U.S. Fish and Wildlife Service (FWS) and USDA, for the clearance of musical instruments made of non-living CITES plant material and CITES or non-CITES wildlife for import is as follows:

FWS Wildlife Inspectors can inspect and clear shipments of products containing both CITES listed non-living plant species and any CITES or non-CITES wildlife species (fauna/animal).

This guidance applies only to shipments of products that contain both CITES listed non-living plants and CITES or non-CITES wildlife.

See U.S. Fish and Wildlife Service online guidance and the published letter on page A-19, as well as at CITES.org for more information on products containing both CITES-listed plants and CITES listed or non-CITES listed wildlife.
Step 1: Confirm the Identity of the Timber or Articles
Currently, there are 6 CITES Appendix I species, 26 Appendix II taxa (21 species and 5 genera), and 7 CITES Appendix III species used for lumber or other wood products. The most frequently used common names are shown beside the scientific names listed below. For a list of other common names, see Table 7-1 on page 7-1.

CITES Appendix I Species
The CITES Appendix I protected species are as follows:

◆ *Abies guatemalensis* (Guatemalan fir)
◆ *Araucaria araucana* (monkey puzzle tree)
◆ *Dalbergia nigra* (Brazilian rosewood)
◆ *Fitzroya cupressoides* (alerce)
◆ *Pilgerodendron uviferum* (pilgerodendron)
◆ *Podocarpus parlatorei* (Parlatore’s podocarp)
CITES Appendix II Species
The CITES Appendix II protected species are as follows:

- *Adansonia grandidieri* (giant baobab)
- *Afzelia* spp. (pod mahogany)
- *Aniba rosaeodora* (Brazilian rosewood)
- *Bulnesia sarmientoi* (galacwood)
- *Caryocar costaricense* (ajillo)
- *Cedrela* spp.
- *Dalbergia* spp. (rosewoods) except *Dalbergia nigra* (Brazilian rosewood)

**NOTICE**
Effective January 2, 2017, the entire genus *Dalbergia* spp. (rosewoods) are CITES Appendix II except *Dalbergia nigra* (Brazilian rosewood) remains CITES Appendix I.

- *Diospyros* spp. (ebonies)
- *Gonystylus* spp. (ramin)
- *Guaiacum* spp. (lignum vitae)
- *Guibourtia demeusei* (red bubinga)
- *Guibourtia pellegriniana* (rose bubinga)
- *Guibourtia tessmannii* (rose bubinga)
- *Khaya* spp. (African mahogany)
- *Oreomunnea pterocarpa* (gavilan)
- *Osyris lanceolata* (African sandalwood)
- *Paubrasilia echinata* (Brazilwood)
- *Pericopsis elata* (afrormosia)
- *Platymiscium pleiostachyum* (cristobal graradillo)
- *Prunus africana* (African cherry, pygeum)
- *Pterocarpus* spp. (African rosewood, red sandalwood)
- *Senna meridionalis* (taraby)
- *Swietenia humilis* (Pacific Coast mahogany)
- *Swietenia macrophylla* (bigleaf mahogany)
- *Swietenia mahogani* (Caribbean mahogany)
- *Widdringtonia whytei* (Mulanje-cedar)
NOTICE

FWS Wildlife Inspectors can inspect and clear shipments of products containing both CITES listed non-living plant species and any wildlife species that may be either CITES or non-CITES listed species. This guidance only applies to shipments that contain both CITES listed plants and wildlife. See the FWS notice on page A-19.
CITES Appendix III Species
The CITES Appendix III protected species are as follows:

- *Dipteryx panamensis* (almendro)
- *Fraxinus mandshurica* (manchurian ash)
- *Magnolia lilifera* var. *obovata* (magnolia)
- *Pinus koraiensis* (Korean pine)
- *Podocarpus nerifolius* (podocarp)
- *Quercus mongolica* (mongolian oak)
- *Tetracentron sinense* (tetracentron)
Shipping Documents Review
To determine that the importation is of a CITES Appendix I, Appendix II, or Appendix III timber species, review the shipping documents. Regulations require CITES plants be identified to their genus and species by any one of the following:

◆ Label
◆ Invoice
◆ Packing list
◆ Tag
◆ Other document accompanying the shipment

The exporter or the exporter’s agent is responsible for providing you with the scientific name of the timber species traded. CITES regulated timber may be manifested or invoiced by a trade name or a local name. If you are given a common name that is not listed in Table 7-1, and you want to confirm the scientific name of the material being imported to determine if the wood is listed as regulated, then search the Checklist of CITES species database on the CITES web site.

Checklist of CITES Species Database
Use the Checklist of CITES Species database to do the following:

◆ Generate an Index of CITES Species (an alphabetical list of all plant taxa (and animal taxa) currently included in the CITES Appendixes)
◆ Search and view by CITES Appendix listing
◆ Search and view by common name (refer to the main record)
◆ Search and view by country
◆ Search and view by scientific name (main records and contain all information)
◆ Search and view by scientific synonym (refer to the main record)
◆ Provide a history of CITES Listings (an historical record of all CITES listings since 1975, including all reservations and annotations)

NOTICE
The Checklist of CITES species database does not include all common names and synonyms for CITES-regulated species.
CITES Timber Species Recognition and Wood Identification

For timber species commodity recognition and a synopsis of wood identification, see Wood Identification on page E-1. For detailed instructions on how to identify wood of CITES regulated species, see the CITES Identification Guide—Tropical Woods guide.

Urgent Interception Identification

If after inspecting the wood or articles and reviewing the entry paperwork, you are still unable to determine the identity of the wood or articles or suspect or question that the article is not as identified on the manifest or invoice, then do as follows:

1. Contact the PPQ Area Identifier Botanist that services your port to determine if taking a sample of the wood is necessary.
2. You may be directed (by the PPQ Botanist) to sample the commodity and send the sample for identification.
3. If you are instructed to send the interception(s) to a PPQ Area Identifier specializing in CITES wood identification, then see Table 2-2.
   A. Complete the Interception Record for URGENT identification in ARM.
   B. Enclose the specimen and interception form(s) in an escape proof package.
   C. Affix black and yellow tape to the outside of the package.
   D. Ship to the PPQ Area Identifier (listed in Table 2-2) using an overnight delivery service with tracking capacity.
4. If you are instructed by the PPQ Botanist or Area Specialist (specializing in CITES wood identification) to send the interception to:
   - PRIMARY: U.S. Forest Service International Programs Wood Identification and Screening center (WISC), or
   - SECONDARY: National Fish and Wildlife Forensic Lab, or
   - TERTIARY: USDA Forest Products Laboratory,

   then see Table 2-3.
   A. Contact the laboratory to confirm an analyst is available and to verify shipping procedures and required paperwork.
   B. Complete the required paperwork.
   C. Enclose the specimen(s) and interception form(s) in escape-proof packaging with tape.
   D. Clearly initial and date son the tape.

1 CBP and PPQ: To locate the name, phone number, and address of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.
E. Include the National CITES Coordinator, Dr. John Veremis, e-mail john.veremis@usda.gov on all communications.

F. Follow the laboratory’s shipping procedures and send the package to the designated laboratory (Table 2-3) as instructed by the PPQ Botanist or Area Specialist.

Step 2: Confirm the Article Being Imported Is Regulated

CITES annotates some of the listed timber species to include or exclude certain parts and derivatives. To confirm that the listed article being imported is regulated by CITES Appendix I, Appendix II, or Appendix III, inspect the consignment and verify the description of the commodity on the accompanying shipping documents. Then continue, using Table 2-4.

Table 2-4 Determine if a Timber Species Is Regulated by CITES Appendix I, Appendix II, or Appendix III

<th>Then:</th>
</tr>
</thead>
</table>
| Widdringtonia whytei  
(Mulanje cedar) | Any country | All parts and derivatives, including manufactured and finished products | | The articles are CITES Appendix II regulated  
GO to Step 3: Determine Your Authority on page 2-28 |

1 Includes building material, cabinetmaking material, charcoal, firewood, flooring, food containers, fuel wood, furniture, joinery, light construction material, matches, particleboard, plywood, pulp/paper products, roof shingles, and veneer, etc.

2 Extract: Any substance obtained directly from plant material by physical or chemical means regardless of the manufacturing process. An extract may be solid (e.g., crystals, resin, fine or coarse particles), semi-solid (gums, waxes), or liquid (e.g., solutions, tinctures, oil and essential oils).

3 Includes construction material, flooring, furniture, joinery, plywood, pulp/paper products, railroad ties, and vehicle parts, etc.

4 Includes railroad ties.

5 Populations of the Neotropics include the Caribbean, Central America, Mexico, and South America.

6 The term “10 kg per shipment” the 10 kg limit should be interpreted as referring to the weight of the individual portions of each item in the shipment made of the species concerned. In other words, the 10 kg limit is to be assessed against the weight of the individual portions of wood of Dalbergia/Guibourtia species contained in each item of the shipment, rather than against the total weight of the shipment.

7 Includes agricultural implements, bearings and bushings, barge and dock fenders, boat construction articles, chemical derivatives, cogs and shafts, cross ties, fishing rods, flooring, furniture, heavy construction and pulp mill equipment, railroad ties, sporting goods, tool handles, turnery, and veneer, etc.

8 Includes agricultural implements, boat building materials (general), boat masts, boxes and crates, cabinetmaking materials, carvings, cigar boxes, construction materials, cooperages, flooring, food containers, fuel wood, furniture, furniture components, joinery, mathematical instruments, mine timbers, musical instruments, particleboard, pencils, piling, plywood, poles, pulp/paper products, shakes, shingles, sporting goods, toys, and vats, etc. See FWS-USDA-CITES Clearance of Musical Instruments.

9 Includes brush backs, building materials, ceilings, counter tops, door frames, dowels, flooring, furniture, joinery, mouldings, nonstriking handles (such as brooms and umbrellas), paneling, picture frames, plywood, pool cues and racks, rulers, shoji screens, stair treads, stringers, tool handles, toys, trays, tripods, turnery, venetian blinds, window blinds, and window frames, etc.

10 Manufactured products include: bearings and bushings, boat building materials (general), brush backs and handles, bush blocks, farm vehicles, furniture, golf club heads, machinery parts, marine construction material, mathematical instruments, naval architecture, pulley sheaves, railroad ties, shade rollers, sporting goods, tables, textile equipment, turnery, and wheels. Regulating depends on whether or not the products are finished, packaged, and ready for retail trade, etc.

11 Trade in this species is rare. If you encounter a regulated article made of this species, then contact the Manuals Unit (240-529-0357) to add the article to this list.

12 Includes a variety of uses within the species’ natural range. If you encounter a regulated article made of this species, then contact the Manuals Unit (240-529-0357) to add the article to this list, etc.

13 Transformed wood: Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed (as defined by Harmonized system code 44).

14 Includes flooring, furniture, posts, and timber. (Wood is noted for its longevity in moist environments.)

15 Includes furniture, musical instruments, timber, and veneer, etc.

16 Wood chips: Wood that has been reduced to small pieces.

17 Includes timber.

18 Populations of the Neotropics include the Caribbean, Central America, Mexico, and South America.
19 Plywood: Consisting of three or more sheets of wood glued and pressed one on the other and generally disposed so that the grains of successive layers are at an angle (HS Code 44.12.13, HS Code 44.12.14, and HS Code 44.12.22). See Harmonized System of World Customs Organization (HS) Codes.

20 There is a moratorium on the export of *Swietenia macrophylla* (bigleaf mahogany) from Brazil and Nicaragua.

21 National CITES Specialist is Timothy Torbett, e-mail timothy.j.torbett@usda.gov. The National CITES Coordinator is John Veremis, e-mail john.veremis@usda.gov.

22 Trade in this species is rare. If you encounter a regulated article that is not listed, then contact the Manuals Unit, 240-529-0357, to add the article to this list.
Step 3: Determine Your Authority

If you are not certain that your port is designated for the importation of CITES regulated timber species or articles, then check and confirm CITES ports:

- PPQ see Designated CITES Ports and Plant Inspection Stations CITES Staff on page 5-1

If you are located at a CITES-designated port, then continue to Step 4: Determine Which Documents Are Needed.

If you are not located at a CITES-designated port, then have the owner or owner’s agent arrange to move the shipment under Customs and Border Protection’s (CBP) bond to a designated port (at the owner’s expense). Notify the designated port of the pending arrival.

See Table 2-5 on page 2-30 to determine which documents are required for the importation of CITES Appendix I timber species.
Step 4: Determine Which Documents Are Needed

To determine which documents are needed for the legal importation of CITES regulated timber, use the appropriate table as follows:

- CITES Appendix I, see Table 2-5
- CITES Appendix II, see Table 2-6
- CITES Appendix III, see Table 2-7

**NOTICE**

In addition to any import permits and documents listed as required in this manual, additional import permits and other documentation may also be required under 7 CFR 319.40. See the Wood and Wood Byproducts section of the Agricultural Commodity and Import Requirements database.

Required Documents for Importation of Appendix I Timber Species

The importation of a CITES Appendix I timber species is permitted when presented with appropriate documentation for the following categories of trade:

- Articles derived from trees cut in the wild for non-commercial use
  (when presented with a CITES management authority-issued CITES Export Permit or Re-export Certificate designating a source code W for specimens collected from the wild; and a CITES Import Permit)

- Articles derived from plantation-grown trees
  (when presented with a CITES management authority-issued CITES Export Permit or Re-export Certificate designating either source code A for artificially-propagated material being traded for non-commercial purposes; or source code D for artificially-propagated material being traded for commercial purposes)

- Articles acquired prior to the date the Convention listed the species
  (when presented with a CITES management authority-issued CITES Other Certificate designating Pre-Convention specimens; and designating the date of acquisition or certification the specimens were acquired before the date first included in the CITES appendices)

**NOTICE**

Commercial trade in CITES Appendix I species originating from the wild is prohibited.

See Table 2-5 to determine which documents are required for the importation of CITES Appendix I regulated timber species.

**NOTICE**

Use these guidelines in conjunction with 7CFR 319.40 (see the “Wood and Other Forest Products (Articles of the Timber and Lumber Industry)” section of the Wood and Wood Byproducts section of the Agricultural Commodity and Import Requirements database) and the Plant Protection Act. When applying these guidelines, first apply the regulations that prevent the entry of plant pests. In addition to a USDA-APHIS ePermits-issued Protected Plant Permit, many wood and forest products also require PPQ Form 597, Import Permit for Plants and Plant Products (see also PPQ Form 585, Application to Import Timber or Timber Products).

- Lacks the required CITES document
  - 1. PLACE the shipment on HOLD
  - 2. GO to Violations, Seizures, and Forfeitures on page 4-1

- Lacks a Protected Plant Permit
  - ALLOW the exporter to apply for a Protected Plant Permit (see Confirm PPP Valid or Apply for a PPP on page 2-105)

- Has an expired Protected Plant Permit

- Is not engaged in commercial business
  - GO to page 2-31

| ◆ Araucaria araucana (monkey puzzle tree) | | | ◆ Import Permit  
 ◆ Export Permit or Re-export Certificate designating source code W for specimens collected from the wild  
 OR  
 Presents one of the following CITES management authority-issued original Appendix I documents: | |
| ◆ Dalbergia nigra (Brazilian rosewood) | | | ◆ Export Permit or Re-export Certificate designating source code A for artificially propagated (plantation grown) material being traded for noncommercial purposes  
 ◆ Other Certificate designating Pre-Convention specimens; and designating the date of acquisition or certification the specimens were acquired before the date first included in the CITES appendices | |
| ◆ Fitzroya cupressoides (alerce) | | | | |
| ◆ Pilgerodendron uviferum (pilgerodendron) | | | | |
| ◆ Podocarpus parlatorei (Parlatore’s podocarp) | | | | |

1. Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.

2. Commercial trade in CITES Appendix I species originating from the wild is prohibited.

3. A CITES-issued original is defined as an original CITES document issued by a CITES Management Authority or an authority authorized by a CITES Management Authority.
Required Documents for Importation of Appendix II Timber Species

The importation of CITES Appendix II timber species is permitted when presented with the appropriate CITES documentation for the following categories of trade:

- **Articles derived from trees cut in the wild**
  (when presented with a CITES management authority-issued *CITES Export Permit* or *Re-export Certificate* designating source code W for specimens collected from the wild)

- **Articles derived from plantation-grown trees**
  (when presented CITES management authority-issued *CITES Export Permit* or *Re-export Certificate* designating source code A for artificial propagation)

- **Articles acquired prior to the date the CITES Convention listed the species**
  (when presented with a CITES management authority-issued *CITES Other Certificate* designating Pre-Convention specimens; and designating the date of acquisition or certification the specimens were acquired before the date first included in the CITES appendices)

See Table 2-6 on page 2-33 to determine which documents are required for the importation of CITES Appendix II regulated timber species.

| | | | **Lacks** the required CITES document | 1. PLACE the shipment on HOLD  
2. GO to *Violations, Seizures, and Forfeitures* on page 4-1 |

1. Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.

2. A CITES-issued original is defined as an original CITES document issued by a CITES Management Authority or an authority authorized by a CITES Management Authority.

3. PPQ to locate the name of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.

4. Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.

5. A CITES-issued original is defined as an original CITES document issued by a CITES Management Authority or an authority authorized by a CITES Management Authority.

6. PPQ to locate the name of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.

7. If you are not certain the *Diospyros* spp. is of Madagascar origin, then contact your PPQ Port Botanist.

8. Listed by the Convention to include *Swietenia macrophylla* populations of the Neotropics only. *Swietenia macrophylla* trees cut in any country other than populations of the Neotropics are not regulated by CITES.

9. The Neotropics include the Caribbean, Central America, Mexico, and South America. Populations of the Neotropics include articles that originated in the Neotropics but were re-exported from another country.

10. There is a moratorium on the export of *Swietenia macrophylla* (bigleaf mahogany) from Brazil and Nicaragua.

11. The National CITES Specialist is Timothy Torbett. e-mail timothy.j.torbett@usda.gov.
The National CITES Coordinator is John Veremis, e-mail john.veremis@usda.gov.
**Required Documents for Importation of Appendix III Timber Species**

The importation of CITES Appendix III timber species is permitted when presented with the appropriate documentation issued by a CITES management authority for the following categories of trade:

- Articles derived from trees cut in the wild originating from a country that included the species in Appendix III (when presented with a CITES management authority-issued *CITES Export Permit* or *Re-export Certificate* designating source code W for specimens collected from the wild)

- Articles derived from trees cut in the wild originating from a country **other than** the country that included the species in Appendix III (when presented with a CITES management authority-issued *CITES Certificate of Origin* or *Re-export Certificate* designating source code W)

- Articles derived from plantation-grown trees (when presented with a CITES management authority-issued *CITES Export Permit* or *Re-export Certificate* designating source code A for artificial propagation)

- Articles acquired prior to the date the CITES Convention listed the species (when presented with a CITES management authority-issued *CITES Other Certificate* designating Pre-Convention specimens; and designating the date of acquisition or certification the specimens were acquired before the date first included in the CITES appendices)

See Table 2-7 on page 2-68 to determine which documents are required for the importation of CITES Appendix III regulated timber species.

**NOTICE**

Use these guidelines in conjunction with 7CFR 319.40, and see the Wood and Wood Byproducts section of the Agricultural Commodity and Import Requirements database and the Plant Protection Act. When applying these guidelines, first apply the regulations that prevent the entry of plant pests. In addition to a USDA-APHIS ePermits-issued Protected Plant Permit, many wood and forest products also require PPQ Form 597, Import Permit for Plants and Plant Products (see also PPQ Form 585, Application to Import Timber or Timber Products).

---

[^1]: Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.

[^2]: A CITES-issued original is defined as an original CITES document issued by a CITES Management Authority or an authority authorized by a CITES Management Authority.

[^3]: Some CITES Management Authorities will issue a CITES Export Permit in place of a CITES Certificate of Origin.
Step 5: Collect the Appropriate Documents Associated with the Shipment

Collect the following documents associated with the shipment:

- Original CITES Export documents issued by the exporting country’s CITES Management Authority
- USDA-issued Protected Plant Permit, for importers engaged in the commercial trade of CITES listed plants (see Protected Plant Permit on page A-27 and PPQ Form 621, Application for Protected Plant Permit to Engage in Business of Importing, Exporting, or Re-exporting... on page A-25)
  - If the importer does not have a permit, then you may allow the importer to apply for one (see Step 7: Ensure the Protected Plant Permit Has Not Expired on page 2-105 and follow the directions for allowing the importer to renew an expired permit)
- Cargo paperwork associated with the shipment (such as bill of lading, air waybill, U.S. Customs entry, invoice, and dimensional specification sheets)

Timber for Importation that Has Been Re-exported from Another Country

You may encounter CITES regulated timber species, or logs or articles made from regulated timber species and offered for importation that have been re-exported from another country.

EXAMPLE
A shipment of Mexican lignum vitae (Guaiacum officinale) lumber may be re-exported from Canada to the U.S. In this case, the shipment requires a CITES Re-export Certificate from the Canadian Management Authority.

EXAMPLE
A shipment of Peruvian Spanish cedar (Cedrela odorata) lumber may be re-exported from Bolivia to the U.S. In this case, the shipment requires a CITES Re-export Certificate from the Bolivian Management Authority.

For such re-exported shipments continue using these guidelines, but verify the validity of the Re-export Certificate from the Management Authority in the country from which the shipment is being re-exported rather than a CITES document from where the lumber was cut. Continue to Step 6: Verify the CITES Document Is Authentic and Acceptable on page 2-98.

---

2 Dimensional specification sheets are used for articles that are imported in quantities expressed in cubic meters, square meters, or board feet, and inventory the size of each piece of lumber or veneer in each bundle shipped. Usually there will be more than one dimensional inventory sheet with each shipment.
Step 6: Verify the CITES Document Is Authentic and Acceptable

Compare the CITES document accompanying the shipment to the CITES Standard CITES Form on page A-9. Follow the instructions in Table 2-8 on page 2-98 to determine if the CITES document for import of the shipment is valid. Verify the management authority’s address (instructions are in Block 6 and Block 13) in Table 2-8.

**NOTICE**

*Do not* accept a CITES Permit or CITES Certificate that is altered, modified, or crossed-out unless the modification or crossing out has been authenticated by the stamp and signature of the authority issuing the document.

If you are presented with an altered or questionable CITES document, then place the shipment on HOLD and contact a PPQ Regional Botanist through proper channels for assistance.

<table>
<thead>
<tr>
<th>Standardized Block No.</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The heading Standardized Block No. above refers to the block location on a Standard CITES Form. The block numbers may vary according to the difference in format used by each country</td>
<td></td>
</tr>
<tr>
<td>NOTICE</td>
<td>A CITES document <em>must</em> be written in one of the three working languages of the Convention (English, French, or Spanish) or <em>must</em> include a full translation into one of the three working languages. If the following information is <em>not</em> accurate and complete, then <em>do not</em> accept.</td>
</tr>
<tr>
<td>1</td>
<td>Permit Number and Type of CITES Document</td>
</tr>
<tr>
<td></td>
<td>VERIFY the CITES document has a permit number or certificate number (the unique control number that identifies the document)</td>
</tr>
<tr>
<td></td>
<td>VERIFY the type of CITES document presented (Export Permit/Certificate, Certificate of Origin, Re-export Certificate, or Other) corresponds with the category of trade</td>
</tr>
<tr>
<td></td>
<td>If the CITES document is marked &quot;Other&quot;, then the document <em>must</em> indicate the type of certificate such as: &quot;Certificate of Artificial Propagation&quot; (for plantation-grown trees); &quot;Certificate of Origin&quot;; or &quot;Pre-Convention Certificate&quot;</td>
</tr>
</tbody>
</table>
### Table 2-8 Instructions for CITES Permit or Certificate Validation (continued)

<table>
<thead>
<tr>
<th>Standardized Block No.</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Expiration Date</td>
</tr>
</tbody>
</table>

**NOTICE**

A CITES Import Permit and a *CITES Certificate of Origin* may be valid for **no** more than 12 months from the issuance date.

A *CITES Export Permit* or a *CITES Re-export Certificate* may be valid for **no** longer than 6 months from the issuance date. However, the conditions in 50 CFR §23.73(c)(2) and *Conference Resolution 12.3 (Rev. CoP 15), Permits and Certificates* Section XI are met, then the CITES Management Authority in the country of import may extend the validity of a *CITES Export Permit* or *CITES Re-export Certificate* beyond the 6 months for timber species.

CITES "OTHER" documents state the period of validity. See 50 CFR §23.54 for more information on CITES document expiration period.

| 3 & 4 | Name and Address of Importer and Exporter | 1. **VERIFY** that the complete name and address, including country, of the importer and exporter are on the CITES document; and match the information on the accompanying shipping documents
2. **VERIFY** that the CITES document designates a U.S. consignee. If the shipment is in-transit to another country, then see page 3-87 |

**NOTICE**

Although 50 CFR 23.73(c)(1) and *Conference Resolution 12.3 (Rev. CoP 15), Permits and Certificates* Section XI accommodate for rerouting and a change of destination, this is intended for the sale of logs, lumber, or veneer of CITES Appendix II or Appendix III timber species while a shipment is in transit. The resolution does not apply to U.S. company utilizing a CITES document issued to a foreign affiliate’s address.

| 5 | Special Conditions | **VERIFY** that the permittee complies with all the conditions on the CITES document |

<table>
<thead>
<tr>
<th>5a</th>
<th>Purpose of Transaction</th>
</tr>
</thead>
</table>
| 1. **VERIFY** the purpose of transaction identified either by a written description or by one of the codes in 50CFR §23.23(d) which reflects the nature of the transaction. Most transactions will be commercial with a transaction code T
2. **VERIFY** the transaction code is compatible with the source code recorded in Block 10 |

**EXAMPLE** An export permit authorizing commercial trade (purpose of transaction code T) for a wild-collected Appendix I specimen (source code W) would **not** be valid, except for pre-Convention specimens.

| 5b | Security Stamp Number or Security Number | **VERIFY** the number listed in Block 5b (on the document) matches the number of the security stamp affixed in Block 13. Some countries may choose to use security paper in lieu of a stamp; the security number found on the face of the document should also be recorded in Block 5b |
### Table 2-8 Instructions for CITES Permit or Certificate Validation (continued)

<table>
<thead>
<tr>
<th>Standardized Block No.</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>VERIFY the name and address of the issuing Management Authority’s name and address. Check <a href="#">CITES National Contacts</a> (a directory of names and addresses of all the management authorities) to confirm the name and address matches the name and address listed in this block.</td>
</tr>
</tbody>
</table>
| 7 & 8                  | 1. VERIFY by review of the shipping documents and later by inspection of the commodity, that the scientific name of the commodity recorded on the CITES document matches the scientific name listed in Table 2-4.  
2. Under certain circumstances, higher taxon names in lieu of the species name may be permitted for Pre-Convention specimens (see 50CFR 23.23.(c)(13)). CONTACT your PPQ Botanist\(^1\) or National CITES Specialist\(^2\) through channels. |
| 9                      | VERIFY by review of the shipping documents and later by inspection of the commodity, that the description of the article matches the items being imported. |
| 10                     | 1. VERIFY the CITES Appendix number (of the species being imported) listed and found in Table 2-4 agrees with the Appendix number listed on the CITES document.  
2. VERIFY the source code for the specimen is correct (see [Figure 2-9 on page 2-101](#)). |
| 11                     | VERIFY the quantity entered agrees with the quantity declared on the accompanying shipping documents (see [Step 8: Verify the Quantities Are Authorized](#)) and by inspection of the commodity (see [Step 9: Inspect the Shipment](#)). |
| 13                     | 1. VERIFY the following are present: location (city, town, etc.) of the issuing office; date the document was issued; if used, a security stamp; original handwritten signature of a person authorized to sign for the Management Authority; and the embossed seal or ink stamp of the issuing Management Authority.  
2. VERIFY the date of issuance is either on or prior to the date of lading (date of export). This information can be found on the bill of lading or air waybill.  
3. If presented with a retrospectively-issued \(^3\) CITES document, then do not accept. CONTACT your PPQ Botanist\(^1\) or National CITES Specialist\(^2\) (see [Retrospective CITES Documents on page 2-103](#)). |
| 14                     | 1. VERIFY the quantity of specimens actually exported or re-exported is recorded in the same unit of measure as listed in [Block 11, Quantity](#) (standard CITES Permit or Certificate).  
2. VERIFY the validating stamp or seal and the signature of the inspecting authority at the time of export.  
3. If presented with a CITES document that lacks the export endorsement, then do not accept. CONTACT a PPQ Botanist\(^1\) or National CITES Specialist\(^2\). |
| 15                     | 1. VERIFY the number in this block matches the number of the bill of lading or air waybill accompanying the shipment.  
2. If a bill of lading or air waybill was not available at the time of export or re-export validation, then the number is not required to be recorded on the CITES document. |

---

\(^1\) CBP and PPQ: To locate the name, phone number, and address of the PPQ Botanist that services your port, see the [Lists of PPQ Identifiers and National Specialists](#).  
\(^2\) National CITES Specialist is Timothy Torbett. National CITES Coordinator is John Veremis. E-mail [timothy.j.torbett@usda.gov](mailto:timothy.j.torbett@usda.gov) or [john.veremis@usda.gov](mailto:john.veremis@usda.gov).  
\(^3\) A retrospectively-issued CITES document is one that was issued after the date the shipment was exported (date of lading).
The Management Authority must indicate on the CITES document the source code of the specimen. See the codes listed in Table 2-9.

</table>

If a CITES document is presented to you with any of the following conditions, then STOP processing the importation; place the shipment on HOLD; and contact the PPQ National CITES Specialist or the National CITES Coordinator for assistance:

- Contains false information
- Is altered or modified
- Is expired
- Is not complete (does not contain one or more of the items listed in Table 2-8)
- Is to replace a document that was lost, stolen, damaged, or destroyed (see Replacement CITES Documents on page 2-102)
- Is retrospectively-issued and you have not been notified by PPQ of a limited situation to authorize and accept the retrospectively-issued certificate (see Retrospective CITES Documents on page 2-103)

---

3 The National CITES Specialist is Timothy Torbett and the National CITES Coordinator is John Veremis. E-mail timothy.j.torbett@usda.gov or john.veremis@usda.gov.

4 The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time.
If the shipment does not meet all conditions stated on the CITES document, then do as follows:

1. STOP processing the importation.
2. Place the shipment on HOLD.
3. Contact the PPQ National CITES Specialist or National CITES Coordinator 5 for assistance.

If the CITES document and the shipment are acceptable, then continue to Step 7: Ensure the Protected Plant Permit Has Not Expired.

**Replacement CITES Documents**

Unless you were previously notified by PPQ Headquarters or a PPQ National CITES Specialist, then you must contact the PPQ Botanist 6 (through proper channels) to determine if you can accept a replacement document for the shipment.

Lost, damaged, stolen, or accidentally-destroyed CITES documents may be replaced by an issuing Management Authority. To replace a CITES document, a Management Authority may issue either a copy of the original or a re-issued original.

To accept a replacement document, the document must be issued in compliance with U.S. regulations.

The following provisions apply to the issuance and acceptance of a replacement CITES document, but do not apply to a document that has expired or that requires amendment:

1. The permittee must notify the issuing Management Authority that the document was lost, damaged, stolen, or accidentally destroyed.
2. The issuing Management Authority must be satisfied that the CITES document was lost, damaged, stolen, or accidentally destroyed.
3. The issuing Management Authority should immediately inform the Management Authority in the country of destination and, for commercial shipments, the Secretariat.
4. If the replacement CITES document is a copy, the copy must indicate that it is a “replacement” and a “true copy of the original,” contain a new dated original signature of a person authorized to sign CITES documents for the issuing Management Authority, and give the reason for replacement.

---

5 The National CITES Specialist is Timothy Torbett. National CITES Coordinator is John Veremis. E-mail timothy.j.torbett@usda.gov or john.veremis@usda.gov.

6 CBP and PPQ: To locate the name and phone number of your PPQ Botanist, see the Lists of PPQ Identifiers and National Specialists.
5. If the replacement CITES document is a newly-issued original document, then the new document must indicate that it is a “replacement,” include the number and date of issuance of the document being replaced, and give the reason for replacement.

**Retrospective CITES Documents**

A retrospective CITES document is one that was issued after the date the shipment was exported; the date the shipment left the country of origin or export (date of lading). Retrospective CITES documents may be issued and accepted only in certain limited situations to authorize an export or re-export after that activity has occurred, but before the shipment is cleared for import.

Unless you were previously notified by PPQ Headquarters or a PPQ Botanist of the action to take for the retrospective CITES document, then do not accept a retrospectively-issued CITES document. Contact your PPQ Botanist or PPQ National CITES Specialist (through proper channels) to request assistance with issues relating to the acceptance of retrospective documents.

Before an importer/exporter attempts to obtain a retrospective document, refer the importer/exporter to 50 CFR §23.53 to help the importer/exporter determine if the shipment meets the criteria for issuance and acceptance of a retrospective CITES document.

The following provisions apply to the issuance and acceptance of a retrospective CITES document:

1. Retrospective documents can only be issued after consultation between the Management Authorities in both the exporting or re-exporting country and the importing country, including a thorough investigation of circumstances and agreement between them that criteria pertaining to the issuance and acceptance of retrospective documents paragraph have been met.

2. The exporter or re-exporter and importer were not responsible for the irregularities that occurred and have demonstrated one of the following:
   
   A. (The Management Authority or officials designated to clear CITES shipments misinformed the exporter or re-exporter or the importer about the CITES requirements. In the United States, this would be an employee of APHIS or CBP (for plants).

   OR

---

7 CBP and PPQ: To locate the name, phone number, and address of your PPQ Botanist, see the List of PPQ Identifiers and National Specialists.
B. The Management Authority unintentionally made a technical error that was not prompted by information provided by the applicant when issuing the CITES document.

C. The issuing Management Authority must provide all of the following information on any retrospective CITES document:

- A statement that it was issued retrospectively;
- A statement specifying the reason for the issuance; and
- In the case of a document issued for personal use, a condition restricting the sale of the specimen within 6 months following the import of the specimen.

3. If the importing U.S. Management Authority has agreed to accept the retrospectively-issued CITES document, then a retrospective document may be one of the following:

A. An amended CITES document that can show that the issuing Management Authority made a technical error that was not prompted by the applicant.

B. A newly-issued CITES document that can show the applicant was misinformed by CITES officials or the circumstances in 50CFR §23.53(b)(5) (specimens for personal use) apply, and a shipment has occurred without a document.

4. In general, except when the exporter or re-export and import has demonstrated they were not responsible for the irregularities, any person who has been issued a CITES document in the past will not be eligible to receive a retrospective document.
Step 7: Ensure the Protected Plant Permit Has Not Expired

A USDA-APHIS ePermits issued Protected Plant Permit, is valid for two years from the date issued. The expiration date is specified on the permit.

All previously-issued PPQ Form 622, Protected Plant Permit have expired and are not valid.

Check the expiration date located in the upper right-hand corner of the Protected Plant Permit, and the permittee’s name.

Confirm PPP Valid or Apply for a PPP

Confirm the validity of the Protected Plant Permit as follows:

1. Check ePermits to see if the importer has a valid Protected Plant Permit (PPP).

2. If the importer does not have an ePermits-issued Protected Plant Permit and is not a repeat violator who has disregarded your instructions to secure a Protected Plant Permit, then do the following:
   A. Have the importer go to ePermits, and complete the application for a PPQ 621: Application for protected plant permit to engage in the business of importing, exporting or re-exporting terrestrial plants or plant products that are protected; or
   B. Give the importer PPQ Form 621, Application for a Protected Plant Permit to Engage in Business of Importing, Exporting to apply for a Protected Plant Permit.

Once you are satisfied that the importer has submitted the required application to the PPQ Permit Unit, then continue to process the importation.

NOTICE
If the importer is a repeat violator who has disregarded your instructions to secure a Protected Plant Permit, then go to Violations of USDA Regulations on page 4-3 before continuing in this section.
Step 8: Verify the Quantities Are Authorized

Review the entry paperwork accompanying the shipment to verify the quantity being imported corresponds with the quantity authorized on the CITES document (see Block 11 on the standard CITES form).

The unit of quantity listed on a CITES document will vary according to the type of article. A list of commodities and the corresponding unit of measure or quantity (as recommended by the Convention or commonly used on CITES documents) follows in Table 2-10 below.

Table 2-10  List of Commodities and Corresponding Units of Measure

<table>
<thead>
<tr>
<th>Commodity</th>
<th>Preferred Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dowels</td>
<td>Cubic meters (m³)</td>
</tr>
<tr>
<td>Logs</td>
<td>Cubic meters (m³) or board feet (bf)</td>
</tr>
<tr>
<td>Lumber</td>
<td>Cubic meters (m³) or board feet (bf)</td>
</tr>
<tr>
<td>Miscellaneous (furniture, pool cues, tool handles, and other similar manufactured items)</td>
<td>Cubic meters (m³), number (no.), or kilograms (kg)</td>
</tr>
<tr>
<td>Molding</td>
<td>Cubic meters (m³)</td>
</tr>
<tr>
<td>Musical instruments</td>
<td>Number (no.)</td>
</tr>
<tr>
<td>Plywood</td>
<td>Square meters (m²) or cubic meters (m³)</td>
</tr>
<tr>
<td>Veneer</td>
<td>Square meters (m²) or cubic meters (m³)</td>
</tr>
</tbody>
</table>

For articles that are being imported in quantities recorded in units of cubic meters, square meters, or board feet, review the dimensional specification sheets or dimensional inventory tally sheets to more accurately determine the quantity shipped. To verify that the dimensional calculations on the entry papers equal the total quantity recorded on the CITES document, you may need to convert from one unit of quantity to another. See Conversion Formulas

Continue to Step 9: Inspect the Shipment, to confirm the actual quantity shipped.
Step 9: Inspect the Shipment

In addition to inspecting for plant pests, physically inspect the shipment to assess the actual quantity being imported.

You may have to overcome the following difficulties in assessing the volume of material in the shipment:

◆ Accessibility of containerized cargo
◆ Bundles containing CITES-regulated material or timber are commingled with non-CITES material or timber
◆ Bundles of lumber or veneer consisting of boards or sheets of various sizes
◆ Enormity of the shipment
◆ Identity of the pallets comprising the shipment

To inspect a representative sample of the shipment, assess the quantity of the shipment, and review the invoice, packing list, or dimensional specification sheets accompanying the consignment. Then determine the quantity of the representative unit (such as box, bundle, carton, etc.) of the shipment to sample. Continue to Table 2-11 below.

Table 2-11 Determine the Quantity of a Representative Unit for Inspection

<table>
<thead>
<tr>
<th>If:</th>
<th>Then:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quantity recorded on the CITES document is by weight</td>
<td>VERIFY that the weight of the unit you chose to inspect matches the unit’s weight as listed on the invoice or packing list</td>
</tr>
<tr>
<td>Quantity recorded on the CITES document is by number of pieces</td>
<td>VERIFY that the number of pieces in the unit you chose to inspect matches the unit’s number of pieces as listed on the invoice or packing list</td>
</tr>
<tr>
<td>Quantity recorded on the CITES document is in cubic meters, square meters, or board feet</td>
<td>CONDUCT a dimensional piece count(^1) to verify that the quantity of the unit you chose to inspect matches the quantity listed for that unit on the invoice, packing list, or dimensional specification sheet</td>
</tr>
</tbody>
</table>
| Quantity found by your physical inspection of a representative sample does not match the quantity listed on the invoice, packing list, or dimensional specification sheet | 1. SELECT another representative unit for inspection  
2. REPEAT the procedures listed above to determine the extent of the discrepancy |

\(^1\) To perform a dimensional piece count, you must measure each piece in the inspectional unit either by length and width; or by length, width, and height (thickness) and then multiply the subtotal by the number of pieces in the unit to calculate the total quantity of the unit. See Conversion Formulas for assistance.

Continue to Table 2-12 on page 2-108 to determine the action to take based on your inspection.
## Table 2-12 Determine Action Based on Inspection Results

<table>

</tr>
</tbody>
</table>

1 CBP: To locate the name, phone number, and address of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.
Step 10: Cancel CITES Documents By Stamp and Endorsement

In addition to the original CITES document, the importer or the importer’s agent must give you two copies of the original. Never accept a poor quality copy or facsimile. Legible copies of the original CITES document are crucial. If the importer should choose to re-export all or part of the shipment in the future, then the exporter will need this document to prove that the timber or articles entered legally.

If the shipment and permits comply with CITES and U.S. import regulations, then cancel by stamp (to show the document has been used) and endorse as follows:

1. Stamp the front of the original CITES document with your DHS-CBP Agriculture Specialist’s "Action Authorized" stamp. This stamp must bear your port location.
2. Sign your name in ink, and write your badge number and the date you stamped the original CITES document.
3. Stamp and endorse (signature, badge number, date) the two legible copies of the original CITES document. Endorse the front of the copies the same as you endorse the original. Do not endorse the back of the copies.

NOTICE

Being able to read the quantity on the endorsed copies is imperative. Never cover critical fields of the CITES document with the DHS-CBP-Agriculture Specialist’s stamp.
Step 11: Distribute the CITES Documents
Distribute the CITES documents as follows:

1. Give one legible, canceled (stamped), endorsed copy of the original CITES document to the importer or the importer’s agent.

2. Send the original, endorsed CITES document to the following U.S. FWS Management Authority office:

   Robert Anderson
   U.S. Fish and Wildlife Service
   Division of Management Authority
   5275 Leesburg Pike, MS: IA
   Falls Church, VA 22041

3. Keep a copy of the canceled (stamped) and endorsed original CITES document(s) and place in your port files.

**NOTICE**

CITES files must be retained for five years. See Filing System on page 2-3 for directions to maintain a CITES file.

Immediate Exportation (IE) of CITES Appendix I, Appendix II, Appendix III Regulated Timber Species 3-88
Introduction

The Re-exportation of CITES Timber Species chapter provides the guidelines for handling the re-exportation of CITES Appendix I, Appendix II, and Appendix III regulated timber species. These guidelines are to be used for the following:

- Confirming that the commodity being re-exported is in a form which is regulated;
- Determining which permits and/or certificates are required for re-export;
- Verifying that the documents are valid;
- Inspecting the commodity to verify that the quantity in the re-export shipment matches the quantity listed on the CITES document;
- Instructing the user on how to validate a CITES document; and
- Distributing and filing the paperwork.

PPQ Plant Health Safeguarding Specialists (PHSS) and Export Certification Specialists should use the guidelines in this chapter in conjunction with the phytosanitary requirements of the country of final destination. (See the Export Program Manual and the Phytosanitary Export Database in PCIT for these requirements.)

---

**NOTICE**

A Federal Phytosanitary Certificate for Re-export for CITES Appendix I, Appendix II, or Appendix III Regulated Timber Species can **only** be issued at a designated port that is authorized to re-export CITES-regulated logs and lumber. Issuance of a Federal Phytosanitary Certificate for Re-export of CITES Appendix I, Appendix II, or Appendix III regulated timber is contingent upon compliance with all CITES requirements. Issue a Federal Phytosanitary Certificate for Re-export **only** if all CITES requirements have been satisfied.
Preparation

As with other port documents, copies of CITES documents must also be filed in an organized, consistent manner. The CITES files and copies maintained at your port are important in case the originals become lost or destroyed. An accessible filing system will also enable you to comply with requests for information made by other government and non-government agencies, and the general public through the Freedom of Information Act (FOIA).

Filing System

If you already have a filing system for retaining CITES records in place at your port, please review these instructions to be sure your system is functional. If you do not have a filing system in place, then follow the instructions on the next page.

To set up a filing system, do as follows:

1. Decide on the filing system that is most practical for your location. Select one of the following methods to keep the records complete and accessible:
   - File alphabetically by permittee’s name
   - File chronologically by month and year

2. Select the documents to be filed. At a minimum, you must file the following in the order listed below:
   A. CITES document (must be a validated copy)
   B. Dimensional specification sheets (if applicable)
   C. Invoice/packing list
   D. Lading bill or air waybill
   E. Phytosanitary Certificate (if required)

After you set up your filing system, you must maintain each file for a minimum of five years, counting from the date the re-exportation occurred.

EXAMPLE
A file must be maintained until January 24, 2017 for a re-exportation that occurred on January 24, 2012.
Re-exportation of CITES Timber Species

Procedures

The procedures for handling the re-exportation of CITES Appendix I, Appendix II, and Appendix III regulated timber species are summarized in Table 3-1.

Table 3-1 Summary of Procedures for Handling the Re-exportation of CITES Appendix I, Appendix II, and Appendix III Regulated Timber Species

| 1. | Confirm that the commodity is a CITES Appendix I, Appendix II, or Appendix III protected timber species. |
| 2. | Determine if the form of the commodity being re-exported is regulated by CITES. |
| 3. | Determine if you have the authority to validate the shipment for re-export. |
| 4. | Determine which CITES documents must accompany the shipment. |
| 5. | Collect all relevant documents associated with the re-exportation. |
| 6. | Verify that the CITES document accompanying the re-exportation is authentic and acceptable. |
| 7. | Verify that the USDA-APHIS Protected Plant Permit, has not expired. |
| 8. | Compare shipping documents with CITES documents to confirm quantities are authorized. |
| 9. | Inspect the shipment to make sure quantities are authorized. |
| 10. | If the shipment is in order, then validate the CITES documents by stamp and endorsement. |
| 11. | Distribute and file the endorsed documents. |

FWS-USDA-CITES Clearance of Musical Instruments

The agreement between the U.S. Fish and Wildlife Service (FWS) and USDA, for the clearance of musical instruments made of non-living CITES plant material and CITES or non-CITES wildlife for export is as follows:

FWS Wildlife Inspectors can inspect and clear, including validation of CITES documents, shipments of products containing both CITES listed non-living plant species and any wildlife species (fauna/animal) that may be either CITES or non-CITES.

This guidance applies only to shipments of articles that contain both CITES listed non-living plants and CITES or non-CITES non-living wildlife.

See U.S. Fish and Wildlife Service online guidance and the published letter on page A-19, as well as at CITES.org for more information on products containing both CITES-listed plants and CITES listed or non-CITES listed wildlife.
CITES Contacts

Some circumstances are identified in this chapter as requiring contacting the PPQ Botanist that services your port, and others require contacting the National CITES Specialist or the National CITES Coordinator.

If after reading the procedures in this chapter, PPQ Officers still have a CITES-related question regarding a shipment, then first contact the PPQ Botanist that services your port.

If the PPQ Botanist is not available or is unable to answer your question, then contact the National CITES Specialist, Timothy Torbett, timothy.j.torbett@usda.gov or the National CITES Coordinator, John Veremis, john.veremis@usda.gov. Include your name, phone number, and e-mail address when contacting the National CITES Specialist or the National CITES Coordinator.

**NOTICE**

The person making a CITES-related inquiry should include his or her name, phone number, and e-mail address so that the CITES Specialist or CITES Coordinator is able to reply or obtain additional details.

Continue on to the steps below when handling the re-exportation of CITES Appendix I, Appendix II, and Appendix III regulated timber species used for lumber or other wood products.
Step 1: Confirm the Identity of Timber or Articles
Currently, there are 6 CITES Appendix I species, 26 CITES Appendix II taxa (21 species and 5 genera), and 7 CITES Appendix III species used for lumber or other wood products.

The most frequently used common names (if any) are shown beside each scientific name. For a list of other common names, see CITES Timber Species Common Names on page 7-1.

Appendix I Timber Species
The CITES Appendix I regulated timber species are as follows:

- *Abies guatemalensis* (Guatemalan fir)
- *Araucaria araucana* (monkey puzzle tree)
- *Dalbergia nigra* (Brazilian rosewood)
- *Fitzroya cupressoides* (alerce)
- *Pilgerodendron uviferum* (pilgerodendron)
- *Podocarpus parlatorei* (Palatore’s podocarp)
Appendix II Timber Species
The CITES Appendix II regulated timber species or genera are as follows:

- *Adansonia grandidieri* (giant boabab)
- *Afzelia* spp. (pod mahogany)
- *Aniba rosaedora* (Brazilian rosewood)
- *Bulnesia sarmientoi* (gaiacwood)
- *Caryocar costaricense* (ajillo)
- *Cedrela* spp.
- *Dalbergia* spp. (rosewoods) *(except* *Dalbergia nigra* (Brazilian rosewood)
- *Diospyros* spp. (ebonies)
- *Gonystylus* spp. (ramin)
- *Guaiacum* spp. (lignum vitae)
- *Guibourtia demeusei* (red bubinga)
- *Guibourtia pellegriniana* (rose bubinga)
- *Guibourtia tessmannii* (rose bubinga)
- *Khaya* spp. (African mahogany)
- *Oreomunnea pterocarpa* (gavilan)
- *Osyris lanceolata* (African sandalwood)
- *Paubrasilia echinata* (Brazilwood)
- *Pericopsis elata* (afromosia)
- *Platymiscium pleiostachyum* (cristobal, granadillo)
- *Prunus africana* (African cherry, pygeum)
- *Pterocarpus* spp. (African rosewood, red sandalwood)
- *Senna meridionalis* (taraby)
- *Swietenia humilis* (Pacific Coast mahogany)
- *Swietenia macrophylla* (bigleaf mahogany)
- *Swietenia mahogani* (Caribbean mahogany)
- *Widdringtonia whytei* (Mulanje-cedar)

**NOTICE**
FWS Wildlife Inspectors can inspect and clear shipments of products containing both CITES listed non-living plant species and any wildlife species that may be either CITES or non-CITES listed species. This guidance **only** applies to shipments that contain **both** CITES listed plants and **wildlife**. See the FWS notice on page A-19.
Appendix III Timber Species
The CITES Appendix III regulated timber species are as follows:

- *Dipteryx panamensis* (almendro)
- *Fraxinus mandshurica* (manchurian ash)
- *Magnolia liliifera* var. obovata (magnolia)
- *Pinus koraiensis* (Korean pine)
- *Podocarpus neriifolius* (podocarp)
- *Quercus mongolica* (mongolian oak)
- *Tetracentron sinense* (tetracentron)
Review the Shipping Documents

To confirm that the re-exportation is of a CITES Appendix I, Appendix II, or Appendix III timber species, review the shipping documents. Regulations require CITES plants be identified to their genus and species by one of the following:

- Label
- Invoice
- Packing list
- Tag
- Other document accompanying the shipment

The exporter or the exporter’s agent is responsible for providing you with the scientific name of the timber species traded. CITES regulated timber may be manifested or invoiced by a trade name or a local name. If you are given a common name or synonym that is not listed in the List of Common Names for CITES Appendix I, Appendix II, and Appendix III Timber Species on page 7-1, and you want to confirm the scientific name of the material being re-exported to determine if the wood is listed as regulated, then search the Checklist of CITES species database on the CITES web site.

Checklist of CITES Species Database

Use the new Checklist of CITES Species database to do the following:

- Generate an Index of CITES Species (an alphabetical list of all plant taxa (and animal taxa) currently included in the CITES Appendixes)
- Search and view by CITES Appendix listing
- Search and view by common name (refer to the main record)
- Search and view by country
- Search and view by scientific name (main records and contain all information)
- Search and view by scientific synonym (refer to the main record)
- Provide a history of CITES Listings (an historical record of all CITES listings since 1975, including all reservations and annotations)

**NOTICE**

The Checklist of CITES species database does not include all common names and synonyms for CITES-regulated species.
CITES Timber Species Recognition and Wood Identification
For timber species commodity recognition and a synopsis of wood identification, see Wood Identification on page E-1. For detailed instructions on how to identify wood of CITES regulated species, see the CITES Identification Guide—Tropical Woods guide.
Urgent Interception Identification

If after inspecting the wood or articles and reviewing the entry paperwork, you are still unable to determine the identity of the wood or articles, or suspect or question that the article is not as identified on the manifest or invoice, then do as follows:

1. Contact the PPQ Botanist that services your port to determine if taking a sample of the wood is necessary.
2. You may be directed (by the PPQ Botanist), to sample the commodity and send the sample to either a PPQ Area Identifier specializing in CITES wood identification, or to the Forest Products Laboratory.
3. Complete PPQ Form 309A, Interception Record, for URGENT interceptions, and assign a Port Reference Number for each specimen.
4. Enclose the specimen(s) and interception form(s) in an escape-proof package. Affix black and yellow tape to the outside of the package, and ship using an overnight delivery service with tracking capacity.
5. If you have been instructed to send the interception(s) to a PPQ Area Identifier specializing in CITES wood identification, then see Table 3-2.

<table>
<thead>
<tr>
<th>Area</th>
<th>PPQ Identifier Specializing in CITES Wood Identification</th>

<td>310/955-3346</td>
</tr>
</tbody>
</table>

6. If you are instructed by the PPQ Area Identifier (specializing in CITES wood identification), to send the interception directly to the Forest Products Laboratory, then follow the packaging directions above and send the package to the following address:

**USDA-Forest Products Laboratory**
Attn: Alex C. Wiedenhoeft or Michael Wiemann
One Gifford Pinchot Drive
Madison, WI 53726-2398

Phone: 608/231-9384 (Alex) or 608/231-9258 (Michael)

1 PPQ to locate the name and phone number of your PPQ Botanist, see the List of Identifiers, Co-lateral, and National Specialists.
Step 2: Confirm the Article Being Re-exported Is Protected
CITES annotates some of the listed timber species to include or exclude certain parts and derivatives.

To confirm that the listed article being re-exported is regulated by CITES Appendix I, Appendix II, or Appendix III, inspect the consignment and verify the description of the commodity on the accompanying shipping documents. Then continue to Table 3-3.

NOTICE
Other woody species and species that simulate the growth characteristics of wood species (such as cycads and palms) used solely for medicinal purposes or herbal medicines or as horticultural specimens are **not** covered in this manual. See the Wood and Wood Byproducts section of the Agricultural Commodity and Import Requirements database.

</table>

1. Includes building material, cabinetworking material, charcoal, firewood, flooring, food containers, fuel wood, furniture, joinery, light construction material, matches, particleboard, plywood, pulp/paper products, roof shingles, and veneer, etc.
2. Includes construction material, flooring, furniture, joinery, plywood, pulp railroad ties, and vehicle parts, etc.
3. Includes railroad ties, etc.
4. Ten (10) kilograms (kg) per shipment, the 10 kg limit should be interpreted as referring to the weight of the individual portions of each item in the shipment made of wood of the species concerned. In other words, the 10 kg limit is to be assessed against the weight of the individual portions of wood of Dalbergia or Guibortia species contained in each item of the shipment, rather than against the total weight of the shipment.
5. Includes agricultural implements, bearings and bushings, barge and dock fenders, boat construction articles, chemical derivatives, cogs and shafts, cross ties, fishing rods, flooring, furniture, heavy construction and pulp mill equipment, railroad ties, sporting goods, tool handles, turnery, and veneer, etc.
6. Includes agricultural implements, boat building materials (general), boat masts, boxes and crates, cabinetworking materials, carvings, cigar boxes, construction materials, cooperages, flooring, food containers, fuel wood, furniture, furniture components, joinery, mathematical instruments, mine timbers, musical instruments, particleboard, pencils, piling, plywood, poles, pulp/paper products, shakes, shingles, sporting goods, toys, and vats, etc.
7. Includes brush backs, building materials, ceilings, counter tops, door frames, dowels, flooring, furniture, joinery, mouldings, nonstriking handles (such as brooms and umbrellas), paneling, picture frames, plywood, pool cues and racks, rulers, shoji screens, stair treads, stringers, tool handles, toys, traps, tripods, turnery, venetian blinds, window blinds, and window frames, etc.
8. *Guaiacum* spp. products include: bearings and bushings, boat building materials (general), brush backs and handles, bush blocks, farm vehicles, furniture, golf club heads, machinery parts, marine construction material, mathematical instruments, naval architecture, pulley sheaves, railroad ties, shade rollers, sporting goods, tables, textile equipment, turnery, and wheels, etc. Regulating depends on whether or not they are finished products and packaged and ready for retail trade.
9. Trade in this species is rare. If you encounter a regulated article made of this species, then contact the Manuals Unit at 240-529-0357 to add the article to this list.
10. Includes a variety of uses within the species’ natural range. If you encounter a regulated article made of this species, then contact the Manuals Unit to add the article to this list.
11. Transformed wood: Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planned, sanded or end-jointed (as defined by HS code 44.09):
12. Includes flooring, furniture, posts, and timber, etc. (Wood is noted for its longevity in moist environments.)
13. Includes furniture, musical instruments, timber, and veneer, etc.
14. Trade in this species is rare. If you encounter a regulated article made of this species, then contact the Manuals Unit to add the article to this list.
15. Includes timber.
16. Wood chips: Wood that has been reduced to small pieces.
17. The Neotropics include the Caribbean, Central America, Mexico, and South America.
18. Plywood: Consisting of three or more sheets of wood glued and pressed one on the other and generally disposed so that the grains of successive layers are at an angle (HS Code 44.12.13, HS Code 44.12.14, and HS Code 44.12.22). See Appendix D, Harmonized System of the World.
Re-exportation of CITES Timber Species

Procedures

19 Trade in this species is rare. If you encounter a regulated article made of this species, then contact the Manuals Unit to add the article to this list.

20 Includes furniture, musical instruments, timber, and veneer, etc.
Step 3: Determine Your Authority

If you are not certain that your port is designated for the re-exportation of CITES regulated timber, then check the appropriate designated CITES ports list. See Designated CITES Ports and Plant Inspection Stations CITES Staff on page 5-1 to confirm.

If you are located at a CITES-designated port, then continue to Step 4: Determine Which Documents Are Needed.

If you are not located at a CITES-designated port, then you are not authorized to certify the CITES re-export shipment. Provide the re-exporter with the option of having the owner or owner’s agent arrange to move the shipment to a designated port (at the owner’s expense), and give the name and location of the port. Notify the designated port of the pending arrival.

NOTICE

50 CFR §24 lists the log and lumber ports as designated only for the importation of CITES regulated timber species. The CFR will eventually be amended to include exportation and re-exportation. In the interim, all ports approved for the importation of logs and lumber are also approved for the exportation and re-exportation of CITES regulated timber species.

Continue to Step 4: Determine Which Documents Are Needed on page 3-32.
Step 4: Determine Which Documents Are Needed

To determine which documents are needed for the legal re-exportation of CITES regulated timber, use the appropriate table as follows:

- CITES Appendix I, see Table 3-4
- CITES Appendix II, see Table 3-5
- CITES Appendix III, see Table 3-6

**NOTICE**

In addition to any CITES re-export documents listed as required in this manual, a Federal Phytosanitary Certificate may also be required. Refer to the Export Program Manual and EXCERPT.

**Required Documents for Re-exportation of Appendix I Timber Species**

The re-exportation of CITES Appendix I timber species is permitted when presented with the appropriate CITES documentation for the following categories of trade:

- Articles derived from trees cut in the wild for non-commercial use (when presented with a USFWS-issued CITES Re-export Certificate and a CITES Import Permit)
- Articles derived from plantation-grown trees (when presented with a USFWS-issued CITES Re-export Certificate designating either source code A for artificially-propagated material being traded for non-commercial purposes; or source code D for artificially-propagated material being traded for commercial purposes)
- Articles acquired prior to the date the Convention listed the species (when presented with a USFWS-issued CITES Other Certificate designating Pre-Convention specimens; and designating the date of acquisition or certification that the specimens were acquired before the date first included in the CITES appendices)

**NOTICE**

Commercial trade in CITES Appendix I species originating from the wild is prohibited.

See Table 3-4 on page 3-33 to determine which documents are required for the re-export of CITES Appendix I regulated timber species.

### NOTICE

A Federal Phytosanitary Certificate for Re-export of CITES Appendix I, Appendix II, or Appendix III regulated timber species can **only** be issued at a designated port that is authorized to re-export CITES regulated logs and lumber. Issuance of a Federal Phytosanitary Certificate for Re-export of CITES Appendix I, Appendix II, or Appendix III timber species is contingent upon compliance with all CITES requirements. Issue the Federal Phytosanitary Certificate for Re-export **only** if all CITES requirements have been satisfied. See the Export Certification Manual (XPM) and PCIT.

1. **Lacks** the required CITES document
   - PLACE the shipment on HOLD
   - GO to Violations, Seizures, and Forfeitures on page 4-1

2. **Lacks** a Protected Plant Permit
   - ALLOW the exporter to apply for a Protected Plant Permit (see Confirm PPP Valid or Apply for a PPP on page 3-75)

3. **Has an expired Protected Plant Permit**
4. **Is not engaged in commercial business**
   - GO to page 3-34

</tbody>
</table>

1. *Engaged in commercial business* is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.

2. *Commercial trade in CITES Appendix I species originating in the wild is prohibited.*

3. If Block 5, *Special Conditions*, of the USFWS-issued CITES Re-export Certificate so states, then a CBP/PPQ validated copy of the CITES Export Permit or Certificate issued by the Management Authority in the country of origin is required to be attached (to the USFWS-issued CITES Re-export Certificate).

4. USFWS-DMA is phasing in the issuance of CITES permits and certificates on security paper. The original *must* accompany the shipment. If the permittee intends to export once, then the permittee will be issued a single original certificate. If the permittee intends to export more than one shipment, then the permittee will be issued multiple originals.
Required Documents for Re-exportation of Appendix II Timber Species

The re-exportation of CITES Appendix II timber species is permitted when presented with the appropriate CITES documentation for the following categories of trade:

◆ Articles derived from trees cut in the wild
  (when presented with a USFWS-issued CITES Re-export Certificate)

◆ Articles derived from plantation-grown trees
  (when presented with a USFWS-issued CITES Re-export Certificate
   designating source code A for artificial propagation)

◆ Articles acquired prior to the date the CITES Convention listed the species
  (when presented with a USFWS-issued CITES Other Certificate
   designating Pre-Convention specimens; and designating the date of
   acquisition or certification that the specimens were acquired before the
   date first included in the CITES appendices)

See Table 3-5 on page 3-36 to determine which documents are required for the re-exportation of CITES Appendix II regulated timber species.

**NOTICE**

In addition to any CITES Re-export documents listed as required in this manual, a Federal Phytosanitary Certificate may also be required (see the Export Program Manual (XPM) and PCIT). A Federal Phytosanitary Certificate for Re-export of CITES regulated timber species can only be issued at a designated port that is authorized to re-export CITES regulated logs and lumber (see Designated CITES Ports and Plant Inspection Stations CITES Staff on page 5-1). Issuance of a Federal Phytosanitary Certificate for Re-export is contingent upon compliance with all CITES requirements; issue only if all CITES requirements have been satisfied.

1. Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.
2. If Block 5, Special Conditions, of the USFWS-issued CITES Certificate so states, then a CBP/PPQ validated copy of the CITES Export Permit or Certificate issued by the Management Authority in the country of origin is required to be attached (to the USFWS-issued CITES Certificate).
3. The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time.
4. Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.
5. If Block 5, Special Conditions, of the USFWS-issued CITES Certificate so states, then a CBP/PPQ validated copy of the CITES Export Permit or Certificate issued by the Management Authority in the country of origin is required to be attached (to the USFWS-issued CITES Certificate).
6. The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time.
7 PPQ to locate the name, phone, and address of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.

8 Listed by the Convention to include *Swietenia macrophylla* (bigleaf mahogany) populations of the Neotropics only. *Swietenia macrophylla* populations cut in any other country are not regulated by CITES.

9 The Neotropics includes the Caribbean, Central America, Mexico, and South America.
Required Documents for Re-exportation of Appendix III Timber Species

The re-exportation of CITES Appendix III timber species is permitted when presented with the appropriate documentation for the following categories of trade:

◆ Articles derived from trees cut in the wild
  (when presented with a USFWS-issued *CITES Re-export Certificate*)

◆ Articles derived from plantation-grown trees
  (when presented with a USFWS-issued *CITES Re-export Certificate*
   designating source code A for Artificial Propagation)

◆ Articles acquired prior to the date the CITES Convention listed the species
  (when presented with a USFWS-issued *CITES Other Certificate*
   designating Pre-Convention specimens; and designating the date of acquisition or certification the specimens were acquired before being the date first included in the CITES appendices)

See Table 3-6 to determine which documents are required for the re-exportation of CITES Appendix III timber species.
Table 3-6 Determine Documents Needed for the Re-exportation of CITES Appendix III Regulated Timber Species

<table>
<thead>
<tr>
<th>If the timber species is:</th>

</tr>
</thead>
</table>

**NOTICE**

In addition to any CITES Re-export documents listed as required in this manual, a Federal Phytosanitary Certificate may also be required. See the Export Program Manual (XPM) and PCIT. A Federal Phytosanitary Certificate for Re-export of CITES protected timber species can only be issued at a designated port that is authorized to export CITES regulated logs and lumber and is contingent upon compliance with all CITES requirements. Issue a Federal Phytosanitary Certificate only if all CITES entry requirements have been satisfied.

</table>

1. Engaged in commercial business is defined as trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood for gain or profit.

2. The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time.
Step 5: Collect the Documents Associated with the Shipment

Check to see if *Block 5, Special Conditions*, of the USFWS-issued CITES Re-export Certificate or Other Certificate requires that the permittee attach a copy of the CITES Export Permit or Certificate issued by the Management Authority in the country of origin. If so, then as part of the re-export validation process, you *must* verify that the CITES Appendix I, Appendix II, or Appendix III regulated timber or articles were originally legally imported into the U.S.

The permittee *must* provide you with a legible copy of a valid foreign CITES Export Permit or Certificate that was previously endorsed (stamped, released, signed, and dated by a PPQ Plant Health Safeguarding Specialist or PPQ Export Certification Specialist) at the CITES-designated port where the shipment was originally imported.

**NOTICE**

In addition to any CITES re-export documents listed as required in this manual, a Federal Phytosanitary Certificate may also be required. See the *Export Program Manual (XPM)* and PCIT.

**NOTICE**

A Federal Phytosanitary Certificate for Re-export of CITES regulated timber species can only be issued at a designated port that is authorized to re-export CITES-regulated logs and lumber. Issuance of a Federal Phytosanitary Certificate for Re-export of CITES Appendix I, Appendix II, or Appendix III regulated timber is contingent upon compliance with all CITES requirements Issue a Federal Phytosanitary Certificate for Re-export only if all CITES requirements have been satisfied.

Collect the following valid documents associated with the shipment:

- CITES Re-export Certificate or CITES Other Certificate (FWS Form 3-201A) issued by U.S. Fish & Wildlife Service-Division of Management Authority (USFWS-DMA);
- If the condition in *Block 5, Special Conditions* of the USFWS-issued CITES Certificate so states, then the permittee *must* provide you with a legible copy of a valid foreign CITES Export Permit or Certificate that was previously endorsed (stamped, released, signed, and dated by a PPQ Plant Health Safeguarding Specialist or PPQ Export Certification Specialist) at the CITES-designated port where the shipment was originally imported;
- If the re-exporter is engaged in a commercial business, a copy of the USDA-APHIS ePermits-issued *Protected Plant Permit*, for the re-exporter to engage in the commercial trade of CITES listed plants (see *Protected Plant Permit* on page A-27). If the re-exporter does not have a
permit, you may allow the re-exporter to apply for one (see Step 6: Ensure the Documents Have Not Expired on page 3-75; and follow the directions for allowing the re-exporter to apply for a new Protected Plant Permit); and

◆ Cargo paperwork associated with the shipment (such as bill of lading, air waybill, invoice, and dimensional specification sheets\(^2\)).

\(^2\) Dimensional specification sheets (or dimensional tally inventory sheets) are used for articles that are imported in quantities expressed in cubic meters, square meters, or board feet, and inventory the size of each piece of lumber or veneer in each bundle shipped. Usually there will be more than one dimensional inventory sheet with each shipment.
Step 6: Ensure the Documents Have Not Expired

The USDA-APHIS ePermits Protected Plant Permit is valid for two years from the date issued. The expiration date is specified on the permit.

To verify that the documents have not expired, check the upper right-hand corner of the USDA-issued Protected Plant Permit, and Block 2 of the CITES Re-export Certificate or CITES Other Certificate.

The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time.

Confirm PPP Valid or Apply for a PPP

A new application is required for both first-time applicants and upon expiration of the currently-held Protected Plant Permit.

1. Check ePermits to see if the exporter or re-exporter has a valid Protected Plant Permit.

   **NOTICE**
   
   If the exporter is a repeat violator who has disregarded your instructions to secure a Protected Plant Permit, then see Violations, Seizures, and Forfeitures on page 4-1 before continuing in this section.

2. If the exporter or re-exporter does not have a Protected Plant Permit and is not a repeat violator or if the permit is missing or expired, then do the following:
   A. Give the importer PPQ Form 621, Application for Protected Plant Permit to Engage in Business of Importing, Exporting, or Re-exporting... to apply for a Protected Plant Permit or go to ePermits.
   B. Have the exporter complete the application.

3. Collect a check from the importer for $70, made payable to “Plant Protection and Quarantine”.

4. Mail the completed PPQ Form 621 application along with the $70 check to the following address:

   **USDA-APHIS-PPQ**
   PPQ Permit Unit
   4700 River Road, Unit 136
   Riverdale, MD 20737-1236

5. Once you are satisfied that the exporter or re-exporter has submitted the required application and fee, then continue to Renewal of an Expired CITES Re-export Certificate.
Renewal of an Expired CITES Re-export Certificate
If the CITES Re-export Certificate has expired, then stop processing the re-export. Have the permittee contact the following to have the permittee’s CITES Re-export Certificate or Other Certificate reissued:

Robert Anderson  
**U.S. Fish and Wildlife Service**  
Division of Management Authority  
5275 Leesburg Pike, MS: IA  
Falls Church, VA 22041
Step 7: Confirm the Legal Importation

Confirm the articles have been legally imported. If the CITES Re-export Certificate, Block 5, Special Conditions, requires the permittee to attach a validated and endorsed (CBP-AS stamped) copy of the CITES Export Permit or Certificate from the country of origin ³ or the country of last re-export, then confirm a legible, validated, endorsed copy is attached.

If the copy of the CITES Export Permit or Re-export Certificate presented to you is illegible or does not bear the stamp and signature of CBP-AS, then request the permittee or broker provide you with a legible, validated, endorsed copy.

If a legible, validated and endorsed copy of the export permit or re-export certificate is not provided or if you learn the importation is illegal, then the shipment may be subject to forfeiture. Contact a PPQ Botanist ⁴ for assistance.

---

³ The country where the article originated.
⁴ PPQ to identify the name of the Botanist that services your port, see Appendix C in the Plant Inspection Stations Manual.
Step 8: Verify the CITES Re-export Certificate Is Authentic and Acceptable

Compare the CITES document accompanying the shipment to the official examples of USFWS-issued documents (see page A-15 through page A-18).

**NOTICE**

Do not accept a CITES Re-export Certificate that is altered, modified, or crossed-out unless the modification or crossing out has been authenticated by the stamp and signature of the authority issuing the document.

If you are presented with an altered or questionable CITES Re-export Certificate, then place the shipment on HOLD and contact your PPQ Botanist for assistance.

See the instructions in Table 3-7 to determine if the CITES document for re-export is valid. Table 3-7 is a summary of the information required on a CITES Permit or Certificate and does not cover extra information required on the specific types of documents. Complete coverage of this information can be found in 50 CFR §23.23(e).
Table 3-7 Instructions for Export or Re-export Verification of CITES Permits or Certificates Issued by USFWS

<table>
<thead>
<tr>
<th>Block</th>
<th>Information entered by</th>
<th>Instructions</th>
</tr>
</thead>
</table>
| EXPORT PERMIT | Division of Management Authority (DMA) | 1. VERIFY the type of CITES document presented (Export Permit, Re-export Certificate, or Other Certificate) corresponds with the category of trade  
2. If the CITES document is marked "Other Certificate", then the document must indicate the type of certificate (see Block 9), such as "Certificate of Artificial Propagation" (for plantation-grown trees); "Certificate of Origin"; or "Pre-Convention Certificate) |
| RE-EXPORT CERTIFICATE | | |
| OTHER CERTIFICATE | | |
| Page ___ of ____ | DMA | VERIFY the total number of document pages are presented to you for export validation |
| 1 | Original Permit/Certificate No. | DMA | VERIFY the certificate or permit number listed on the first page matches the certificate or permit number listed all subsequent pages of the document (such as continuation sheets and/or inventory sheets) |
| 2 | Valid until | DMA | VERIFY the certificate has not expired. A CITES Re-export Certificate is valid for 6 months from the date of issuance. The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time. |
| 3 | Permittee (name and address, country) | DMA | VERIFY the permittee’s name and address matches the exporter’s name and address declared on the accompanying shipping documents (bill of lading air waybill, booking confirmation document, etc.)  
CITES permits/certificates are not transferable; therefore the name and address of the exporter or re-exporter declared on the shipping document s must match the permittee’s name and address |
| 4 | Consignee (name and address, country) | Permittee (for partially completed documents; see Block 5) or DMA (for DMA-completed documents) | VERIFY the consignee’s name and address matches the information listed on the accompanying shipping documents (bill of lading, air waybill, booking confirmation, etc.) |

NOTICE
Accept a CITES document only if all the following information is complete and accurate.

<th>Instructions</th>
</tr>
</thead>
</table>
| 11    | Quantity (including units) Permittee (for partially completed documents; see Block 5) or DMA (for DMA-completed documents) | 1. VERIFY the quantity listed agrees with the quantity declared on the invoice and cargo papers accompanying the shipping documents  
2. If Block 5, Special Conditions, directs the permittee to use a specific unit of quantity, or if Block 9, Description of Specimens, denotes the unit of quantity in the description of the commodity, then VERIFY that the specified unit of quantity is also in this block (11)  
3. If the accompanying paperwork declares quantities other than directed, then see Conversion Formulas  
4. If the instructions in Block 5 direct the permittee to attach a copy of the CITES document used to import the commodity, then COMPARE the quantity listed in this block with the quantity listed on the attached foreign CITES document  
5. If the quantity listed in this block exceeds the quantity listed on the attached foreign CITES document, then STOP processing the shipment and give the permittee the opportunity to remove excess material and present you with an new CITES Re-export Certificate |
| 12    | Country of Origin Permit/Certificate No. Date of Issue Permittee (for partially completed documents; see Block 5) or DMA (for DMA-completed documents) | If Block 5, Special Conditions, requires a copy of the foreign CITES import document be attached, then VERIFY the country of origin, the permit or certificate number, and the date of issuance on the attached document coincides with the information recorded in this block |
| 13    | Export/Re-export Endorsement: PPQ | ENTER the total quantities of specimens being exported/re-exported in this block (See Block 7 to obtain the quantity) |
| 14    | Bill of Lading/Air Waybill Number Port of Exportation/Re-exportation Total No. of Shipping Containers PPQ | ENTER the bill of lading/air waybill number (if available); port of exportation or re-exportation and total number of shipping containers |
| 15    | This document valid only with inspection official’s ORIGINAL stamp, signature and date in this block PPQ | STAMP with your original stamp, sign, and date |

**NOTICE**

The quantity listed in Block 11 must not exceed the quantity listed on the attached foreign CITES document. If this occurs, then STOP processing the shipment.
CITES Re-export Certificate with Incomplete or Inaccurate Information

If a CITES Re-export Certificate is presented to you with incomplete or inaccurate information or the document has expired 5, then STOP processing the re-exportation. Place the shipment on HOLD and contact your PPQ Botanist 6 for assistance.

If the CITES document is acceptable, then continue to Step 9: Inspect the Shipment.

---

5 The validity of a CITES document expires at midnight (local time at the place of presentation) on the date indicated on the document. All activities, including but not limited to transport and presentation for import must be completed before that time.

6 To identify the name of the PPQ Botanist that services your port, see the List of Identifiers in the Plant Inspection Stations Manual.
Step 9: Inspect the Shipment

Inspect the shipment to assess the actual quantity of material being re-exported. You may have to overcome the following difficulties in assessing the volume of material being shipped:

- Accessibility of containerized cargo;
- Bundles of lumber consisting of boards or sheets of various sizes;
- Enormity of the shipment; and
- Identity of the pallets comprising the shipment.

When the size of commercial shipments makes impossible the inspection of the entire consignment to assess its quantity, then review the invoice, packing list, or dimensional specification sheets accompanying the consignment and determine the quantity of a representative unit (such as box, bundle, carton, etc.), for the shipment. Continue to Table 3-8 below.

<table>
<thead>
<tr>
<th>If:</th>
<th>Then:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quantity recorded on the USFWS-issued CITES</td>
<td>VERIFY that the weight of the unit you chose to inspect matches</td>
</tr>
<tr>
<td>document is by weight</td>
<td>the unit’s weight as listed on the invoice or packing list</td>
</tr>
<tr>
<td>Quantity recorded on the USFWS-issued CITES</td>
<td>VERIFY that the number of pieces in the unit you chose to</td>
</tr>
<tr>
<td>document is by number of pieces</td>
<td>inspect matches the unit’s number of pieces as listed on the</td>
</tr>
<tr>
<td></td>
<td>invoice or packing list</td>
</tr>
<tr>
<td>Quantity recorded on the USFWS-issued CITES</td>
<td>CONDUCT a dimensional piece count (^1) to VERIFY the quantity</td>
</tr>
<tr>
<td>document is in cubic meters, square meters,</td>
<td>of the unit you chose to inspect matches the quantity listed for</td>
</tr>
<tr>
<td>or board feet</td>
<td>that unit on the invoice, packing list, or dimensional specification</td>
</tr>
<tr>
<td></td>
<td>sheet</td>
</tr>
<tr>
<td>Quantity as found by your physical inspection</td>
<td>1. SELECT another representative sample to inspect</td>
</tr>
<tr>
<td>of a representative sample does not match</td>
<td>2. REPEAT the procedures listed above to determine the extent of</td>
</tr>
<tr>
<td>the quantity listed on the invoice, packing</td>
<td>the overage</td>
</tr>
<tr>
<td>list, or dimensional specification sheet</td>
<td></td>
</tr>
</tbody>
</table>

\(^1\) To perform a dimensional piece count, you **must** measure each piece in the inspectional unit either by length and width; or by length, width, and height (thickness); and then multiply the subtotal by the number of pieces in the unit to calculate the total quantity of the unit. See Appendix C, *Conversion Formulas* for assistance.

Continue to Table 3-9 to determine the action to take based on your inspection.
Table 3-9 Determine the Action Based on the Inspection Results

<thead>
<tr>
<th>If your inspection confirms:</th>
<th>Then:</th>
</tr>
</thead>
</table>
| Exporter or re-exporter deliberately attempted to mislead you or concealed unauthorized articles | 1. In addition to seizure and forfeiture of the shipment, the importer may be subject to civil or criminal penalties. COMPLETE CITES Standard CITES Form (see Appendix A instructions) to document the violation  
2. CONTACT a PPQ Botanist¹ to report the violation                      |
| Quantity is equal to or less than the quantity listed on the USFWS-issued CITES Certificate | CONTINUE to Step 10: Validate the CITES Documents By Stamp and Endorsement |
| Quantity in excess of the quantity listed on the USFWS-issued CITES Certificate | 1. Shipment is in violation of CITES Regulations and is subject to seizure and forfeiture. SEE Violations, Seizures, and Forfeitures for forfeiture procedures  
2. CONTACT a PPQ Botanist for assistance with forfeiture procedures       |
| Unauthorized articles (CITES regulated articles that are not recorded on the CITES document) | 1. Shipment is in violation of CITES Regulations and is subject to seizure and forfeiture. SEE Violations, Seizures, and Forfeitures  
2. forfeiture procedures  
3. CONTACT a PPQ Botanist for assistance with forfeiture procedures       |

¹ PPQ to identify the PPQ Botanist that services your port, see Appendix C in the Plant Inspection Stations Manual.
Step 10: Validate the CITES Documents By Stamp and Endorsement

The CITES Re-export Certificate is not valid until a PPQ Plant Health Safeguarding Specialist or PPQ Export Certification Specialist completes Blocks 13, 14, and 15 of this form.

If the shipment complies with the USFWS-issued CITES Re-export Certificate and the procedures listed in Steps 1 through 9 of this chapter, then validate the original CITES document as follows.

1. Use your official “USDA-APHIS-PPQ Inspected and Released” or “USDA-APHIS-PPQ Released” stamp that bears your port location.
2. Sign your name in ink, and write your badge number and the date. See Table 3-10 for detailed instructions.

Step 11: Distribute the CITES Documents

When Block 5, Special Conditions, states the permittee must attach a copy of the foreign CITES Export Permit or Certificate, then distribute as follows:

1. Send the validated original USFWS-issued CITES Certificate with a copy of the foreign CITES Export Permit or Certificate attached, to the permittee with the following instructions:

2. Permittee is to forward the documents with the shipment (documents must accompany shipment). Permittee may make and keep a photocopy of the documents.

3. Send a copy of the validated original USFWS-issued CITES Certificate with a copy of the foreign CITES Export Permit or Certificate attached, to the following office:

   Robert Anderson
   U.S. Fish and Wildlife Service
   Division of Management Authority
   5700 Leesburg Pike, MS: IA
   Falls Church, VA 22041

4. Keep a copy of the validated original USFWS-issued CITES Certificate with a copy of the foreign CITES Export Permit or Certificate attached, in the port file.

**NOTICE**

CITES files must be retained for five years. See Filing System on page 3-3 for directions on how to set up and maintain files.
Transportation and Exportation (T&E) of CITES Appendix I, Appendix II, Appendix III Regulated Timber Species

Canada or Mexico
Follow the steps listed below when releasing the shipment for transportation and exportation (T&E) of CITES Appendix I, Appendix II, or Appendix III regulated timber species to Canada or Mexico:

1. Verify that the shipment is accompanied by CBP Form 7512 or other accepted in-bond document.
2. Stamp the CBP paperwork, “Released for Exportation.” Do not stamp the CITES document; this will be done by the Canadian or Mexican authorities.
3. Apply any necessary safeguards.
4. Allow the shipment to proceed.

**NOTICE**
If the CBP paperwork designates both a U.S. Company (middle man) and a Canadian or Mexican consignee, then review the CITES document to verify that the consignee is actually Canadian or Mexican and not U.S. If the CITES document declares a U.S. company as the consignee, then the T&E must be handled as a CITES re-export.
Immediate Exportation (IE) of CITES Appendix I, Appendix II, Appendix III Regulated Timber Species

Follow these steps for the immediate exportation (IE) of CITES Appendix I, Appendix II, and Appendix III regulated timber species:

1. Verify the shipment is accompanied by CBP Form 7512 or other accepted export document.

2. Stamp the CBP paperwork, “Released for Exportation.” **Do not** stamp the CITES document; this will be done by the authorities at the country of destination.

3. Apply any necessary safeguards.

4. Allow the shipment to proceed.

Introduction

This chapter provides the procedures for processing violations of CITES Appendix I, Appendix II, and Appendix III protected timber species, and for seizure and forfeiture of CITES regulated timber species (including articles made from protected timber).
**Procedures**

The procedures which follow have been established to report violations and initiate seizure and forfeiture for regulated plants, including their parts and derivatives when offered for or traded in contravention CITES.

**CITES Contacts**

Some circumstances are identified in this chapter as requiring contacting the PPQ Botanist that services your port, and others require contacting the National CITES Specialist or the National CITES Coordinator.

If after reading the procedures in this chapter, CBP Officers still have a CITES-related question regarding a shipment, then contact the CBP field office liaison through the chain of command. Include your name, phone number, and e-mail address. If after reading the procedures in this chapter, PPQ Officers still have a CITES-related question regarding a shipment, then first contact the PPQ Botanist that services your port.

If the PPQ Botanist is not available or is unable to answer your question, then contact the National CITES Specialist, Timothy Torbett or the National CITES Coordinator, John Veremis (e-mail timothy.j.torbett@usda.gov or john.veremis@usda.gov). Include your name, phone number, and e-mail address when contacting the National CITES Specialist or the National CITES Coordinator.

---

**NOTICE**

The person making a CITES-related inquiry should include his or her name, phone number, and e-mail address so that the National CITES Specialist or the National CITES Coordinator is able to reply or obtain additional details.

---

1 CBP and PPQ: To determine the name and contact information for the PPQ Botanist that services your port, see List of PPQ Identifiers and National Specialists.
Violations of USDA Regulations

Violations of USDA species regulations concerning CITES plants (7CFR 355) will generally result in the issuance of PPQ Form 518, Report of Violation.

Repeat violations of 7 CFR 355 or deliberate attempts to circumvent regulations will result in seizure and forfeiture of CITES regulated material.

To determine if seizure and forfeiture is warranted, verify that the violator is a repeat offender or deliberately attempted to circumvent regulations. Contact the PPQ National CITES Specialist or National CITES Coordinator for advice. CBP Agriculture Specialists (CBP-AS) must go through proper channels.

EXAMPLE If a violator’s Protected Plant Permit is revoked and the violator attempts to import, export, or re-export CITES regulated material, then seizure and forfeiture is warranted.

Step 1: Determine if a Violation of USDA Regulations Concerning CITES Regulated Plants Exists

A violation of the USDA regulations concerning CITES regulated plants exists when a party (importer, exporter, or re-exporter) commits one or more of the following:

◆ Engages in commercial business as an importer, exporter, or re-exporter without a USDA-APHIS ePermits-issued Protected Plant Permit;
◆ Fails to notify CBP or PPQ promptly upon the arrival or prior to the export or re-export of regulated material, by such means as a manifest, Customs’ (CBP) entry, invoice, or waybill, with the genus and species of the regulated material listed;
◆ Fails to provide the genus and species of regulated material by such means as a tag, invoice, or packing list, or identification on the shipping container;
◆ Fails (for any person engaged in business as an importer, exporter, or re-exporter) to maintain records for the trade of regulated material for a period of five years;
◆ Fails or denies (for any person engaged in business as an importer, exporter, or re-exporter) to provide CBP or PPQ access to examine such records or inventory of regulated material; or

2 The National CITES Specialist is Timothy Torbett, timothy.j.torbett@usda.gov; and the National CITES Coordinator is John Veremis, john.veremis@usda.gov.
Moves regulated material from the Customs’ (CBP) area (pertaining to imports) or from the designated port (pertaining to exports or re-exports) **without** submitting the original CITES document to CBP or PPQ for validation (for re-exported material when the CITES certificate is **not** endorsed, then the foreign CITES management authority may seize the property).

If there are other violations in addition to those listed above, then continue to Violations of CITES Regulations.

**Step 2: Complete PPQ Form 518, Notice of Violation**

See CITES Standard CITES Form on page A-9 for an example, and page A-21 for directions on completing the form. If PPQ Form 518 is available on-line, then complete the form electronically as appropriate.
Violations of CITES Regulations

Violations of CITES regulations (50 CFR 23, 24 and 16 USC 1538) for plants (including their parts or derivatives) listed by the Convention will generally result in both a report of violation (PPQ form 518, Report of Violation), and seizure and forfeiture of the illegally-traded material.

**Step 1: Confirm a Violation of CITES Exists and Warrants Seizure and Forfeiture**

A violation of CITES regulations exists when a party (importer, exporter, or re-exporter) does one or more of the following:

- Imports\(^3\), exports\(^4\), re-exports\(^5\), or possesses plants listed in CITES Appendix I, Appendix II, or Appendix III, with invalid CITES documentation or **without** a CITES document
- Imports, exports, or re-exports regulated plants in quantities that exceed the quantity recorded on the CITES permit or certificate
- Imports, exports, or re-exports regulated plants into or out of a port that has **not** been designated for the movement of such plants

To confirm that a violation exists and warrants forfeiture and seizure of the timber or articles, see Table 4-11.

---

3 (Importer, importing, importation) to land on, bring into, introduce into, or attempt to land on, bring into, or introduce into any place subject to the jurisdiction of the United States.

4 (Exporter, exporting, exportation) to carry, send, take, transport, or otherwise remove, or attempt to carry, send, take, transport or otherwise remove from any place subject to the jurisdiction of the United States.

5 (Re-exporter, re-exporting, re-exportation) to export following importation.

</tbody>
</table>

1. CBP and PPQ: To identify the name of the PPQ Botanist that services your port, see the List of Identifiers and National Specialists.

2. Consider a person knowledgeable if any of the following apply: the person was given prior information regarding CITES regulations; is a Protected Plant Permit (PPP) holder; deliberately attempted to conceal CITES-regulated material; or is a repeat violator.

3. The lack of a CITES document by a re-exporter may be due, in part to a lack of knowledge about the regulations.

4. An attempt to import or re-export through a non-designated port may be due, in part to the person’s lack of knowledge about the regulations.
Step 2: Hold the Regulated Timber or Articles Only and Notify Parties

If you have not already done so, then place the material moving in violation of CITES regulations on HOLD. Notify all parties involved that the material is not to be moved without CBP’s or PPQ’s permission.

Be sure non-CITES material or timber in the same shipment as CITES-regulated material and timber has been separated. Do not keep non-CITES material with held CITES material.

Continue to Step 3: Estimate the Retail Value of the Timber or Articles Moving in Violation of the Legislation.

Step 3: Estimate the Retail Value of the Timber or Articles Moving in Violation of the Legislation

If the same wood or article as the property on hold is sold in the United States, then use the price asked by the nearest retailer to estimate the value. If the same wood or article as the property on hold is not sold in the United States or if impractical to contact a retailer, then use the material’s invoiced value.

Continue to Step 4: Start the Forfeiture Procedures.
Step 4: Start the Forfeiture Procedures

The forfeiture procedures will allow you to seize (gain legal custody) and take possession of the material, and to facilitate prosecution by CBP, PPQ, or USFWS-Division of Management Authority (DMA).

After you have obtained the value of the material, then see Table 4-12 to determine the forfeiture procedures to use.

Table 4-12 Determine Forfeiture Procedures to Use for Seized Timber or Articles

<td>GO to Forfeiture Procedures for Seizures Valued Greater than $10,000</td>
</tr>
</tbody>
</table>

Once PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less or PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000 is completed and issued to the owner of the material, then the status of the material moves from held to seized and is now officially in the custody of CBP or PPQ.

Forfeiture Procedures for Seizures Valued at $10,000 or Less

When the seizure is valued at $10,000 or less, follow these steps and continue processing the violation:

1. Allow the owner to either waive title (by completing PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property $10,000 or Less) to the material moving in violation of the legislation or to challenge the forfeiture of that material.
2. Advise the owner that the material becomes forfeited after 21 days.
3. Complete PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less (see the examples on page A-32 and page A-37; instructions for completing the Part 1 on page A-33, and Part 5 on page A-38) for material seized under CITES legislation.

Then do as follows:

A. Verify that the file number is listed on all applicable forms (see Filing System for Violations, Seizures, and Forfeitures on page 4-25).
B. Make certain to record the date and time of posting PPQ Form 624: in Block 7 of Part 1-PPQ Headquarters, and in Block 7a of Part 5-PPQ/ CBP Port Worksheet.
C. **Immediately** post PPQ Form 624, *Part 3-Port Copy (for posting)* at the CBP or PPQ office (where the material was seized) in a conspicuous place that is accessible to the public; and keep *Part 3-Port Copy* posted for 21 days.

D. Make certain you enter the appropriate dates and times in *Blocks 6 and 7* on *Part 5-PPQ/CBP Port Worksheet* of PPQ Form 624.

4. Distribute PPQ Form 623 and PPQ Form 624 as follows:
   A. If the owner or owner's agent is present and signs *PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property $10,000 or Less*, then distribute the forms as follows:
      a. Hand *Part 2 of PPQ Form 623* to the owner or agent
      b. File *Part 1 of PPQ Form 623* in the CBP or PPQ port file
      c. Keep *Part 4 of PPQ Form 624* in the port file
         (not necessary to provide the owner or agent with this copy)
      d. Continue to 5. on page 4-11
   B. If the owner or owner’s agent is present and did not sign PPQ Form 623 or is not present, then send PPQ Form 624, *Part 4-Owner*, by *Certified* or *Registered Mail* with *Return Receipt Requested* together with the following, to all persons believed to be owners or to have an interest in the seized material 6:
      [PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property $10,000 or Less, Part 2](#)
      [PPQ Form 625 Claim and Bond](#)
      [PPQ Form 626, Petition for Remission or Mitigation of Forfeiture](#)
      
      If multiple owners or agents are identified, then you may send photocopies of the required forms in lieu of the actual forms.

5. Make certain you enter the appropriate dates and times in *Blocks 6 and 7* on *Part 5-PPQ/CBP Port Worksheet* of PPQ Form 624.

---

**NOTICE**

If the owner or owner’s agent is present and requests a copy of *PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less*, then make a photocopy of *Part 4* and give the photocopy to the owner or owner’s agent. You must also send the original *Part 4-Owner*, PPQ Form 624 to the owner or owner’s agent by *Certified* or *Registered Mail* with *Return Receipt Requested* to comply with the regulations.

---

6 Those that may have an interest include interested parties such as the owner’s agent, shipping line, or supplier. These people are identified on PPQ Form 624, *Part 4 (worksheet)*, *Block 6*. 
6. Scan and E-mail *Part 1-PPQ Headquarters* PPQ Form 624, and if applicable, the signed *PPQ Form 623*, to the National CITES Coordinator:

   E-mail: john.veremis@usda.gov
   Subject: PPQ Form 624, Notice for Seizure and Proposed Forfeiture for Violation $10,000 or Less
   Attn: National CITES Coordinator

   (In the near future, you will be notified to send the original actual document to Riverdale.)

7. File and retain the following completed forms:

   A. After 21 days, remove, file, and retain the posted *Part 3-Port Copy* of PPQ Form 624.
   
   B. File and retain *Part 5-PPQ/CBP Port Worksheet* copy of PPQ Form 624, to know what has happened, who was notified, and when the next step is to be taken. Update *Part 5* as necessary.
   
   C. Make certain that all relevant documents have been collected and filed; and update the documents in the file as necessary.

For detailed instructions on completing forms for seizures valued at $10,000 or less, see the following in *Appendix A, Forms and Permits*:

- PPQ Form 621, page A-25 through page A-26
- PPQ Form 623, page A-29 through page A-31
- PPQ Form 624, *Part 1*, page A-33 through page A-34
- PPQ Form 625, page A-48 through page A-49
- PPQ Form 626, page A-50 through page A-51

If you need additional guidance, contact the PPQ Botanist at your port or the PPQ Botanist whose area of coverage services your port.

Continue to Step 5: Safeguard the Seized Timber or Articles.

---

7 CBP and PPQ: see the List of PPQ Identifiers and National Specialists.
Forfeiture Procedures for Seizures Valued Greater than $10,000

When the seizure is valued greater than $10,000, follow these forfeiture procedures, then continue processing the violation:

1. Complete PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000. (See the examples on page A-41 and page A-45; and the instructions in Table A-10 on page 42 and in Table A-11 on page 46).

2. Make certain you enter the appropriate dates in Block 7 PPQ Form 624A, Parts 1 through 4.

3. Make certain you enter the appropriate dates in Blocks 6 and 7 of PPQ Form 624A, Part 5-PPQ/CBP Port Worksheet.

4. Proofread the completed PPQ Form 624A to ensure that there are no inaccuracies or omissions.

5. Make sure that all relevant documents have been collected and filed. Update the file as necessary.

6. Write a narrative report of all relevant facts and circumstances of the violation, as follows:
   - Prepare the narrative report on CBP or PPQ letterhead
     - CBP or PPQ letterhead must be dated and bear your name, signature, and title
     - CBP or PPQ Letterhead must be used since the seizure will be brought before a U.S. District Court by the U.S. Attorney’s Office
   - Include the names of any witnesses
   - Cite the laws believed to have been violated
   - If you need additional guidance, then contact your PPQ Botanist through proper channels.

7. The Officer signs the PPQ Form 624A.

8. Assemble the following documents:
   - Narrative report original (written by CBP Agriculture Specialist, or PPQ Plant Health Safeguarding Specialist. or PPQ Export Certification Specialist)
   - PPQ Form 624A, Part 1-PPQ Headquarters original
   - Correspondence and documents that accompanied the shipment
9. Scan the assembled documents E-mail to:

   E-mail: john.veremis@usda.gov
   Subject: PPQ Form 624A, Part 1, Narrative Report, Correspondence, & Shipping Documents
   Attn: National CITES Coordinator

   (In the near future, you will be notified to send (via overnight shipment for next-day delivery) the actual assembled documents to Riverdale.)

10. Use Certified or Registered Mail with Return Receipt Requested to send the following forms to all persons believed to be owners or to have an interest in the seized material:

    - PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000, Part 4-Owner only
    - PPQ Form 626, Petition for Remission or Mitigation of Forfeiture

11. Retain the PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000, Part 2-PPQ/CBP Port File and Part 5-PPQ/CBP Port Worksheet in your Port file for five years.

   NOTICE

   If multiple owners or agents are identified, then you may send photocopies of the forms.

For detailed instructions on completing forms for seizures valued greater than $10,000, see the following in Appendix A, Forms and Permits:

    - PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000 on page A-41 through page A-44
    - PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000 on page A-41 through page A-47
    - PPQ Form 626, Petition for Remission or Mitigation of Forfeiture on page A-50 through page A-51

Go to Step 5: Safeguard the Seized Timber or Articles on page 4-14.

---

8 Those that may have an interest include interested parties such as owner’s agent, shipping line, or supplier. These people are identified on PPQ Form 624A, Part 5, Block 6.
Step 5: Safeguard the Seized Timber or Articles

<table>
<thead>
<tr>
<th>NOTICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Notify all parties involved that the seized material is not to be moved without CBP's or PPQ's permission.</td>
</tr>
</tbody>
</table>

Safeguard the seized protected timber or articles until the material leaves your (CBP Agriculture Specialist (CBP-AS), PPQ Plant Health Safeguarding Specialist (PHSS), or PPQ Export Certification Specialist (PPQ ECS)) care. Make sure that no part of the shipment is lost.

Request for Services to Transport, Store, and/or Dispose of Shipments

Forfeiture procedures can take a lengthy amount of time and considerable storage costs may accumulate. When material is seized after being placed on hold pending final U.S. Government forfeiture, the CBP-AS, PPQ-PHSS, or PPQ-ECS must immediately contact the proprietor of the facility and inquire if there is room to continue to store the shipment at the facility and if storage fees apply to CBP or PPQ.

If either or of the following conditions apply, then immediately complete a Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments:

- Room is not available to store the shipment at the port facility; or
- Storage fees apply to USDA-PPQ at the port facility where the seized items are being stored.

1. Click on Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments to obtain a copy of the fillable form. See page A-4 for an example and instructions on completing the request.

2. Scan and send via e-mail, the completed Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments to:

   E-mail: john.veremis@usda.gov
   Subject: Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments
   Attn: National CITES Coordinator

The contractor will contact the CBP or PPQ Point-of-Contact Officer to schedule an appointment to have the loading of the seized material supervised.

If room is available to store the shipment at the port facility and storage fees do not apply, then contact the National CITES Specialist, Timothy Torbett, timothy.j.torbett@usda.gov, or the National CITES Coordinator, John Veremis, john.veremis@usda.gov, to determine if other temporary storage is necessary.
For seizures valued at $10,000 or less, do as follows:

- If you did **not** receive a signed PPQ Form 623, then continue to **Step 6:** Forfeit Seized or Abandoned Material Valued at $10,000 or Less

- If you did receive a signed PPQ Form 623, then continue to **Step 8:** Start the Process for Disposal of Forfeited Material Valued at $10,000 or Less

For seizures valued greater than $10,000, continue to **Step 7:** Await Court Decision for Seized or Forfeited Material Valued Greater Than $10,000.
Step 6: Forfeit Seized or Abandoned Material Valued at $10,000 or Less

If PPQ Form 625, Claim and Bond is **not** received by your office within 20 days after posting the Notice of Proposed Forfeiture or if the importer or re-exporter **does not** present an acceptable CITES document, then you may forfeit seized or abandoned property valued at $10,000 or less.

If PPQ Form 625, Claim and Bond, is received directly by your office within 20 days after posting the Notice of Proposed Forfeiture, then go to Procedures to Follow Upon Receipt of PPQ Form 625, Claim and Bond on page 4-18.

**NOTICE**

If PPQ Form 625, Claim and Bond, was received by the PPQ Deputy Administrator’s Office, then you will be notified by PPQ. If storage is available at the port facility at no charge, then continue to safeguard the seizure. You will be notified by PPQ of when the seized property can be forfeited; and you may be asked to serve papers issued by the U.S. Marshals Service.

If a CITES document is presented by an importer or exporter during the forfeiture process, then the document can **only** be accepted if the document was issued in accordance with Conference Resolution 12.3, Section I, paragraphs p), and q), (for replacement documents); and Section XIII, paragraphs a), b), and c), (for retrospective issue of permits and certificates). See Conference Resolution 12.3 (Rev. CoP 15), Permits and Certificates on page B-4. Contact the National CITES Specialist 10 or the National CITES Coordinator to assist you with determining if the CITES document is acceptable.

---

9 The Deputy Administrator may extend the 20-day period with an appropriate statement on the posted notice of proposed forfeiture, if necessary, to allow a person deemed to have an interest in the property at least 10 days to file such a claim and bond after receipt of a notice of proposed forfeiture.

10 The National CITES Specialist is Timothy Torbett timothy.j.torbett@usda.gov. The National CITES Coordinator is John Veremis, john.veremis@usda.gov.
Procedures for Forfeiting Seized Property

If 20 days after posting PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less you did not receive PPQ Form 625 Claim and Bond; or you did not receive notification from the PPQ-HQ/Deputy Administrator’s office that PPQ Form 625 was received; or you did not receive an acceptable CITES document, then the seized property shall be forfeited as follows:

1. If PPQ Form 626, Petition for Remission or Mitigation of Forfeiture, was not received, then complete PPQ Form 627, Declaration of Forfeiture. See the example on page A-53 and the dates recorded on PPQ Form 624 Part 3-Port Copy, and Part 5-PPQ/CBP Port Worksheet.

2. If PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property $10,000 or Less, was signed by the owner or agent, then completing PPQ Form 627 is not necessary.
   - A. Send Part 2-Owner, PPQ Form 627, Declaration of Forfeiture, by Certified or Registered Mail with Return Receipt Requested, to the owner(s) of the forfeited material. (If more than one owner, then send Part 3-Owner to the additional owner.)

   NOTICE

   The seized material is now the property of the United States Government.

   B. Retain Part 1-PPQ Port File copy of PPQ Form 627 in the port file.
   C. Record in Block 6 of PPQ Form 624, Part 5-PPQ/CBP Port Worksheet, the date and time you mail PPQ Form 627.

Continue to Step 8: Start the Process for Disposal of Forfeited Material Valued at $10,000 or Less on page 4-23.
Procedures to Follow Upon Receipt of PPQ Form 625, Claim and Bond

If PPQ Form 625, Claim and Bond, is received by your office within 20 days after the date of posting, then do as follows:

1. Record in Block 6 of PPQ Form 624, Part 5-PPQ/CBP Port Worksheet, the date PPQ Form 625 is received.
2. Make a photocopy of PPQ Form 625 and retain the copy in your files.
3. Scan and E-mail the original PPQ Form 625 to the National CITES Coordinator:

   E-mail: john.veremis@usda.gov  
   Subject: PPQ Form 625, Claim and Bond  
   Attn: National CITES Coordinator

   (In the near future, you will be notified to send the actual document to Riverdale.)

   The National CITES Coordinator will handle referral of PPQ Form 625 to the Deputy Administrator’s Office.

Continue to HOLD and safeguard the shipment.

4. The forfeiture process is now transferred from an APHIS administrative procedure to the Office of the U.S. District Court in the State where the seizure was made.

5. You will be notified by PPQ Headquarters of when to take custody of the seized or abandoned material. You may be asked to serve papers issued by the U.S. Marshals Service.

NOTICE

If PPQ Form 625, Claim and Bond, was received by the PPQ Deputy Administrator’s Office, then you will be notified by PPQ Headquarters.

If the shipment is being stored at the port facility, then ask the proprietor if room is available to continue to store the shipment at no charge to DHS-CBP or USDA-PPQ (see Request for Services to Transport, Store, and/or Dispose of Shipments on page 4-14).

6. Since PPQ Form 625 has been received, the administrative forfeiture procedure ceases; do not mail PPQ Form 627, Declaration of Forfeiture, to the owner.

7. If either PPQ Form 625 or PPQ Form 626 has been received, then do not continue to Step 8: Start the Process for Disposal of Forfeited Material Valued at $10,000 or Less until you have been notified by PPQ Headquarters to do so.

8. If both PPQ Form 625 and PPQ Form 626 were not received or you have been notified by PPQ Headquarters to start the process for disposal, then
continue to Step 8: Start the Process for Disposal of Forfeited Material Valued at $10,000 or Less.
Procedures to Follow Upon Receipt of PPQ Form 626, Petition for Remission or Mitigation of Forfeiture

If PPQ Form 626, Petition for Remission or Mitigation of Forfeiture, is received by your office, then do as follows:

1. Record in Block 6 of your PPQ Form 624, Part 5-PPQ/CBP Port Worksheet, the date PPQ Form 626, Petition for Remission or Mitigation of Forfeiture is received.

2. MAKE a photocopy of PPQ Form 626 and retain the copy in your files.

3. Scan and send via e-mail, to the National CITES Coordinator:
   
   E-mail john.veremis@usda.gov
   Subject: PPQ Form 626, Petition for Remission or Mitigation of Forfeiture
   Attn: National CITES Coordinator

   (In the near future, you will be notified to send the original PPQ Form 626 to Riverdale.)

   The National CITES Coordinator will handle referral of PPQ Form 626 to the Deputy Administrator’s Office.

4. Continue to safeguard the seized or forfeited property.

   **NOTICE**

   If the shipment is being held at the port facility, then the CBP-AS or PPQ-PHSS, or PPQ-ECS must immediately contact the proprietor of the port facility and re-inquire if space is still available to continue to store the shipment at no charge to DHS-CBP and USDA-PPQ.

   If storage fees apply or space is not available at the port facility, then to continue to safeguard and store the shipment at the port. Then complete a Request for Services to Store, Transport, and/or Dispose of Seized or Forfeited Shipments.

5. A decision will be made by the Deputy Administrator to grant or deny the Petition for Remission or Mitigation of Forfeiture.

   **NOTICE**

   Do not make arrangements to dispose of the material until you receive notification from PPQ Headquarters to do so. CBP or PPQ must continue to HOLD and safeguard the material until final notification.

If PPQ Form 626 is received by the PPQ Deputy Administrator, then you will be notified by PPQ Headquarters.

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Your office has already issued PPQ Form 627</td>
<td>CBP or PPQ must CONTINUE to SAFEGUARD the seized or forfeited property and CONTINUE with completing PPQ forms for seizures</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Step 7: Await Court Decision for Seized or Forfeited Material Valued Greater Than $10,000

1. Proceedings for seizures valued greater than $10,000 are forwarded to the U.S. Attorney’s office in the State where the seizure occurred. Disposition of the seized material is decided upon by the U.S. District Court. Depending on case load, the judicial forfeiture process can take several months or longer.

NOTICE

If the shipment is being held at the port facility, then the CBP-AS or PPQ-PHSS, or PPQ-ECS must immediately contact the proprietor of the port facility and re-inquire if space is still available to continue to store the shipment at no charge to DHS-CBP and USDA-PPQ.

If storage fees apply or space is not available at the port facility, then to continue to safeguard and store the shipment at the port. Then complete a Request for Services to Store, Transport, and/or Dispose of Seized or Forfeited Shipments. See instructions for Distribution of Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments on page A-6.

2. If the District Court rules in favor of the Agency that made the seizure, then the seized material becomes the property of the U.S. Government, and can be disposed of. In most cases after the U.S. District Court makes their ruling, the forfeiture process is transferred to the U.S. Marshal’s Service. The U.S. Marshals Service (not CBP or PPQ) finalizes custody and disposal of the forfeited material. You may be asked to serve papers issued by the U.S. Marshals Service.
Step 8: Start the Process for Disposal of Forfeited Material Valued at $10,000 or Less

Seized material becomes the property of the U.S. Government 21 days after PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less, is posted.

Sixty days after the forfeited material becomes U.S. Government property, CITES Appendix II and Appendix III material is routinely sold at auction. Forfeited CITES Appendix I material cannot be sold.

Since forfeited Appendix I material must be disposed of by other means, contact the PPQ National CITES Specialist, Timothy Torbett, e-mail timothy.j.torbett@usda.gov, or the National CITES Coordinator, John Veremis, e-mail john.veremis@usda.gov, to discuss disposal options.

Request Transport, Storage, and Disposal of Forfeited Material

Complete and send a Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments for forfeited CITES Appendix I, Appendix II, and Appendix III, as follows:

1. Fill out a Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments. (See the example Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments on page A-4.)

2. Note whether there is space available to continue to store the forfeited material for approximately 60 more days and the daily storage charge. (If you have not already done so, then contact the port facility where the shipment is being stored to obtain this information.)

3. If the shipment is already being held in contract storage, then do not complete another Request for Services to Store, Transport, and/or Dispose of Seized or Forfeited Shipments as the National CITES Coordinator will use the initial form.

4. Send via e-mail, the completed Request for Services to Store, Transport, and/or Dispose of Seized or Forfeited Shipments to the National CITES Coordinator:
   
   E-mail: john.veremis@usda.gov
   Subject: Request for Services to Store, Transport, and/or Dispose of Seized or Forfeited Shipments
   Attn: National CITES Coordinator
5. The contractor will contact the CBP or PPQ Point-of-Contact Officer to schedule an appointment to have the loading of the forfeited material supervised.
Maintenance of CITES Documents

The CBP Agriculture Specialists, PPQ Plant Health Safeguarding Specialists, or PPQ Export Certification Specialists at the port should file and maintain associated CITES documents for the following reasons:

◆ Facilitate a civil or criminal proceeding
◆ Give immediate access to prior actions taken on seized material (in case you are asked questions about a particular action)
◆ Identify repeat offenders

Filing System for Violations, Seizures, and Forfeitures

To set up a filing system for violations, seizures, and forfeitures paperwork, use the following process:

1. Give each shipment found in violation of the legislation a separate file.
2. Label each file by first listing your port name, then the last two digits of the year followed by a hyphen, then the seizure number. The seizure number starts with 01 for the first seizure of the year. Each subsequent seizure will be numbered consecutively.

   **EXAMPLE**  The Port of Miami’s first file for 2015 would be 15-01. 
   The second file for 2015 would be numbered 15-02.

3. Place *Part 5-PPQ/CBP Port Worksheet*, of *PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less*, in the front of each file and update as necessary.
4. Add all applicable forms, such as the following:
   ◆ *PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property* (if used)
   ◆ *PPQ Form 625, Claim and Bond* (if used)
   ◆ *PPQ Form 626, Petition for Remission or Mitigation of Forfeiture* (if used)
   ◆ *PPQ Form 627, Declaration of Forfeiture* (if used)
   ◆ Other relevant documents (i.e., Officer’s Statement)

Retain each file for 5 years after the last documented action is taken.
Introduction

The Designated CITES Ports chapter contains the list of CITES ports through which CITES commodities may be imported, exported, or re-exported.

Designated CITES Ports and Plant Inspection Stations CITES Staff

Some ports and plant inspection stations can only certify specific CITES commodities, which are listed under the CITES Commodity column in Table 5-1.

Introduction

This appendix provides the reference list of violations to cite on PPQ forms, and examples and instructions for completing, distributing, and retaining PPQ forms.
Instructions for CBP to Order USDA Forms

CBP Field Offices may order USDA APHIS and PPQ forms by following the procedures below:

1. Check to see if your office has a Director Field Operations (DFO) Customer Identification Number. The number starts with 34HL and has four other numbers.

   **EXAMPLE**  DFO Customer ID number 34HL1111.

2. Obtain a DFO Customer ID by providing the following information to the USDA forms point-of-contact, and sending via e-mail to cathy.a.mcduffie@usda.gov:
   
   A. Full name of the person responsible for ordering USDA forms in the DFO Office.
   B. Full mailing address of the DFO office (no P.O. box).
   C. Telephone number of the point-of-contact in the CBP Field Office.
   D. Facsimile number of the point-of-contact in the CBP Field Office.
   E. E-mail address of the point-of-contact in the CBP Field Office.

3. A DFO Customer Identification Number will be assigned to the CBP Field Office; and the designated point-of-contact in the CBP Field Office will be notified of the DFO Customer Identification Number.

4. Once the DFO Customer Identification Number has been assigned, the CBP Field Office person responsible for ordering USDA forms is strongly encouraged to order USDA forms via the Internet at www.bsc.usda.gov.

5. As a last resort, the CBP Field Office person responsible for ordering USDA forms may FAX the order to the USDA point-of-contact (Joseph Moxey; phone 301/851-2533); however, ordering USDA forms by FAX could lead to delays.

6. The CBP Field Office person ordering USDA forms **must** use the same DFO Customer Identification Number for all forms orders. Order only the forms and quantity needed and reorder when necessary. **Do not** order large quantities of USDA forms. Forms take approximately 5-10 days to arrive after receipt of order.
Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments

1. Seizure Number
   (see Forfeiture Number/Port File Number)  
   PHL-06-03

2. Description of Commodity
   (example: rough-sawn lumber)  
   rough sawn lumber

3. Quantity and Unit
   list lumber in cubic meters; list veneer in square meters
   (examples: 340 cubic meters; 100 square meters; 250 cartons, 40 boxes; 1,500 dowels;
   10,000 pieces in 250 boxes; 45 pieces on 15 pallets)
   31.32 cubic meters.

4. Common Name of Wood
   bigleaf mahogany

5. Scientific Name of Wood
   Swietenia macrophylla

6. Country of Origin
   Belize

7. Weight in Kilograms
   15,600 kgs.

8. Dimensions of the Shipment
   measure as one unit, then enter the length, width, and height in feet to determine the truck size needed to
   transport the shipment
   Length 36'  Width 8'  Height 5'

9. Value of Shipment
   $62,350

10a. Is the shipment on pallets?  (☐ YES  ☐ NO)

10b. If YES, are pallets part of the shipment?  (☐ YES  ☐ NO)

11. Location of Seized Material
   name of the facility and complete address
   Bay Street Bonded Warehouse
   123 Bay Street
   Philadelphia, PA

12. CBP or PPQ Point-of-Contact
   name and phone number
   CBP  PPQ
   John Smith
   (215)651-2102

13. Storage Charges Accrued-to-date
   $0

14. Amount the dock, pier, or warehouse will continue to charge on a daily basis
   $100

15. Date the Forfeited Property Valued at $10,000 or Less can be Disposed
   must be the date PPQ Form 627 was sent plus 60 days and not before
   will be notified

If forfeited property is greater than $10,000 value, then PPQ Headquarters will notify the contractor of the disposal date.

Figure A-1  Example of Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments
Purpose
The Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments worksheet is part of the process to obtain the transportation, storage, and if applicable, disposal cost of seized or forfeited material. See page 4-14 through page 4-23 for additional information.

Instructions
Obtain a fillable copy of Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments (click link to access), and complete the request as instructed in Table A-2 below.

### Distribution of Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments

E-mail the completed worksheet to the National CITES Coordinator:

E-mail: john.veremis@usda.gov  
Subject: Request for Services to Transport, Store, and/or Dispose of Seized or Forfeited Shipments  
Attn: National CITES Coordinator

The contractor will contact the CBP or PPQ Point-of-contact Officer to schedule an appointment to have the loading of the forfeited material supervised.

CITES Standard CITES Form

The location of blocks in the Standard CITES form may be in different locations depending on the country issuing the form.

![Standard CITES Form Diagram](image)

**Figure A-2 Example of Standard CITES Form (front) (Annex 2, Conference Resolution 12.3 (Rev. CoP15))**
CITES Standard CITES Form

Instructions and explanations
(These correspond to block numbers on the form)

1. Tick the box which corresponds to the type of document issued (export permit, re-export certificate, import permit or other). If the box "other" has been ticked, the type of document must be indicated. The original number is a unique number allocated to each document by the Management Authority.

2. For export permits and re-export certificates, the date of expiry of the document may not be more than six months after the date of issuance (one year for import permits).

3. Complete name and address of the importer.

4. Complete name and address of the exporter/re-exporter. The name of the country must be stated. The absence of the signature of the applicant renders the permit or certificate invalid.

5. Special conditions may refer to national legislation or special conditions placed on the shipment by the issuing Management Authority. This block can also be used to justify the omission of certain information.

6. The following codes should be used: T for commercial, Z for zoo, G for botanical garden, Q for circus or travelling exhibition, S for scientific, H for hunting trophy, P for personal, M for medical, E for education, N for re-introduction or introduction into the wild, B for breeding in captivity or artificial propagation and L for law enforcement / judicial / forensic.

7. Indicate the number of the security stamp affixed in block 13.

8. The name, address and country of the issuing Management Authority should already be printed on the form.

9. Indicate the scientific name (genus and species, where appropriate subspecies) of the animal or plant as it appears in the Convention Appendices or the reference lists approved by the Conference of the Parties, and the common name of the animal or plant as known in the country issuing the permit.

10. Describe, as precisely as possible, the specimens entering trade (live animals, skins, fans, wallets, shoes, etc.). If a specimen is marked (tags, identifying marks, rings, etc.), whether or not this is required by a Resolution of the Conference of the Parties (specimens originating in a ranching operation, specimens subject to quotas approved by the Conference of the Parties, specimen of Appendix I species bred in captivity for commercial purposes, etc.), indicate the number and type of mark. The sex and age of the live animals should be recorded, if possible.

11. Enter the number of the Appendix of the Convention (I, II or III) in which the species is listed.

Use the following codes to indicate the source:

W Specimens taken from the wild
R Ranched specimens, specimens of animals reared in a controlled environment, taken as eggs or juveniles from the wild, where they would otherwise have had a very low probability of surviving to adulthood.
D Appendix I animals bred in captivity for commercial purposes in operations included in the Secretariat's Register, in accordance with Resolution Conf. 12.10 (Rev. CoP15), and Appendix I plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 4, of the Convention
A Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP15), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III)
C Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5
F Animals born in captivity (F1 or subsequent generations) that do not fulfill the definition of 'bred in captivity' in Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof
U Source unknown (must be justified)
I Confiscated or seized specimens
O Pre-Convention specimens (may be used with other source codes).

12. The quantity and units indicated should conform to the most recent version of the Guidelines for the preparation and submission of CITES annual reports.

13. Indicate the total number of specimens exported in the current calendar year (1 January to 31 December) (including those covered by the present permit) and the current annual quota for the species concerned (for example 500/1000). This should be done for the national quotas as well as for those determined by the Conference of the Parties.

14. The country of origin is the country in which the specimens were taken from the wild, bred in captivity or artificially propagated, except in the case of plant specimens that cease to qualify for an exemption from the provisions of CITES. In such instances, the country of origin is deemed to be the country in which the specimens ceased to qualify for the exemption. Indicate the number of the permit or certificate of the exporting country and the date of issuance. If all or part of the information is not known, this should be justified in block 5. This block must only be completed in case of re-exports.

15. The country of last re-export is the country from which the specimens were re-exported before entering the country in which the present document is issued. Enter the number of the re-export certificate of the country of last re-export and its date of issuance. If all or part of the information is not known, this should be justified in block 5. This block must only be completed in case of re-export of specimens previously re-exported.

16. The "No. of the operation" is the number of the registered captive-breeding or artificial propagation operation. The "date of acquisition" is defined in Resolution Conf. 13.6 and is required only for Appendix II species.

17. To be completed by the official who issues the permit. The name of the official must be written in full. The security stamp must be affixed in this block and must be cancelled by the signature of the issuing official and a stamp or seal. The seal, signature and security stamp number should be clearly legible.

18. To be completed by the official who inspects the shipment at the time of export or re-export. Enter the quantities of specimens actually exported or re-exported. Strike out the unused blocks.

19. Enter the number of the bill of lading or air way-bill if the method of transport used requires the use of such a document. The document must be written in one of the three working languages of the Convention (English, Spanish or French) or must include a full translation into one of these three languages. Exported and re-exported species should not appear on the same document unless it is clearly indicated which species are being exported and which re-exported.

AFTER USE THIS DOCUMENT MUST BE RETURNED TO A MANAGEMENT AUTHORITY OF THE IMPORTING COUNTRY.

Figure A-3 Example of Standard CITES Form (back) (Conf. Resolution 12.3 Rev. CoP15)
Annex 1

Information that should be included in CITES permits and certificates

a) The full name and the logo of the Convention
b) The complete name and address of the Management Authority issuing the permit
c) A unique control number
d) The complete names and addresses of the exporter and importer
e) The scientific name of the species to which the specimens belong (or the subspecies when it is relevant in order to determine in which Appendix the taxon concerned is included) in accordance with the adopted standard nomenclature
f) The description of the specimens, in one of the Convention’s three working languages, using the nomenclature of specimens distributed by the Secretariat
g) The numbers of the marks appearing on the specimens if they are marked or if a Resolution of the Conference of the Parties prescribes marking (specimens from ranches, subject to quotas approved by the Conference of the Parties, originating from operations which breed animals included in Appendix I in captivity for commercial purposes, etc.) or, in the case of marking with microchip transponders, the microchip codes, the name of the transponder manufacturer, and, where possible, the location of the microchip in the specimen
h) The Appendix in which the species or subspecies or population is listed. NB: This does not change even if the specimen concerned is deemed to be included in a different Appendix. For example, although specimens of Appendix-I species bred in captivity for commercial purposes are deemed to be specimens of species included in Appendix II, the species remains listed in Appendix I, and this should be specified on the permit or certificate.
i) The source of the specimens
j) The quantity of specimens and, if appropriate, the unit of measure used
k) The date of issue and the date of expiry
l) The name of the signatory and his/her handwritten signature for paper permits and certificates or its electronic equivalent for electronic permits and certificates
m) The embossed seal or ink stamp of the Management Authority or its electronic equivalent
n) A statement that the permit, if it covers live animals, is only valid if the transport conditions comply with the IATA Live Animals Regulations or, if it covers plants, with the IATA Perishable Cargo Regulations
o) The registration number of the operation, attributed by the Secretariat, when the permit involves specimens of a species included in Appendix I that originate from an operation practising breeding in captivity or artificial propagation for commercial purposes (Article VII, paragraph 4), and the name of the operation when it is not the exporter
p) The actual quantity of specimens exported, certified by the stamp or seal and signature of the authority that carried out the inspection at the time of the exportation

To be included in certificates of origin only

q) A statement that the specimens originate in the country that issued the certificate.

**Figure A-5** Example of a CITES Traveling-Exhibition Certificate (CoP15)
Instructions and explanations
(These correspond to the block numbers on the form)
1. A unique number should be generated by the issuing Management Authority for the certificate.
2. The date of expiry of the document may not be more than three years after the date of issuance.
3. Complete the full name, permanent address and country of the owner of the specimen covered by the certificate.
4. The name, address and country of the issuing Management Authority should already be pre-printed on the form.
5. This block has been pre-printed to indicate the validity of the certificate for multiple cross-border movements of the specimen(s) with its/her exhibition for exhibition purposes only and to clarify that the certificate is not to be collected but is to remain with the specimen/owner. This block also can be used to justify the omission of certain information.
6. This block has been pre-printed to indicate that cross-border movement is permitted to any country accepting this certificate as a matter of national law.
7. This block has been pre-printed with the code Q for circuses and travelling exhibitions.
8. Indicate the number of the security stamp affixed in block 17.
9. Indicate the scientific name (genus and species, where appropriate subspecies) of the species as it appears in the Convention Appendices or the reference lists approved by the Conference of the Parties, and the common name as known in the country issuing the certificate.
10. Describe, as precisely as possible, the specimen(s) covered by the certificate, including identifying marks (tags, rings, unique markings, etc.) sufficient to permit the authorities of the Party into which the exhibition enters to verify that the certificate corresponds to the specimen(s) covered. The sex and age, at the time of the issuance of the certificate, should be recorded, where possible.
11. Indicate the total number of specimens. In the case of live animals it should normally be one. If more than one specimen, state “see attached inventory”.
12. Enter the number of the Appendix of the Convention (I, II, or III) in which the species is listed. Use the codes below to indicate the source. This certificate may not be used for specimens with source code W, R, F or U unless they are Pre-Convention specimens and the code Q is also used.
   W Specimens taken from the wild
   R Ranched specimens: specimens of animals reared in a controlled environment, taken as eggs or juveniles from the wild, where they would otherwise have had a very low probability of surviving to adulthood.
   A Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP15), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5, of the Convention (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III)
   C Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev.) and exported under the provisions of Article VII, paragraph 5
   F Animals born in captivity (F1 or subsequent generations) that do not fulfill the definition of “bred in captivity” in Resolution Conf. 10.16 (Rev.)
   U Source unknown (must be justified)
   O Pre-Convention specimens (may be used in conjunction with any other code).
13. The country of origin is the country in which the specimens were taken from the wild or bred in captivity.
14. Indicate the number of the export permit of the country of origin and the date of issuance. If all or part of that information is not known, this should be justified in block 18.
15. This block must contain the exhibition registration number.
16. Enter the date of acquisition only for Pre-Convention specimens.
17. To be completed by the official who issues the certificate. A certificate may only be issued by the Management Authority of the country where an exhibition is based and only when the owner of the exhibition has registered full details of the specimen with that Management Authority. The name of the issuing official must be written in full. The security stamp must be affixed in this block and must be cancelled by the signature of the issuing official and a stamp or seal. The seal, signature and security stamp number should be clearly legible.
18. This block may be used to refer to national legislation or additional special conditions placed on the cross-border movement by the issuing Management Authority.
19. This block has been pre-printed to refer to the attached Continuation Sheet, which should indicate all cross-border movements.

Subject to 5 above, upon expiration, this document must be returned to the issuing Management Authority.

**Figure A-7** Example of a CITES Traveling-Exhibition Certificate Continuation Sheet (CoP15)
FWS CITES Special Permit Condition

United States Department of the Interior
FISH AND WILDLIFE SERVICE
Washington, D.C. 20240

PRT-032756

SPECIAL PERMIT CONDITION

BRAVO International Hardwoods

1. Permittee must attach copies of the Country of origin CITES permit or certificate, under which the lumber was imported, to the copy of U.S. CITES re-export certificate. The copies of the Country of origin CITES document should have the USDA-APHIS-PPQ Inspected & Released stamp. To protect proprietary business information, the permittee may redact the supplier’s name and address on the Country of origin document copy which is attached to the U.S. re-export certificate accompanying the shipment.

2. A copy of the Country of origin CITES document, with the USDA-APHIS-PPQ Inspected & Released stamp, must also be attached to the copy of the U.S. re-export certificate that is mailed to the Division of Management Authority by the inspecting official.

3. List only one Country of origin CITES document on each copy of the U.S. re-export certificate and attach the corresponding copy of the Country of origin CITES document.

4. On the U.S. re-export certificate copy, complete:
   Block 4: Write in the name and address of the Consignee on the copy.
   Block 5: Write the shipment number. Each shipment must have a unique number in this blank.
   Block 11: Write in the quantity (must be in cubic meters) being re-exported.
   Blocks 12: Write in the name of the Country from whom you imported the lumber (e.g., Bolivia, Brazil, etc.); write in the Country of origin CITES permit or certificate number and the date the country of origin permit or certificate was issued. This must be the CITES permit or certificate that the lumber was imported under.

___ DATE ____________

BRANCH OF PERMITS
U.S. MANAGEMENT AUTHORITY

Figure A-8 Example of FWS CITES Special Permit Condition
United States Department of the Interior
FISH AND WILDLIFE SERVICE
Washington, D.C. 20240

Dear Bigleaf Mahogany re-export permittee:

Enclosed is your U.S. CITES re-export certificate. Please be sure to read the permit conditions and use the re-export certificate correctly, as follows:

- Make a copy of the U.S. re-export certificate.

- On the U.S. re-export certificate copy, complete:
  Block 4: Write in the name and address of the Consignee on the copy.
  Block 5: Write the shipment number. Each shipment must have a unique number in this blank.
  Block 11: Write in the quantity (must be in cubic meters) being re-exported.
  Block 12: Write in the name of the Country from whom you imported the lumber (ex. Bolivia, Peru, etc.); write in the Country of origin CITES permit or certificate number and the date the country of origin permit or certificate was issued. This must be the CITES permit or certificate that the lumber was imported under.

Note: List only one Country of origin CITES document on each copy of the U.S. re-export certificate. You can have multiple re-export certificates validated for a shipment. You must list the exact Country of Origin CITES document under which material was imported on the re-export certificate.

- Attach a copy of the Country of origin CITES permit or certificate of origin to the U.S. CITES re-export certificate. Please note the country of origin CITES document should have been stamped USDA/APHIS/PPQ “Inspected and Released”. If you are concerned about the Consignee seeing the name of your supplier on the attached Country of origin CITES document you may redact (black out) their name and address on the copy.

- Make an additional copy of the completed U.S. re-export certificate, with the attached country of origin CITES document, that will be mailed to our office by the USDA/APHIS/PPQ Inspecting official. You may also want to make a copy for your records.

- Have the U.S. re-export certificate copies validated by a USDA/APHIS/PPQ Inspecting official: one to accompany the shipment and one to be mailed to our office.

- Your U.S. re-export is only valid for a 6 month period (see block 2 for the expiration date of your certificate). Your re-export certificate must be valid for you to re-export bigleaf mahogany lumber. A renewal application may be obtained from http://forms.fws.gov, form 3-200-52. Please allow 30 days for the processing of the renewal.

If you have questions, contact Amy Brisendine, at the Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203, (703-358-2441).

**Figure A-11 Example of USFWS Form 3-201A, CITES Re-export Certificate (with Special Conditions)**
Subject: Validation of CITES documents for products containing both CITES listed plants species and wildlife species

Background: There has been a reoccurring issue with respect to which government agency, the U.S. Fish and Wildlife Service (FWS) or the U.S. Department of Agriculture Animal and Plant Health Inspection Service (APHIS) provides inspection, Convention on International Trade in Endangered Species (CITES) permit validation, and clearance for shipments of products imported and exported that contain both CITES listed plant species and wildlife species, both CITES and non-CITES.

To address these issues, the FWS and APHIS have collaborated to streamline the import and export requirements for both agencies. This agreement is effective immediately and until further notice.

Action: FWS Wildlife Inspectors will validate CITES documents and inspect and clear imports and exports of products that meet the following criteria:

For Import - inspect and clear shipments of products containing both CITES listed non-living plant species and any wildlife species that may be either CITES or non-CITES listed species

For Export - inspect and clear, including validation of CITES documents, shipments of products containing both CITES listed non-living plant species and any wildlife species, both CITES and non-CITES listed species

This guidance only applies to shipments that contain both CITES listed plants and wildlife.

The violator attempted to import 3 M3 of Dalbergia nigra (Brazilian rosewood) wood without CITES documentation. The wood was not listed as rosewood or Dalbergia nigra on the tag, invoice, packing list, or markings on the shipping container. The importer did not notify CBP. Therefore, the importer failed to provide the genus and species of the regulated material.

16. VIOLATOR OR CARRIER'S STATEMENT OF VIOLATION (Attach additional sheet, if needed identify who gave statement)

Violator stated he was unaware of the regulations.

17. OFFICER'S STATEMENT: Must attach a detailed, signed and dated statement. State how the action violated the regulations or compliance agreement cited in Item 2. Describe fully the facts of the violation from discovery through disposition of pest risk including when, who, what, and where.

PPQ Form 621, Application for Protected Plant Permit to Engage in Business of Importing, Exporting, or Re-exporting...

Figure A-13  Example of PPQ Form 621, Application for Protected Plant Permit to Engage in the Business of Importing, Exporting, or Re-exporting Terrestrial Plants
**Purpose**

*PPQ Form 621, Application for Protected Plant Permit to Engage in the Business of Importing, Exporting, or Re-exporting Terrestrial Plants*, is used to apply for a USDA-APHIS ePermits-issued Protected Plant Permit.

**Instructions**

The application for a *PPQ Protected Plant Permit* may be completed online via USDA-APHIS ePermits or by going to ePermits (printing a copy of *PPQ Form 621*, completing the application, and mailing along with the fee to the following address:

USDA-APHIS-PPQ Permit Unit  
4700 River Road, Unit 136  
Riverdale, Maryland 20737-1236.

CBP see Confirm PPP Valid or Apply for a PPP on page 2-105 for instructions.  
PPQ see Confirm PPP Valid or Apply for a PPP on page 3-75 for instructions.

**Distribution of PPQ Form 621**

Application is submitted on-line via ePermits or by completing a paper application and mailing the completed PPQ Form 621 along with the $70 check to the following address:

USDA-APHIS-PPQ  
PPQ Permit Unit  
4700 River Road, Unit 136  
Riverdale, MD 20737-1236
Protected Plant Permit

Figure A-14  Example of a Protected Plant Permit (ePermits)
Purpose
The Protected Plant Permit (PPP) is one document required for importers, exporters, and re-exporters to engage in the commercial trade of CITES-listed or ESA-listed plants.

All USDA-APHIS e-Permits issued Protected Plant Permits are valid for two years from the date issued. The expiration date is located in the upper right-hand corner of the ePermit.

All previously-issued PPQ Form 622, Protected Plant Permits have expired and are no longer valid.

Instructions
The applicant must first complete and submit PPQ Form 621, Application for Protected Plant Permit to Engage in Business of Importing, Exporting, or Re-exporting... to apply for a Protected Plant Permit.

The application for a PPQ Protected Plant Permit may be completed online via USDA-APHIS ePermits or by going to ePermits (printing a copy of PPQ Form 621, completing the application, and mailing along with the fee to the USDA-APHIS-PPQ Permit Unit, 4700 River Road, Unit 136, Riverdale, Maryland 20737-1236. See PPQ Form 621 Instructions on page A-26.

CBP see Confirm PPP Valid or Apply for a PPP on page 2-105 for additional information.

PPQ see Confirm PPP Valid or Apply for a PPP on page 3-75 for additional information.

Distribution of ePermits Protected Plant Permit
The Protected Plant Permit (PPP), is generated electronically via ePermits and is issued to the permittee by the PPQ Permit Unit. The PPP is part of the paperwork presented to CBP or PPQ at the time of import, export, or re-export of CITES or ESA material.

Retain a copy of the PPP in your port file for the standard time period (5 years).
PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property $10,000 or Less

Figure A-15  Example of PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property Valued at $10,000 or Less
**Purpose**

*PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property*, is used to allow the owner to waive title to the material moving in violation of the legislation. This form is used for seizures valued at $10,000 or less.

**Instructions**

Complete PPQ Form 623 as shown in *Table A-7* below.

**Table A-7  Instructions for Completing PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property (for seizures valued at $10,000 or less)**

**Distribution and Retention of PPQ Form 623**

Distribute and retain PPQ Form 623 as follows:

- If the owner or owner’s agent is present and signs PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property $10,000 or Less, then distribute the form as follows:
  - FILE Part 1 in the Port file and retain for 5 years
  - GIVE Part 2 to the owner or agent

- If the owner or owner’s agent is present but will not sign the form or is not present, then send PPQ Form 623, Waiver of Forfeiture by Certified or Registered Mail with Return Receipt Requested, together with the following forms to all persons believed to be the owner or owners or to have an interest in the seized material:
  - PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less, Part 4-Owner
  - PPQ Form 625, Claim and Bond
  - PPQ Form 626, Petition for Remission or Mitigation of Forfeiture

---

1 Those that may have an interest include interested parties such as the owner’s agent, shipping line, or supplier. These people are identified in PPQ Form 624, Part 5-PPQ/CBP Port Worksheet, Block 6.

3. DESCRIPTION OF PROPERTY (Include any identifying numbers)

Wooden dowels 100,000 pieces 100 boxes marked “Order No. 04-07643”

4. THIS PROPERTY WAS SEIZED BECAUSE

The owner attempted to import without the required CITES document.

5. NAME AND ADDRESS OF APPARENT OWNER OF DESCRIBED PROPERTY

Herman Patterson
H.P. Hardwood, Inc.
1728 Steward Street
Miami, FL 33132

6. THE PROPERTY WAS APPRAISED IN ACCORDANCE WITH 7 CFR 356.2 AND THE VALUE HAS BEEN DETERMINED TO BE APPROXIMATELY

$ 1,790

Any person claiming the seized property may file, with the office specified in Item 1 above, a claim to the property and a bond in the amount of $250, with sureties to be approved by the Deputy Administrator, conditioned that in case of condemnation of the articles so claimed the obligor shall pay all the costs and expenses of the proceedings to obtain such condemnation. Any claim and bond must be received in such office within 20 days after posting of the notice of proposed forfeiture and shall state claimant’s interest in the property. The Deputy Administrator may extend the 20-day period with an appropriate statement on the posted notice of proposed forfeiture, if necessary, to allow a person deemed to have an interest in the property at least 10 days to file such a claim and bond after receipt of a notice of proposed forfeiture.

Any person having an interest in the property specified in Item 1 above may file a petition for remission or mitigation of forfeiture in accordance with procedures in 7 CFR 356.7. This does not allow remission or mitigation of plants that are without documentation required under 50 CFR Chapter 1.

The Animal and Plant Health Inspection Service shall take appropriate action in accordance with 7 CFR 356 and the Civil Asset Forfeiture Reform Act of 2000.

Figure A-16 Example of PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less (Part 1; Parts 2 through 4 are duplicates)
Purpose

PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less (OCT 2006), is now issued for seizures whose value is $10,000 or less only, and is used to notify the violator of the intended forfeiture of the violator’s seized property. PPQ Form 624 is a multi-part (5-page) carbon form. Parts 2 through 4 are duplicates of Part 1; Part 5 is a port worksheet. (See PPQ Form 624, Part 5-PPQ/CBP Port Worksheet.)

NOTICE

Do not use or modify PPQ Form 624 for seizures greater than $10,000 value.

Previous editions of PPQ Form 624 are obsolete.

Instructions for Completing PPQ Form 624, Parts 1 through 4

Complete PPQ Form 624, Part 1 (Parts 2, 3, and 4 are duplicates) as shown in Table A-8 for seizure and proposed forfeitures valued at $10,000 or less.

Distribution and Retention of PPQ Form 624, Parts 1 through 4

Distribute and retain PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less, as follows:

1. Scan and send via e-mail, PPQ Form 624, Part 1-PPQ Headquarters to:
   
   E-mail: john.veremis@usda.gov
   Subject: PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less
   Attn: National CITES Coordinator

   (In the near future, you will be notified to send the actual document to Riverdale.)

2. Place Part 2-PPQ/CBP Port File in the PPQ or CBP port file.

3. Post Part 3-Port Copy (for posting) at the port; after the posting period of 21 days has ended, then remove and place this copy in the PPQ or CBP port file.

4. Mail Part 4-Owner together with following forms, to all persons believed to be owners or to have an interest in the seized material with a Return Receipt Requested:
   
    PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property
    PPQ Form 625, Claim and Bond
    PPQ Form 626, Petition for Remission or Mitigation of Forfeiture

   NOTICE
   
   If the owner or owner’s agent is present and requests a copy of PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less, then make a photocopy of Part 4-Owner and give the photocopy to the owner or owner’s agent. You must also send the original Part 4-Owner of PPQ Form 624, to the owner or owner’s agent by Certified or Registered Mail with Return Receipt Requested to comply with the regulations.

   NOTICE
   
   If multiple owners or agents are identified, then you may send photocopies of the required forms in lieu of the actual forms.

5. Use and maintain Part 5 as the port worksheet. Continue to Instructions for Completing PPQ Form 624, Part 5-PPQ/CBP Port Worksheet on

---

2 Those that may have an interest include interested parties such as owner’s agent, shipping line, or supplier. These people are identified on PPQ Form 624, PPQ Form 624, Part 5-PPQ/CBP Port Worksheet, Block 6.

PART 1 - PPQ HEADQUARTERS

Figure A-18 Example of PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000 (Part 1; Parts 2 through 4 are duplicates)
Purpose

PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000 is used to notify the violator of the intended forfeiture of the violator’s seized property when the value is over $10,000. PPQ Form 624A is a multi-part (5-page) carbon form. Parts 2 through 4 are duplicates of Part 1; Part 5 is used as a port worksheet.

NOTICE

Do not modify or use PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less, for seizures greater than $10,000 value.

PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000 must be used for seizures over $10,000 value.

Instructions for Completing PPQ Form 624A, Parts 1-4

Complete PPQ Form 624A, Part 1 (Parts 2 through 4 are duplicates) according to the instructions in Table A-10. (See also Forfeiture Procedures for Seizures Valued Greater than $10,000 on page 4-12 for detailed instructions.)

Distribution and Retention of PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000, Parts 1-4

Distribute *Parts 1 through 4* of PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000, as listed below (see Forfeiture Procedures for Seizures Valued Greater than $10,000 on page 4-12 for more information):

1. Assemble the following documents:
   A. *PPQ Form 624A, Part 1-PPQ Headquarters original*
   B. Narrative report *original* (written by CPB Agriculture Specialist, PPQ Plant Health Safeguarding Specialist, or PPQ Export Certification Specialist)
   C. Correspondence and documents that accompanied the shipment

2. Scan the above documents and send via e-mail to:

   E-mail: john.veremis@usda.gov
   Subject: PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000
   Attn: National CITES Coordinator

   (In the near future, you will be notified to send the actual documents to Riverdale.)

3. Mail by **Certified** or **Registered Mail** with **Return Receipt Requested**, the following forms to all persons believed to be owners or to have an interest in the seized material 3:
   - *PPQ Form 624A, Part 4-Owner*
   - *PPQ Form 626, Petition for Remission or Mitigation of Forfeiture*

   **NOTICE**

   If multiple owners or agents are identified, then you may send photocopies of the required forms in lieu of the actual forms.

4. File the *PPQ Form 624A Part 2-PPQ/CBP Port File*, and *Part 5-PPQ/CBP Port Worksheet, original* in the port files and retain for 5 years.

   **NOTICE**

   If the owner or owner's agent is present and requests a copy of the PPQ Form 624A, then make a photocopy of *Part 4-Owner* and give the photocopy to the owner or owner's agent. You must also send the *original Part 4* of PPQ Form 624A to the owner or owner's agent by **Certified** or **Registered Mail** with **Return Receipt Requested** to comply with the regulations.

---

3 Those that may have an interest include interested parties such as the owner's agent, shipping line, or supplier. These people are identified on the PPQ Form 624A, *Part 5-PPQ/CBP Port Worksheet, Block 6.*

Distribution and Retention of PPQ Form 624A, Part 5-PPQ/CBP Port Worksheet

File the yellow Part 5-PPQ/CBP Port Worksheet, of PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000, in the port file and retain for 5 years.
### PPQ Form 625 Claim and Bond

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0076. The time required to complete this information collection is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Filing of this claim and bond is required for return of seized property. Information shall be transmitted to the U.S. Attorney for forfeiture proceedings to the U.S. District Court (7 CFR 154).

I understand that this claim and bond does not entitle me to possession of the property. I also understand that in case of condemnation of the articles claimed, the claimant shall pay all costs and expenses of the proceeding to obtain such condemnation.

---

Figure A-20 Example of PPQ Form 625, Claim and Bond
Purpose

*PPQ Form 625, Claim and Bond,* is used for seizures valued at $10,000 or less as part of a legal process in which the owner of the seized property attempts to regain custody of the property.

**NOTICE**

A bonded release will **not** be made if such an action would frustrate the purpose of the Act or Convention. As an example, 7CFR 356 **does not** allow the release of CITES regulated plants that are without the documentation required under 50CFR Chapter I.

**Instructions**

The CBP Agriculture Specialist (CBP-AS), PPQ Plant Health Safeguarding Specialist (PPQ-PHSS) or PPQ Export Certification Specialist (PPQ-ECS) lists the Port file number in the *FILE NO.* block. **Do not** complete any other blocks on this form.

If the owner decides to file a Claim and Bond, then the owner will complete the form.

**Distribution of PPQ Form 625**

Distribute PPQ Form 625 as follows:

**Seizures Valued at $10,000 or Less**

If the owner or owner’s agent signs *PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property,* then *PPQ Form 625, Claim and Bond,* is **not** sent.

If the owner or owner’s agent is present and will **not** sign PPQ Form 623 or is **not** present, then send *PPQ Form 625, Claim and Bond,* together with the following documents, by *Certified* or *Registered Mail* with *Return Receipt Requested* to the owner or owner’s agent at the last known address:

- *PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property*
- *Part 4-Owner of PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less*
- *PPQ Form 626, Petition for Remission or Mitigation of Forfeiture*

**NOTICE**

If multiple owners or agents are identified, then you may send photocopies of the required forms in lieu of the actual forms.

Keep or make a copy of PPQ Form 625 and PPQ Form 626 for the port file prior to sending.
## PPQ Form 626, Petition for Remission or Mitigation of Forfeiture

**U.S. DEPARTMENT OF AGRICULTURE**

**ANIMAL AND PLANT HEALTH INSPECTION SERVICE**

---

**PPQ FORM 626**

(APR 2000)

Previous edition may be used.

---

Figure A-21 Example of PPQ Form 626, Petition for Remission or Mitigation of Forfeiture
Purpose

*PPQ Form 626, Petition for Remission or Mitigation of Forfeiture*, can be used by the owner or owner’s agent in the process of attempting to have the Deputy Administrator grant relief of the forfeited property. This form is used for seizures valued at $10,000 or less, and for seizures valued greater than $10,000.

**NOTICE**

Remission and mitigation will *not* be made if such an action would frustrate the purpose of the Act or Convention. As an example, 7CFR 356 *does not* allow for remission or mitigation with respect to CITES regulated plants that are without the documentation required under 50CFR Chapter I.

Instructions

The CPB Agriculture Specialist, PPQ Plant Health Safeguarding Specialist, or PPQ Export Certification Specialist lists the Port file number in the block labeled **FILE NO.** *Do not* complete any remaining blocks on this form. (If the owner decides to file the petition, then the owner completes the form.)

Distribution of PPQ Form 626

Distribute PPQ Form 626 based on if a seizure valued at $10,000 or less or a seizure valued at greater than $10,000.

Seizures Valued at $10,000 or Less

For seizures valued at $10,000 or less if the owner signs PPQ Form 623, then *PPQ Form 626, Petition for Remission or Mitigation of Forfeiture* is *not* sent.

**NOTICE**

If multiple owners or agents are identified, then you may send photocopies of the identified forms in lieu of the actual forms or blocks.

If the owner or owner’s agent is present and *did not* sign PPQ Form 623, or is *not* present, then the CPB Agriculture Specialist, PPQ Plant Health Safeguarding Specialist, or PPQ Export Certification Specialist will do as follows:

◆ Send *PPQ Form 626, Petition for Remission or Mitigation of Forfeiture* together with the following documents, by *Certified* or *Registered Mail* with *Return Receipt Requested* to all persons believed to be owners or agents:

❍ *PPQ Form 623, Waiver of Forfeiture Procedures by Owner of Seized Property*

❍ *PPQ Form 624, Notice for Seizure and Proposed Forfeiture of Property Valued at $10,000 or Less, Part 4-Owner*
PPQ Form 626, Petition for Remission or Mitigation of Forfeiture

Keep or make a copy of PPQ Form 625 and PPQ Form 626 for the port file prior to sending.

Seizures Valued Greater than $10,000
For seizures valued greater than $10,000, the CPB Agriculture Specialist, PPQ Plant Health Safeguarding Specialist, or PPQ Export Certification Specialist will do as follows:

Send PPQ Form 626, Petition for Remission or Mitigation of Forfeiture, together with the Part 4-Owner, of PPQ Form 624A, Notice for Seizure of Property Valued Greater Than $10,000, by Certified or Registered Mail with Return Receipt Requested to all persons believed to be owners or agents at the last known address.

Keep or make a copy for the port file prior to sending.

NOTICE
If multiple owners or agents are identified, then you may send photocopies of the identified forms in lieu of the actual forms or blocks.
PPQ Form 627, Declaration of Forfeiture

This example below is for seizures valued at $10,000 or less.

This example below is for seizures valued at $10,000 or less.

Figure A-22 Example of PPQ Form 627, Declaration of Forfeiture (for forfeitures valued at $10,000 or less)
### Purpose

PPQ Form 627, Declaration of Forfeiture, is used to take custody of seized material that is valued at $10,000 or less.

### Instructions

**Forfeitures Valued at $10,000 or Less**

For forfeitures valued at $10,000 or less, complete PPQ Form 627 as instructed in Table A-12.

Distribution and Retention of PPQ Form 627

After 21 days, distribute and retain PPQ Form 627 as follows:

- File Part 1 in the port file and retain for 5 years
- Send Part 2 and Part 3 by Certified or Registered Mail with Return Receipt Requested, to the owner or owners of the seized material at their last known address

**NOTICE**

If the owner or owner’s agent requests a copy of PPQ Form 627, then make a photocopy and give the owner or owner’s agent the photocopy. You must also send the original Parts 2 and 3 to the owner or owner’s agent by Certified or Registered Mail with Return Receipt Requested, to comply with regulations.

**NOTICE**

If multiple owners or agents are identified, then you may send photocopies of the identified forms in lieu of actual forms.

Introduction

This appendix contains the text of two current CITES Conference Resolutions which apply to CITES Appendix I, Appendix II, and Appendix III protected timber species. The CITES Conference is a biennial gathering of CITES member countries where the members review how a treaty is working, resolve policy issues, and determine which lists of species need amending.

Conference Resolution 10.13 (Rev. CoP 15) Implementation of the Convention for Timber Species

An excerpt from Conference Resolution 10.13 (Rev. CoP15), Implementation of the Convention for Timber Species, is shown in Figure B-1.

To view all CITES Conference Resolutions, go to the CITES Web site.
Regarding parts and derivatives

c) the following definitions be applied with respect to annotations in the CITES Appendices:

   i) Logs

       All wood in the rough, whether or not stripped of bark or sapwood, or roughly squared, for processing, notably into sawn wood, pulpwood or veneer sheets (HS code 44.03);

   ii) Sawn wood

       Wood simply sawn lengthwise or produced by a profile-chipping process. Sawn wood normally exceeds 6 mm in thickness (HS code 44.06, HS code 44.07);

   iii) Veneer sheets

       Thin layers or sheets of wood of uniform thickness, usually 6 mm or less, usually peeled or sliced, for use in making plywood, for veneering furniture, veneer containers, etc. (HS code 44.08); and

   iv) Plywood

       Consisting of three or more sheets of wood glued and pressed one on the other and generally disposed so that the grains of successive layers are at an angle (HS code 44.12.13, HS code 44.12.14, and HS code 44.12.22); and

d) for the purpose of annotations in the Appendices for parts and derivatives of species traded as timber, definitions to be used should, to the extent possible, be based on the tariff classifications of the Harmonized System of the World Customs Organization;

Regarding amendment proposals for timber species

e) proposals for the inclusion of timber species in Appendix II or III indicate clearly which parts and derivatives should be regulated; and

f) where these parts and derivatives are not logs, sawn wood and veneer sheets, the proponent also propose the relevant amendment to Resolution Conf. 12.3 (Rev. CoP14) if the procedures for extending the period of validity of, and/or changing the destination on, the export permit or re-export certificate should apply;

Regarding the definition of 'artificially propagated'

g) timber or other parts or derivatives of trees grown in monospecific plantations be considered as being artificially propagated in accordance with the definition contained in Resolution Conf. 11.11 (Rev. CoP15);
**Regarding improvement of public understanding of the role of the Convention in the conservation of timber species**

h) Parties consider any possible deleterious conservation and trade impacts before they impose stricter domestic measures on trade in timber specimens of species included in Appendix II or III; and

i) Management Authorities work with governmental agencies (including local governments), non-governmental organizations, industry and the general public to develop and provide information on the objectives, provisions and implementation of the Convention to counter the misconception that the inclusion of species in the Appendices represents a ban on the trade in specimens of these species, and to disseminate the message that international trade and utilization of timber species included in Appendices II and III are generally permitted and can be beneficial;

**Regarding timber species of concern**

j) the range States pay particular attention to internationally traded timber species within their territories for which the knowledge of the biological status and silvicultural requirements gives cause for concern; and

**Regarding the establishment of export quotas for timber species**

k) whilst fully respecting the requirements of paragraphs 2 (a) and 3 of Article IV of the Convention, Parties exporting timber specimens from species listed in Appendix II consider establishing voluntary annual national export quotas for such exports.

---

* Amended at the 13th, 14th and 15th meetings of the Conference of the Parties.

1 HS refers to the Harmonized System of the World Customs Organization describing and coding goods in trade. The codes referred to in this document for timber include the following:

- 44.03 Wood in the rough, whether or not stripped of bark or sapwood, or roughly squared
- 44.06 Railway or tramway sleepers of wood
- 44.07 Wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or finger-jointed, of a thickness exceeding 6 mm
- 44.08 Veneer sheets and sheets for plywood (whether or not spliced) and other wood sawn lengthwise, sliced or peeled, whether or not planed, sanded or finger-jointed, of a thickness not exceeding 6 mm
- 44.12.13 Plywood consisting solely of sheets of wood, each ply not exceeding 6 mm in thickness, and with at least one outer ply of tropical wood specified in Subheading Note 1 below
- 44.12.14 Plywood consisting solely of sheets of wood, each ply not exceeding 6 mm in thickness, and with at least one outer ply of non-coniferous wood
- 44.12.22 Other (meaning one ply, or more, that is greater than 6 mm in thickness), with at least one outer ply of non-coniferous wood, and with at least one outer ply of tropical wood specified in Subheading Note 1 below

Subheading Note 1: For the purposes of subheadings 44.03.41 to 44.03.49, 44.07.24 to 44.07.29, 44.08.31 to 44.08.39, and 44.12.13 to 44.12.99, the expression ‘tropical wood’ means one of the following types of wood:

An excerpt from Conference Resolution 12.3 (Rev. CoP 15), Permits and Certificates, is shown in the figures below.

To view 12.3 in its entirety, and all CITES Conference Resolutions, see http://www.cites.org/eng/res/index.php.
1. **Regarding standardization of CITES permits and certificates**

AGREES that:

a) to fulfil the requirements of Article VI and relevant Resolutions, export and import permits, re-export and pre-Convention certificates, certificates of origin and certificates of captive breeding and artificial propagation (except where phytosanitary certificates are used for this purpose) should include all the information specified in Annex 1 of the present Resolution;

b) Permits and certificates may be issued in paper format or electronic format provided all Parties involved have agreed with the electronic format;

c) every form, whether issued in an electronic or paper format, should be issued in one or more of the working languages of the Convention (English, Spanish or French) and in the national language if it is not one of the working languages;

d) every form should indicate which type of document it is (e.g. import or export permit, re-export or pre-Convention certificate, etc.);

e) if a permit or certificate form, whether issued in an electronic or paper format includes a place for the signature of the applicant, the absence of the handwritten signature or in case of electronic forms any electronic equivalent should render the permit or certificate invalid; and

f) if an annex is attached to a permit or certificate as an integral part of it, this and the number of pages should be clearly indicated on the permit or certificate, and each page of the annex should include the following:

i) the number of the permit or certificate and its date of issue; and

ii) the signature, handwritten, and the stamp or seal, preferably embossed, or their electronic equivalent, of the authority issuing the document; and

RECOMMENDS that:

a) Parties wishing to modify their permit and certificate forms, to reprint existing documents or to introduce new documents, first ask the Secretariat for advice;

b) Parties adapt the contents and, to the extent practicable, the format of their permits and certificates to the standard form attached to the present Resolution as Annex 2;

c) Parties using or developing electronic permits and certificates, adopt the standards recommended in the CITES electronic permitting toolkit;

d) the Secretariat, subject to availability of external funding, organize the printing of permit and certificate forms on security paper for Parties that request it;

e) to avoid abusive or fraudulent use, the Parties not use forms for their internal-trade certificates that are identical to CITES forms;

f) for tracking and annual reporting purposes, permit and certificate numbers be limited, if possible, to 14 characters in the format

\[
\text{WWWxxYYYYYzz}
\]

where WW represents the last two digits of the year of issuance; xx represents the two-letter ISO code of the country; YYYYYY represents a six-digit serial number, and zz represents two digits or letters, or a combination of a digit and a letter, that a Party may use for national informational purposes;

g) Parties state, on each of their permits and certificates, the purpose of the transaction using the following codes:

- **T** Commercial
- **Z** Zoo
- **G** Botanical garden
- **Q** Circus or travelling exhibition

---

**Figure B-3** Excerpt from CITES Conference Resolution 12.3 (Rev. CoP15), Permits and Certificates (page 1 of 12)
h) The term ‘hunting trophy’, as used in this Resolution, means a whole animal, or a readily recognizable part or derivative of an animal, specified on any accompanying CITES permit or certificate, that:

i) is raw, processed or manufactured;

ii) was legally obtained by the hunter through hunting for the hunter’s personal use; and

iii) is being imported, exported or re-exported by or on behalf of the hunter, as part of the transfer from its country of origin, ultimately to the hunter’s State of usual residence.

i) the following codes be used to indicate the source of the specimens:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>W</td>
<td>Specimens taken from the wild.</td>
</tr>
<tr>
<td>R</td>
<td>Ranched specimens: specimens of animals reared in a controlled environment, taken as eggs or juveniles from the wild, where they would otherwise have had a very low probability of surviving to adulthood.</td>
</tr>
<tr>
<td>D</td>
<td>Appendix-I animals bred in captivity for commercial purposes included in the Secretariat’s Register, in accordance with Resolution Conf. 12.10 (Rev. CoP15), and Appendix-I plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 4, of the Convention.</td>
</tr>
<tr>
<td>A</td>
<td>Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP15), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III).</td>
</tr>
<tr>
<td>C</td>
<td>Animals bred in captivity with Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5.</td>
</tr>
<tr>
<td>F</td>
<td>Animals born in captivity (F1 or subsequent generations) that do not fulfill the definition of 'bred in captivity' in Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof.</td>
</tr>
<tr>

<td>Source unknown (must be justified)</td>
</tr>
<tr>
<td>I</td>
<td>Confiscated or seized specimens</td>
</tr>
<tr>
<td>O</td>
<td>Pre-Convention specimens</td>
</tr>
</tbody>
</table>

j) the terms and codes used on permits and certificates to indicate the type of specimen being traded conform to those provided in the Secretariat’s most recent Guidelines for the preparation and submission of CITES annual reports and that the units of measurement used also conform to these Guidelines;

k) all Parties consider the development and use of electronic permits and certificates;

l) all Parties, when using paper permits and certificates, consider the use of security paper;

m) Parties that do not already do so affix a security stamp to each permit and certificate;

n) when a security stamp is affixed to a permit or certificate, it be cancelled by a signature and a stamp or seal, preferably embossed and the number of the stamp also be recorded on the document;

Figure B-4 Excerpt from CITES Conference Resolution 12.3 (Rev. CoP15), Permits and Certificates (page 2 of 12)
o) when issuing permits and certificates, the Parties follow the standard nomenclatures adopted by the Conference of the Parties to indicate the names of species [see Resolution Conf. 12.11 (Rev. CoP15)];

p) Parties that have not yet done so communicate to the Secretariat the names of the persons empowered to sign permits and certificates, as well as three specimens of their signatures, and that all the Parties communicate, within one month of any change thereto, the names of persons who have been added to the list of those already empowered to sign, the names of persons whose signatures are no longer valid and the dates the changes took effect;

q) when the means of transport used requires a bill of lading or an air way-bill, the number of such document be stated on the permit or certificate;

r) each Party inform the other Parties, direct or through the Secretariat, of any stricter internal measures it has taken under Article XIV, paragraph 1 (a), of the Convention, and that, when a Party is informed of this, it refrain from issuing permits and certificates that run counter to these measures;

s) when a permit or certificate has been cancelled, lost, stolen or destroyed, the issuing Management Authority immediately inform the Management Authority of the country of destination, as well as the Secretariat regarding commercial shipments; and

t) when a permit or certificate is issued to replace a document that has been cancelled, lost, stolen or destroyed, or that has expired, it indicate the number of the replaced document and the reason for the replacement;

II. Regarding export permits and re-export certificates

AGREES that a re-export certificate should also specify:

a) the country of origin, the number of the export permit of the country of origin and its date of issue; and

b) the country of last re-export, the number of the re-export certificate of that country and its date of issue;

or if the case arises:

c) justification for the omission of any of the aforementioned information;

RECOMMENDS that:

a) exporters be encouraged to apply for permits shortly before the time of intended export;

b) Management Authorities require accurate information about the number or quantity of specimens to be exported under each permit and, as far as possible, avoid the issuance of permits where the numbers or quantities do not accurately reflect what will actually be exported;

c) in cases where a replacement is requested for a permit that has not been used, the replacement be issued only if the original has been returned to the issuing authority, unless the original is reported as lost. In the latter case, the issuing Management Authority should notify the Management Authority of the country of destination that the original permit has been cancelled and replaced;

d) if an exporter claims to have used a permit to export a smaller number or quantity of specimens than the amount authorized on the export permit, and requests another permit to export the remainder, the Management Authority obtain proof of the number or quantity already exported before issuing any new permit (such as a copy of the validated export permit or confirmation from the Management Authority of the country of destination of the number or quantity of specimens that were imported using the original permit);

e) exported specimens and re-exported specimens not appear on the same document, unless it is clearly indicated which specimens are being exported and which re-exported;

f) when re-export certificates are issued for specimens whose form has not changed since being imported, the unit of measure used be the same as that used on the permit or certificate accepted when they were imported;
Conference Resolution 12.3 (Rev. CoP 15), Permits and Certificates

Figure B-6 Excerpt from CITES Conference Resolution 12.3 (Rev. CoP15), Permits and Certificates (page 4 of 12)

g) the provisions of Article III, paragraph 3, Article IV, paragraph 4, Article V, paragraph 3, and Article VI, paragraph 2, be understood to mean that an export permit or re-export certificate shall be valid for a period of no more than six months from the date on which it was granted and that it may not be accepted to authorize export, re-export or import except during the period of validity;

h) after the expiry of the said six-month period of validity, an export permit or re-export certificate be considered as void and of no legal value whatsoever, except in the case referred to in section XI relating to timber species;

i) no export permit or re-export certificate be issued for a specimen known to have been acquired illegally, even if it has been imported in accordance with the national legislation, unless the specimen has previously been confiscated;

j) Parties not authorize the import of any specimen if they have reason to believe that it was not legally acquired in the country of origin;

k) Parties verify the origin of Appendix-I specimens to avoid issuing export permits when the use is for primarily commercial purposes and the specimens did not originate in a CITES-registered breeding operation; and

l) as far as possible, inspections of documents and shipments be conducted at the time of export. This should be regarded as essential for shipments of live animals;

AGREES that, in the case of plant specimens that cease to qualify for an exemption from the provisions of CITES under which they were exported from their country of origin, the country of origin is deemed to be the first country in which the specimens cease to qualify for the exemption; and

AGREES further that Parties may in such instances, and if considered useful, add the following text in block 5 of re-export certificates: ‘Legally imported under an exemption from the provisions of CITES and additionally it may be stated to which exemption this refers;

III. Regarding import permits

AGREES that an import permit for specimens of species included in Appendix I may carry, among other things, certification that the specimens will not be used for primarily commercial purposes and, in the case of live specimens, that the recipient has suitable facilities to house and care for them; and

RECOMMENDS that:

a) the provisions of Article III, paragraphs 2 and 4, be understood to mean that an import permit shall be valid for a period of not more than 12 months from the date on which it was granted and that it may not be accepted to authorize import except during the period of validity; and

b) after the expiry of the said 12-month period of validity, an import permit be considered as void and of no legal value whatsoever;

IV. Regarding pre-Convention certificates

AGREES that a pre-Convention certificate should also specify:

a) that the specimen covered by the certificate is pre-Convention; and

b) the date of acquisition of the specimen as defined in Resolution Conf. 13.6 adopted at the 13th meeting of the Conference of the Parties (Bangkok, 2004);

V. Regarding certificates of origin

RECOMMENDS that:

a) certificates of origin for export of specimens of species listed in Appendix III only be issued by a designated Management Authority or by the competent authority if trade is from a State not a Party to the Convention, and that Parties not accept certificates of origin unless they are issued by such authorities;

b) the provisions of Article V, paragraph 3, be understood to mean that a certificate of origin shall be valid for a period of not more than 12 months from the date on which it was granted,
and that it may not be accepted to authorize export or import except during the period of validity; and

c) after the expiry of the said 12-month period of validity, a certificate of origin be considered as void and of no legal value whatsoever;

VI. Regarding travelling-exhibition certificates

RECOMMENDS that:

a) each Party issue a travelling-exhibition certificate for CITES specimens belonging to a travelling exhibition based in its State, registered with the Management Authority and wishing to transport specimens of CITES species to other States for exhibition purposes only, on the condition that they were legally acquired and will be returned to the State in which the exhibition is based and that they were:

i) acquired before 1 July 1975 or before the date of inclusion of the species in any of the Appendices of the Convention;

ii) bred in captivity as defined in Resolution Conf. 10.16 (Rev.); or

iii) artificially propagated as defined in Resolution Conf. 11.11 (Rev. CoP15);

b) travelling-exhibition certificates should be based on the model included in Annex 3 of the present Resolution. They should be printed in one or more of the working languages of the Convention (English, Spanish or French) and in the national language if it is not one of these;

c) travelling-exhibition certificates should contain the purpose code 'Q' and include in block 5, or in another block if the model form is not used, the following language: "The specimen/s covered by this certificate may not be sold or otherwise transferred in any State other than the State in which the exhibition is based and registered. This certificate is non-transferable. If the specimen/s dies/die, is/are stolen, destroyed, lost, sold or otherwise transferred, this certificate must be immediately returned by the owner to the issuing Management Authority";

d) a separate travelling exhibition certificate must be issued for each live animal;

e) for travelling exhibitions of specimens other than live animals, the Management Authority should attach an inventory sheet that contains all of the information in blocks 9 to 16 of the model form for each specimen;

f) travelling-exhibition certificates should be valid for not more than three years from the date on which they were granted to allow multiple imports, exports and re-exports of the individual specimens that they cover;

g) Parties consider such travelling-exhibition certificates as proof that the specimens concerned have been registered with the issuing Management Authority and allow the movement of such specimens across their borders;

h) at each border crossing, Parties endorse travelling-exhibition certificates with an authorized stamp and signature by the inspecting official and allow the certificates to remain with the specimens;

i) Parties check travelling exhibitions closely, at the time of export/re-export and import, and note especially whether live specimens are transported and cared for in a manner that minimizes the risk of injury, damage to health or cruel treatment;

j) Parties require that specimens be marked or identified in such a way that the authorities of each State into which an exhibition enters can verify that the travelling-exhibition certificates correspond to the specimens being imported;

k) when, during a stay in a State, an animal in possession of an exhibition gives birth, the Management Authority of that State be notified and issue a Convention permit or certificate as appropriate;

l) when, during a stay in a State, a travelling-exhibition certificate for a specimen is lost, stolen or accidentally destroyed, only the Management Authority which has issued the document may issue a duplicate. This duplicate paper certificate will bear the same number, if
VII. Regarding phytosanitary certificates

RECOMMENDS that:

a) any Party having considered the practices governing the issue of its phytosanitary certificates for export of artificially propagated Appendix II specimens, and having determined that such practices provide adequate assurance that the specimens are artificially propagated [as defined in Resolution Conf. 11.11 (Rev. CoP15)], may consider these documents as certificates of artificial propagation in accordance with Article VII, paragraph 5. Such certificates must include the scientific name of the species and the type and quantity of the specimens and bear a stamp, seal or their electronic equivalent, or other specific indication stating that the specimens are artificially propagated as defined by CITES;

b) any Party using phytosanitary certificates as certificates of artificial propagation inform the Secretariat and provide copies of the certificates, stamps, seals, etc. that are used; and

c) phytosanitary certificates be used exclusively for the purpose of export from the country of artificial propagation of the specimens concerned; and

INSTRUCTS the Secretariat to notify the Parties when any Party confirms that it issues phytosanitary certificates for export of artificially propagated plants of Appendix II species.

VIII. Regarding permits and certificates for species subject to quotas

RECOMMENDS that:

a) when a Party has voluntarily fixed national export quotas for specimens of species included in Appendix I, for non-commercial purposes, and/or in Appendices II and III, it inform the Secretariat of the quotas before issuing export permits and of any changes thereto as soon as they are made;

b) each export permit issued for specimens of a species subject to an annual export quota, whether established nationally or by the Conference of the Parties, indicate the total quota that has been established for the year and include a certification that the quota is being complied with. For this purpose Parties should specify the total number or quantity of specimens already exported in the current year (including those covered by the permit in question) and the export quota for the species and specimens that are subject to the quota; and

c) Parties send to the Secretariat copies of permits, electronic and paper, issued for species subject to quotas if so requested by the Conference of the Parties, the Standing Committee or the Secretariat.

IX. Regarding permits and certificates for crocodilian specimens

RECOMMENDS that:

a) when trade in tagged crocodilian skins is authorized, the same information as is on the tags be given on the permit or certificate;

b) in the case of crocodilian species subject to quotas approved by the Conference of the Parties, no permit or certificate for skins be issued before the skins are tagged in accordance with the requirements of the issuing Management Authority and their sizes are recorded;

c) in the event of mismatches of information within a permit or certificate for crocodilian skins, the Management Authority of the importing Party immediately contact its counterpart in the exporting/re-exporting Party to establish whether this was a genuine error arising from the volume of information required by the present Resolution and Resolution Conf. 11.12 (Rev. CoP15), and that, if this is the case, every effort be made to avoid penalizing those involved in the transaction;
d) for small crocodilian leather products, Parties consider measures to alleviate the administrative burdens associated with this trade through simplified procedures to issue permits and certificates as provided in Part XII of this Resolution; and

e) for small crocodilian leather products, Parties that require import permits as a stricter domestic measure should review those requirements in order to determine whether they are effective in achieving the objectives of the Convention to ensure that trade in wild fauna and flora species is not detrimental to their survival;

X. Regarding permits and certificates for coral specimens

RECOMMENDS that:

a) on permits and certificates issued to authorize trade in specimens of hard corals of the genera included in the most recent CITES list of Coral taxa where identification to genus level is acceptable¹, where the species cannot be readily determined, the specimens may be recorded at the genus level. This list is maintained by the Secretariat and may be amended with the concurrence of the Animals Committee;

b) on permits and certificates for trade in specimens that are readily recognizable as coral rock [as defined in Resolution Conf. 11.10 (Rev. CoP15) Annex], where the genus cannot be readily determined, the scientific name for the specimens should be ‘Scleractinia’;

c) any Party wishing to authorize export of coral rock identified to ordinate level only should, in view of the inability to make a non-detriment finding for coral rock pursuant to Article IV, paragraph 2 (a), apply the provisions of Article IV, paragraph 3;

d) Parties that authorize export of coral rock should:
   i) establish an annual quota for exports and communicate this quota to the Secretariat for distribution to the Parties; and
   ii) through their Scientific Authorities, make an assessment (which would be available to the Secretariat on request), based on a monitoring programme, that such export will not affect the role that coral rock has in ecosystems affected by the extraction of such specimens;

e) on permits and certificates for trade in worked specimens of black coral, where the species cannot be readily determined, the specimens may be recorded at the genus level and, where the genus cannot be readily determined, the scientific name for the given specimens should be ‘Antipatharia’; and

f) raw black coral and live black coral should continue to be identified in trade to species level;

XI. Regarding permits and certificates for timber species included in Appendices II and III with the annotation 'Logs, sawn wood and veneer sheets’

RECOMMENDS that the validity of the export permit or re-export certificate may be extended beyond the normal maximum of six months after the date of issue, on the condition that:

a) the shipment has arrived in the port of final destination before the date of expiration indicated on the permit or certificate and is being held in Customs bond (i.e. is not considered as imported);

b) the time extension does not exceed six months from the date of expiration of the permit or certificate and no previous extension has been granted;

c) the appropriate enforcement personnel has included the date of arrival and the new date of expiration in the box relating to special conditions, or an equivalent place, on the export permit or re-export certificate, certifying the modification with an official stamp or seal and signature or their electronic equivalent;

d) the shipment is imported for consumption from the port where it was located when the extension was approved and before the new date of expiration; and

Figure B-9 Excerpt from CITES Conference Resolution 12.3 (Rev. CoP15), Permits and Certificates (page 7 of 12)
e) a copy of the export permit or re-export certificate as amended in accordance with
subparagraph c) above is sent to the country of export or re-export, allowing it to amend its
annual report, and to the CITES Secretariat; and

RECOMMENDS further that any permit or certificate that indicates the complete names and
addresses of the (re-)exporter and importer, in conformity with Annex 1, paragraph d), to the
present Resolution, not be accepted for import into a country other than the one for which it was
issued, except under the following conditions:

a) the actual quantity of specimens exported or re-exported is included in the designated box
on the permit or certificate, certified by the stamp or seal and signature of the authority that
carried out the inspection at the time of export or re-export;

b) the exact quantity referred to under paragraph a) above is imported;

c) the number of the bill of lading of the shipment is included on the permit or certificate;

d) the bill of lading of the shipment is presented to the Management Authority together with the
original of the permit or certificate at the time of import;

e) the import takes place within six months after the issue of the export permit or re-export
certificate or within 12 months after the issue of a certificate of origin;

f) the period of validity of the permit or certificate has not already been extended;

gh) the Management Authority of the importing country includes on the permit or certificate, in
the box relating to special conditions, or an equivalent place, the following text, certified by
its stamp or seal and signature:

"Import into [name of country] permitted in accordance with Resolution Conf. 12.3
(Rev. CoP15) (section X) on [date]"; and

h) a copy of the permit or certificate as amended in accordance with paragraph g) above is
sent to the country of export or re-export, allowing it to amend its annual report, and to the
CITES Secretariat;

XII. Regarding the use of simplified procedures to issue permits and certificates

RECOMMENDS that:

a) Parties use simplified procedures to issue permits and certificates to facilitate and expedite
trade that will have a negligible impact, or none, on the conservation of the species
concerned, e.g.:

i) where biological samples of the type and size specified in Annex 4 of the present
Resolution are urgently required:

A. in the interest of an individual animal;

B. in the interest of the conservation of the species concerned or other species listed
in the Appendices;

C. for judicial or law enforcement purposes;

D. for the control of diseases transferable between species listed in the Appendices;

E. for diagnostic or identification purposes;

ii) for the issuance of pre-Convention certificates in accordance with Article VII,
paragraph 2;

iii) for the issuance of certificates of captive breeding or artificial propagation in accordance
with Article VII, paragraph 5, or for the issuance of export permits or re-export
certificates in accordance with Article IV for specimens referred to in Article VII,
paragraph 4; and

iv) in other cases judged by a Management Authority to merit the use of simplified
procedures:

Figure B-10 Excerpt from CITES Conference Resolution 12.3 (Rev. CoP15), Permits and Certificates
(page 8 of 12)
b) Parties, in order to simplify procedures concerning the issuance of permits and certificates under the circumstances outlined above:

i) maintain a register of persons and bodies that may benefit from simplified procedures, as well as the species that they may trade under the simplified procedures;

ii) provide to registered persons and bodies partially completed permits and certificates that remain valid for a period of up to six months for export permits, 12 months for import permits or re-export certificates, and three years for pre-Convention certificates and certificates of captive breeding or artificial propagation; and

iii) authorize the registered persons or bodies to enter specific information on the CITES document when the Management Authority has included in box 5, or an equivalent place, the following:

A. a list of the boxes that the registered persons or bodies are authorized to complete for each shipment; if the list includes scientific names, the Management Authority must have included an inventory of approved species on the face of the permit or certificate or in an attached annex;

B. any special conditions; and

C. a place for the signature, or its electronic equivalent, of the person who completed the document;

c) concerning trade in biological samples of the type and size specified in Annex 4 of the present Resolution, where the purpose is among those specified in paragraph a) of this section, permits and certificates be accepted that were validated at the time the documents were granted, rather than at the time a shipment was exported or re-exported provided that the container bears a label, such as a Customs label, that specifies ‘CITES Biological Samples’ and the CITES document number; and

d) when processing applications for the export of biological samples of the type and size and for the use specified in Annex 4 to the present Resolution, Scientific Authorities develop generic non-detriment advice that would cover multiple shipments of such biological samples, taking into account the impacts of the collection of the specimens of species included in Appendix I or II to determine whether the export or import of biological samples would be detrimental to the survival of the species;

XIII. Regarding retrospective issue of permits and certificates

RECOMMENDS that:

a) a Management Authority of an exporting or re-exporting country:

i) not issue CITES permits and certificates retrospectively;

ii) not provide exporters, re-exporters and/or consignees in importing countries with declarations about the legality of exports or re-exports of specimens having left its country without the required CITES documents; and

iii) not provide exporters, re-exporters and/or consignees in importing countries with declarations about the legality of permits or certificates which at the time of export, re-export or import did not meet the requirements of the Convention;

b) a Management Authority of an importing country, or of a country of transit or transhipment, not accept permits or certificates that were issued retrospectively;

c) exceptions from the recommendations under a) and b) above not be made with regard to Appendix-I specimens, and be made with regard to Appendix-II and -III specimens only where the Management Authorities of both the exporting (or re-exporting) and the importing countries are, after a prompt and thorough investigation in both countries and in close consultation with each other, satisfied:

i) that the irregularities that have occurred are not attributable to the (re-)exporter or the importer or, in the case of specimens imported or (re-)exported as personal or household effects (for the purposes of the present Resolution this includes live pets travelling with their owner), the Management Authority, in consultation with the relevant
enforcement authority, is satisfied that there is evidence that a genuine error has been made, and that there was no attempt to deceive; and

ii) that the export (or re-export) and import of the specimens concerned are otherwise in compliance with the Convention and with the relevant legislation of the countries of export (or re-export) and import;

d) whenever exceptions are made:

i) the permit or certificate clearly indicate that it is issued retrospectively; and

ii) the reasons for the relaxation, which should come within the purview of paragraph c) above, are specified in the conditions on the permit or certificate and a copy sent to the Secretariat and also these be listed in the biennial report to the Secretariat;

e) in cases where retrospective permits are issued for personal or household effects as referred to in subparagraph c) i) above, Parties make provision for penalties and restrictions on subsequent sales within the following six months to be imposed where appropriate to ensure that the power to grant exemptions from the general prohibition on the issue of retrospective permits is not abused; and

f) the above discretion to issue permits and certificates retrospectively not be afforded to benefit repeat offenders;

XIV. Regarding acceptance and clearance of documents and security measures

RECOMMENDS that:

a) the Parties refuse to accept permits and certificates if they have been altered (by rubbing out, deleting, scratching out, etc.), modified or crossed out, unless the alteration, modification or crossing-out has been authenticated by the stamp and signature, or its electronic equivalent, of the authority issuing the document;

b) whenever irregularities are suspected, Parties exchange issued and/or accepted permits or certificates to verify their authenticity;

c) when a security stamp is affixed to a paper permit or certificate, Parties refuse the document if the security stamp is not cancelled by a signature and a stamp or seal;

d) Parties refuse to accept any permit or certificate that is invalid, including authentic documents that do not contain all the required information as specified in the present Resolution or that contain information that brings into question the validity of the permit or certificate;

e) Parties refuse to accept permits and certificates that do not indicate the scientific name of the species concerned (including subspecies when appropriate), except in the case where:

i) the Conference of the Parties has agreed that the use of higher-taxon names is acceptable;

ii) the issuing Party can show it is well justified and has communicated the justification to the Secretariat;

iii) certain manufactured products contain pre-Convention specimens that can not be identified to the species level;

iv) worked skins or pieces thereof of Tupinambis species that were imported before 1 August 2000 are being re-exported, in which case it is sufficient to use the indication Tupinambis spp.;

f) Export permits and re-export certificates be endorsed, with quantity, signature and stamp, by an inspecting official, such as Customs, in the export endorsement block of the document. If the export document has not been endorsed at the time of export, the Management Authority of the importing country should liaise with the exporting country’s Management Authority, considering any extenuating circumstances or documents, to determine the acceptability of the document;

g) when a Party refuses to accept a permit or certificate, it will keep the original or electronic copy or, if this is not compliant with its national laws, it will cancel the paper document.
indelibly, preferably by perforation, particularly the security stamp, or register the electronic
document as cancelled;

h) when a Party refuses to accept a permit or certificate issued for export or re-export, it
immediately inform the exporting or re-exporting country;

i) when a Party is informed that a permit or certificate has issued for export or re-export has
been refused, it take measures to ensure that the specimens in question do not enter into
illegal trade;

j) Parties ensure that, when the original of a paper permit or certificate is not used by the
permittee for the trade authorized, it is returned by the permittee to the issuing Management
Authority in order to prevent the illegal use of the document, and in the case of an electronic
permit or certificate, notification is sent to the issuing Management Authority and the
electronic permit is registered as unused; and

k) Parties carefully check the e-mails and telefaxes they receive confirming the validity of
permits, in order to ensure that the information that appears on them, including the numbers,
corresponds to that in the CITES Directory;

RECOMMENDS further that Management Authorities authorize the import of vicuña cloth only if
the reverse side of the cloth bears the logo type adopted by the range States of the species,
which are signatories to the Convenio para la Conservación y Manejo de la Vicuña, and the
selvages the words VICUÑA – COUNTRY OF ORIGIN2 or if it is cloth containing pre-Convention
wool of vicuña; and

URGES the Parties to check with the Secretariat:

a) when they have serious doubts about the validity of permits accompanying suspect
shipments; and

b) before they accept imports of live specimens of Appendix-I species declared as bred in
captivity or artificially propagated; and

XV. Regarding documents for sample collections covered by ATA carnets

RECOMMENDS that:

a) for the purpose of the procedure described below, the term ‘sample collection’ refer to
collections of legally acquired dead specimens, parts and derivatives of species included in
Appendix II or III and of Appendix-I species bred in captivity or artificially propagated for
commercial purposes, which are deemed to be Appendix-II specimens, which are not
entitled to be sold or otherwise transferred, and that will cross borders for presentation
purposes before returning to the country from which such movement was first authorized;

and

b) such sample collections be considered as ‘in transit’ and may be traded under the special
provisions stipulated in Article VII, paragraph 1, as explained in Resolution Conf. 9.7
(Rev. CoP13), on the following conditions:

i) sample collections shall be covered by ATA carnets and be accompanied by a standard
CITES permit, on which it shall be indicated that the document is a permit or certificate
either for ‘export’, ‘re-export’ or ‘other’, as appropriate, and, in addition, it shall be clearly
specified that the document is issued for a ‘sample collection’;

ii) it shall be specified in block 5, or an equivalent place, that “This document covers a
sample collection and is invalid unless accompanied by a valid ATA carnet. The
specimen(s) covered by this certificate may not be sold or otherwise transferred whilst
outside the territory of the State that issued this document.” The number of the
accompanying ATA carnet should be recorded and, if necessary, this may be entered by
the Customs or other CITES enforcement official responsible for the endorsement of
the CITES document;

2 Corrected by the Secretariat after the 15th meeting of the Conference of the Parties to reflect exactly the text of the
annotations in the Appendices.
iii) the name and address (including the country) of the importer and the exporter or re-exporter shall be identical, and in block 5, or an equivalent place, the names of the countries to be visited shall be indicated;

iv) the date of expiry of such a document shall not be later than that of the ATA carnét accompanying it and the period of validity shall not be more than six months from the date on which it was granted;

v) at each border crossing, Parties shall verify the presence of the CITES permit or certificate but allow it to remain with the collection, and ensure that the ATA carnét is properly endorsed with an authorized stamp and signature by a Customs official; and

vi) Parties shall check the CITES permit or certificate and sample collection closely at the time of first export or re-export and on its return, to ensure that the collection was not subject to any change;

AGREES that:

a) such a permit or certificate shall not be transferable and when, during a stay in a State, it is lost, stolen or accidentally destroyed, only the Management Authority that issued it may issue a duplicate or a new document to replace the original. In the case of a duplicate, it will bear the same number, if possible, and the same date of validity as the original document, and contain the statement "This document is a true copy of the original". In the case of a new document, it will state that it replaces the original bearing the number xx;

b) if specimens in the collection are stolen, destroyed or lost, the issuing Management Authority of the document shall be immediately informed as well as the Management Authority of the country in which that occurred; and

c) the usual CITES procedures for export, re-export and import of sample collections shall be followed by those Parties that do not recognize or allow the use of ATA carnets; and

REPEALS the Resolutions listed hereunder:

a) Resolution Conf. 8.16 (Kyoto, 1992) – Travelling live-animal exhibitions;

b) Resolution Conf. 10.2 (Rev.) (Harare, 1997, as amended at Gigiři, 2000) – Permits and certificates; and

Annex 1, Information that Should Be Included in CITES Permits and Certificates

Annex 1 Information that should be included in CITES permits and certificates

a) The full name and the logo of the Convention
b) The complete name and address of the Management Authority issuing the permit
c) A unique control number
d) The complete names and addresses of the exporter and importer
e) The scientific name of the species to which the specimens belong (or the subspecies when it is relevant in order to determine in which Appendix the taxon concerned is included) in accordance with the adopted standard nomenclature
f) The description of the specimens, in one of the Convention's three working languages, using the nomenclature of specimens distributed by the Secretariat
g) The numbers of the marks appearing on the specimens if they are marked or if a Resolution of the Conference of the Parties prescribes marking (specimens from ranches, subject to quotas approved by the Conference of the Parties, originating from operations which breed animals included in Appendix I in captivity for commercial purposes, etc.) or, in the case of marking with microchip transponders, the microchip codes, the name of the transponder manufacturer, and, where possible, the location of the microchip in the specimen
h) The Appendix in which the species or subspecies or population is listed. NB: This does not change even if the specimen concerned is deemed to be included in a different Appendix. For example, although specimens of Appendix I species bred in captivity for commercial purposes are deemed to be specimens of species included in Appendix II, the species remains listed in Appendix I, and this should be specified on the permit or certificate.
i) The source of the specimens
j) The quantity of specimens and, if appropriate, the unit of measure used
k) The date of issue and the date of expiry
l) The name of the signatory and his/her handwritten signature for paper permits and certificates or its electronic equivalent for electronic permits and certificates
m) The embossed seal or ink stamp of the Management Authority or its electronic equivalent
n) A statement that the permit, if it covers live animals, is only valid if the transport conditions comply with the IATA Live Animals Regulations or, if it covers plants, with the IATA Perishable Cargo Regulations
o) The registration number of the operation, attributed by the Secretariat, when the permit involves specimens of a species included in Appendix I that originate from an operation practising breeding in captivity or artificial propagation for commercial purposes (Article VII, paragraph 4), and the name of the operation when it is not the exporter
p) The actual quantity of specimens exported, certified by the stamp or seal and signature of the authority that carried out the inspection at the time of the exportation

To be included in certificates of origin only

q) A statement that the specimens originate in the country that issued the certificate.

Conference Resolutions
Conference Resolution 12.3 (Rev. CoP 15), Permits and Certificates

Instructions and explanations
(These correspond to block numbers on the form)

1. Tick the square which corresponds to the type of document issued (export permit, re-export certificate, import permit or other). If the box “other” has been ticked, the type of document must be indicated. The original number is a unique number allocated to each document by the Management Authority.

2. For export permits and re-export certificates, the date of expiry of the document may not be more than six months after the date of issuance (one year for import permits).

3. Complete name and address of the importer.

3a. The name of the country must be written in full.

4. Complete name and address of the exporter/re-exporter. The name of the country must be stated. The absence of the signature of the applicant renders the permit or certificate invalid.

5. Special conditions may refer to national legislation or special conditions placed on the shipment by the issuing Management Authority. This block can also be used to justify the omission of certain information.

5a. The following codes should be used: T for commercial, Z for zoo, G for botanical garden, Q for circus or travelling exhibition, S for scientific, H for hunting trophy, P for personal, M for medical, E for education, N for reintroduction or introduction into the wild, B for breeding in captivity or artificial propagation and L for law enforcement / judicial / forensic.

5b. Indicate the number of the security stamp affixed in block 13.

6. Name, address and country of the issuing Management Authority should already be printed on the form.

7-8. Indicate the scientific name (genus and species, where appropriate subspecies) of the animal or plant as it appears in the Convention Appendices or the reference lists approved by the Conference of the Parties, and the common name of the animal or plant as known in the country issuing the permit.

9. Describe, as precisely as possible, the specimens entering trade (live animals, skins, slabs, wallets, shoes, etc.). If a specimen is marked (tags, identifying marks, rings, etc.), whether or not this is required by a Resolution of the Conference of the Parties (specimens originating in a ranching operation, specimens subject to quotas approved by the Conference of the Parties, specimens of Appendix I species bred in captivity for commercial purposes, etc.), indicate the number and type of mark. The sex and age of the live animals should be recorded, if possible.

10. Enter the number of the Appendix of the Convention (I, II or III) in which the species is listed.

Use the following codes to indicate the source:

W Specimens taken from the wild
R Ranched specimens: specimens of animals reared in a controlled environment, taken as eggs or juveniles from the wild, where they would otherwise have had a very low probability of surviving to adulthood
D Appendix I: animals bred in captivity for commercial purposes in operations included in the Secretariat's Register, in accordance with Resolution Conf. 12.10 (Rev. CoP15), and Appendix II: plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, expected under the provisions of Article VII, paragraph 4, of the Convention
A Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP15), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been propagated artificially for commercial purposes and specimens of species included in Appendices II and III)
C Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5
F Animals born in captivity (F1 or subsequent generations) that do not fulfill the definition of 'bred in captivity' in Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof
U Source unknown (must be justified)
I Confiscated or seized specimens
O Pre-Convention specimens (may be used with other source codes)

11. The quantity and units indicated should conform to the most recent version of the Guidelines for the preparation and submission of CITES annual reports.

11a. Indicate the total number of specimens exported in the current calendar year (1 January to 31 December) (including those covered by the present permit) and the current annual quota for the species concerned (for example 500/1000). This should be done for the national quotas as well as for those determined by the Conference of the Parties.

12. The country of origin is the country in which the specimen was taken from the wild, bred in captivity or artificially propagated, except in the case of plant specimens that cease to qualify for an exemption from the provisions of CITES. In such instances, the country of origin is deemed to be the country in which the specimens ceased to qualify for the exemption. Indicate the number of the permit or certificate of the exporting country and the date of issuance. If all or part of the information is not known, this should be justified in block 5. This block must only be completed in case of re-exports.

12a. The country of last re-export is the country from which the specimens were re-exported before entering the country in which the present document is issued. Enter the number of the re-export certificate of the country of last re-export and its date of issuance. If all or part of the information is not known, this should be justified in block 5. This block must only be completed in case of re-export of specimens previously re-exported.

12b. The "No. of the operation" is the number of the registered captive-breeding or artificial propagation operation. The "date of acquisition" is defined in Resolution Conf. 13.6 and is required only for pre-Convention specimens.

13. To be completed by the official who issues the permit. The name of the official must be written in full. The security stamp must be affixed in this block and must be canceled by the signature of the issuing officials and a stamp or seal. The seal, signature and security-stamp number should be clearly legible.

14. To be completed by the official who inspects the shipment at the time of export or re-export. Enter the quantities of specimens actually exported or re-exported. Strike out the unused blocks.

15. Enter the number of the bill of lading or air way-bill if the method of transport used requires the use of such a document.

The document must be written in one of the three working languages of the Convention (English, Spanish or French) or must include a full translation into one of these three languages. Exported and re-exported specimens should not appear on the same document unless it is clearly indicated which specimens are being exported and which re-exported.

After use this document must be returned to a Management Authority of the importing country.

Conversion Formulas

Conversion Formulas for Timber and Timber Products

- Board Feet of Lumber to Cubic Meters — C-1
- Cubic Feet of Lumber to Cubic Meters — C-2
- Conversion Formula for Dowel Rods — C-3
  - Volume of a Cylinder in Inches to Cubic Meters — C-3
- Conversion Formula for Logs — C-4
  - Volume of a Log — C-4
- Conversion Formulas for Veneer — C-5
  - Square Feet of Veneer to Square Meters — C-5
  - Square Meters of Veneer to Cubic Meters — C-5
  - Cubic Feet of Veneer to Cubic Meters — C-6

Conversion Formulas for Timber and Timber Products

Use the following formulas to assist you with verifying that the quantity recorded on the CITES Permit or Certificate matches the quantity invoiced on the accompanying shipping documents.

These conversions should also be made by the importer or exporter so that the total quantity of CITES regulated material recorded on the shipping documents is expressed in the same unit of measurement found on the CITES Permit or Certificate.

**Board Feet of Lumber to Cubic Meters**

There are 424 board feet per cubic meter. To convert board feet of lumber to cubic meters, divide the board feet of lumber by 424 board feet. See the equation in Figure C-1 below.

\[
\text{Total board feet of lumber} = \frac{\text{cubic meters of lumber}}{424 \text{ board feet}}
\]

**Figure C-1**  Formula to Convert Board Feet of Lumber to Cubic Meters
Some countries may express board feet in pie tablares (PT.). Since 1 PT. is equal to one board foot, change the total PT to total board feet of lumber, then continue using the formula in Figure C-1 above to convert to cubic meters of lumber.

**EXAMPLE** A shipment of 1000 board feet of lumber arrives at your port. Use the following calculation to convert this shipment to cubic meters of lumber:

\[
\frac{1000 \text{ board feet of lumber}}{424 \text{ board feet}} = 2.36 \text{ cubic meters of lumber}
\]

### Cubic Feet of Lumber to Cubic Meters

See Figure C-2 for the conversion formula.

\[
\text{cubic feet} \times 0.02832 = \text{cubic meters}
\]

**Figure C-2** Formula to Convert Cubic Feet of Lumber to Cubic Meters

**NOTICE**

Where: cubic feet of lumber = (lumber length in feet) x (lumber width in feet) x (lumber thickness in feet)

Lumber dimensions in feet = lumber length x width x thickness in inches/12

The conversion of cubic feet of lumber to cubic meters may be difficult because the formula depends upon the multiplication of the number of square meters and the thickness of wood, which could be variable. In this case, the CPB AS, PPQ PHSS, or PPQ ECS should have the permittee perform the conversion and then have the permittee supply the CPB AS, PPQ PHSS, or PPQ ECS with a copy of the calculations.

**EXAMPLE** A shipment of 10,000 square feet of lumber approximately 1 inch thick arrives at your port. Use the following calculation to convert this shipment to cubic meters:

10,000 square feet of lumber x 1/12 = 833.33 cubic feet

833.33 x 0.02832 = 23.6 cubic meters
Conversion Formulas
Conversion Formula for Dowel Rods

Volume of a Cylinder in Inches to Cubic Meters
To convert cubic inches of dowel to cubic meters, use the formula in Figure C-3.

(Cubic inches of dowel) x (.0000164) = cubic meters of dowel

Figure C-3  Formula to Convert Volume of a Cylinder in Inches to Cubic Meters

Where volume of cylinder in cubic inches =

\[ \pi \times (\text{radius of dowel in inches})^2 \times \text{length of dowel in inches} \times \text{total number of dowels} \]

Figure C-4  Formula to Convert Volume of Cylinder to Cubic Inches

EXAMPLE  A shipment of containing 100,000 ramin dowels (each measure 1/4 inch in diameter by 16 inches in length) arrives at your port. Use the following formula to convert this shipment to cubic meters:

Radius = 1/2 diameter
R = 1/4 = .25 x 1/2 = .125

\[ (3.14) \times (.125)^2 \times 16 \text{ inches} \times 100,000 = 78,500 \text{ cubic inches of dowel} \]

\[ (78,500 \text{ cubic inches of dowel}) \times (.0000164) = 1.287 \text{ cubic meters of dowel} \]
Conversion Formula for Logs

Volume of a Log

A tape measure and a calculator are needed to estimate the volume of a log. The volume determination requires the officer to do as follows:

1. Take the average diameter of the log by measuring the largest end and smallest end (excluding bark if present) and divide by 2.
2. Divide the average diameter by 2 to calculate the average radius (r).
3. Use the formula for the volume of a cylinder, and insert the average radius of the log (i.e., $3.14 \times r^2 \times \text{length}$).
4. Convert from cubic inches to cubic meters.

\[
\begin{align*}
1. \quad & \frac{\text{large diameter} + \text{small diameter}}{2} = d \quad \text{(average diameter of a log)} \\
2. \quad & \frac{d}{2} = r \quad \text{(average radius of a log)} \\
3. \quad & 3.14 \times r^2 \times \text{length of log} = \text{volume in cubic inches} \\
4. \quad & \text{Volume in cubic inches} \times 0.000164 = \text{cubic meter volume}
\end{align*}
\]

Figure C-5 Formula for Volume of a Log

EXAMPLE  
A log taken from the shipment is 84 inches log. Excluding bark, the large end measures 10 inches and the small end measures 8 inches.

\[
\begin{align*}
1. \quad & \frac{10 + 8}{2} = 9'' \quad \text{average diameter} \\
2. \quad & \frac{9}{2} = 4.5'' \text{average radius} \\
3. \quad & 3.14 \times 4.5^2 \times 84 = 5341.14 \quad \text{cubic inch volume} \\
4. \quad & 5341.14 \times 0.000164 = .0876 \quad \text{cubic meter volume}
\end{align*}
\]
Conversion Formulas for Veneer

Square Feet of Veneer to Square Meters
Use the formula below to convert square feet of veneer to square meters.

\[
\text{(square feet of veneer)} = \text{(length of veneer in feet)} \times \text{(width of veneer in feet)}
\]

\[
\text{(square feet of veneer)} \times 0.0929 = \text{square meters of veneer}
\]

<table>
<thead>
<tr>
<th>Figure C-6 Formula to Convert Square Feet of Veneer to Square Meters</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>EXAMPLE</strong> A shipment of 25,000 square feet of veneer arrives at your port. Use the following calculation to convert this shipment to square meters:</td>
</tr>
</tbody>
</table>
| \[
(25,000 \text{ square feet of veneer}) \times (0.0929) = 2322.5 \text{ square meters}
\] |

Square Meters of Veneer to Cubic Meters
Use the formula in Figure C-7 to convert square meters of veneer to cubic meters.

\[
\text{(square meters of veneer)} \times \text{(Veneer thickness in meters)} = \text{Cubic meters of veneer}
\]

<table>
<thead>
<tr>
<th>Figure C-7 Formula to Convert Square Meters of Veneer to Cubic Meters</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>EXAMPLE</strong> A shipment of 25,000 square meters of veneer 0.6 millimeters thick arrives at your port. Use the following calculation would convert this shipment to cubic meters:</td>
</tr>
</tbody>
</table>
| \[
(25,000 \text{ square meters of veneer}) \times (0.6) \text{ meter} = 15 \text{ cubic meters of veneer}
\] |
Cubic Feet of Veneer to Cubic Meters
To convert cubic feet of veneer to cubic meters, use the formula in Figure C-8. This conversion formula depends on the multiplication of the number of square feet and the thickness of wood, which could be variable. In this case, have the permittee perform the conversion and provide you with a copy of the calculations.

\[(\text{cubic feet of veneer}) \times (0.02832) = \text{cubic meters of veneer}\]

Where: (cubic feet of veneer) = (length of veneer in feet) \times (width of veneer in feet) \times veneer thickness in feet

Veneer dimensions in feet = veneer length \times width \times thickness, in inches/12

**Figure C-8** Formula to Convert Cubic Feet of Veneer to Cubic Meters

**EXAMPLE** A shipment of 25,000 square feet of veneer 1/16 of an inch thick arrives at your port. Use the following calculation to convert this shipment to cubic meters:

\[(25,000 \text{ square feet of veneer}) \times (1/16)/12 = 130.21 \text{ cubic feet} \times 0.2832 = 3.687 \text{ cubic meters}\]
Appendix

Harmonized System of the World Customs Organization

Contents

Introduction

This appendix contains the Harmonized System of the World Customs Organization (HS) codes describing and coding goods in trade.

Harmonized System of World Customs Organization (HS) Codes

The following Harmonized System of World Customs Organization (HS) codes are referred to in the CITES I-II-III Timber Species Manual.

HS Code 44.03
Wood in the rough, whether or not stripped of bark or sapwood, or roughly squared.

HS Code 44.06
Railway or tramway sleepers of wood.

HS Code 44.07
Wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or finger-jointed, of a thickness exceeding 6 mm.

HS Code 44.08
Veneer sheets and sheets for plywood (whether or not spliced) and other wood sawn lengthwise, sliced or peeled, whether or not planed, sanded or finger-jointed, of a thickness not exceeding 6 mm.

HS Code 44.09
Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed.
HS Code 44.12.13
Plywood consisting solely of sheets of wood, each ply not exceeding 6mm in thickness, and with at least one outer ply of tropical wood specified in Subheading Note 1.

HS Code 44.12.14
Plywood consisting solely of sheets of wood, each ply not exceeding 6 mm in thickness, and with at least one outer ply of non-coniferous wood.

HS Code 44.12.22
Other (meaning one ply or more, that is greater than 6 mm in thickness), with at least one outer ply of non-coniferous wood, and with at least one ply of tropical wood specified in Subheading Note 1.

1 Subheading Note 1: For the purposes of subheadings 4403.41 to 443.49, 4407.24 to 4407.29, 4408.31 to 4408.39, and 4412.13 to 4412.99, the expression "tropical wood" means one of the following types of wood: Abura, Acajou d'Afrique, Afromosia, Ako, Alan, Andiroba, Aningre, Avodire, Azobe, Balau, Balsa, Bosse Clair, Bosse Fonce, Cativo, Cedro, Dabema, Dark Red Meranti, Dibetou, Doussie, Framire, Freijo, Fromager, Fuma, Geronggang, Ilomba, Imbuia, Ipe, Iroko, Jaboró, Jelutong, Jequitibá, Jongkong, Kapur, Kempas, Keruing, Kosipo, Kotibe, Koto, Light Red Meranti, Limba, Louro, Macarambura, Mahogany, Makore, Mandioquiera, Mansonia, Mengkulang, Meranti Bakau, Merawan, Merbau, Merpauh, Mersawa, Moabi, Niacon, Nyatoh, Obche, Okoume, Onzabili, Orey, Ovengkol, Ozigó, Padauk, Paldao, Palissandre de Guatemala, Palissandre de Para, Palissandre de Rio, Palissandre de Rose, Pau Amarelo, Pau Marfim, Pulai, Punah, Quaruba, Ramin, Sapelli, Saqui-Saquí, Sepetir, Sipo, Sucupira, Suren, Teak, Tauari, Timba, Tola, Virola, White Lauan, White Meranti, White Seraya, Yellow Meranti.

Introduction

The Wood Identification appendix is a synopsis for wood identification of articles and commodities derived from CITES Appendix I, II, and III timber species. Wood identification is a difficult task. Become more familiar with wood by using this synopsis.

Procedures

Materials Needed
You will need the following materials to identify the wood, since the process usually cannot be accurately performed with the naked eye:

- 14X power hand lens
- Sharp knife (pen knife or utility knife)
- Single-edge razor blade

If you suspect the commodity or article is something other than invoiced, then attempt to verify the article. If you are having difficulty with the identification, then contact a PPQ Botanist 1 (CBP contact a PPQ Botanist through proper channels) for assistance.

Wood Identification
Follow each step below to identify the wood:

1. Use a sharp knife or razor blade to slice the end or cross grain (transverse section) of a piece of lumber.
2. Examine the sliced wood with a hand lens.
3. Check to see if the wood sample has vessels (pores).
4. Compare what you view through the lens with the specific CITES Appendix I, Appendix II, or Appendix III protected timber species examples on the following pages.
5. Verify the features of your sample with the features listed in the accompanying description for each wood species.

---

1 CBP and PPQ: To identify the name of the PPQ Botanist that services your port, see the List of PPQ Identifiers and National Specialists.
CITES Protected Timber Species

Examples of CITES protected timber species follow. Use the following descriptions and examples of protected CITES timber for comparison with the timber or article presented for import or re-export.

**Abies guatemalensis (Guatemalan fir)**
*Abies guatemalensis* (Guatemalan fir) is a softwood.

To identify the wood, check the following:

- Heartwood is light brown
- Latewood is prominent (see Figure E-1 below)
- Resin canals are absent
- Wood is light in color, soft, and lightweight

![Figure E-1 Example of Abies guatemalensis (Guatemalan fir) Wood Cross Section](image)

*LW*—latewood

Photo by Alex Wiedenhoeft

**Afzelia spp. (pod mahogany)**
*Afzelia* spp. (pod mahogany) is a hardwood. The description and an example are not available.
Aniba rosaeodora (Brazilian rosewood)
Aniba rosaeodora (Brazilian rosewood) is a hardwood. The description and an example are not available.

Araucaria araucana (monkey puzzle tree)
Araucaria araucana (monkey puzzle tree) is a softwood.

To identify the wood, check the following:
◆ Heartwood pinkish- to light brownish-red
◆ Latewood is absent or barely visible
◆ Resin canals are absent
◆ Wood is soft and lightweight

Bulnesia sarmientoi (gaiacwood)
Bulnesia sarmientoi (gaiacwood) is a hardwood. The description and an example are not available.
**Caryocar costaricense (ajillo)**

*Caryocar costaricense* (ajillo) is a hardwood.

To identify the wood, check the following:

- Heartwood is moderately hard and heavy
- Parenchyma: banded apotracheal parenchyma in short, patchy bands
- Rays are **not** storied
- Tyloses are present
- Vessels and vessel multiples are arranged diffusely and may be clogged with bubbles
- Wood is **not** ring porous
- Wood is light tan to light brown

---

**Figure E-3  Example of *Caryocar costaricense* (Ajillo) Wood Cross Section**

- BAP—banded apotracheal parenchyma
- MV—multiple vessels

Photo by Alex Wiedenhoeft
**Cedrela odorata (Spanish cedar)**

*Cedrela odorata* (Spanish cedar) is a hardwood.

To identify the wood, check the following:

◆ Heartwood is pale pinkish- to reddish-brown (sometimes with a purplish tinge)
◆ Odor is distinctive, spicy cedar
◆ Parenchyma: paratracheal parenchyma forms a thin ring around the vessels; marginal parenchyma forms thick bands
◆ Rays are **not** storied
◆ Wood is ring porous
◆ Wood is relatively soft and moderately heavy to light

---

Figure E-4  Example of *Cedrela odorata* (Spanish cedar) Wood Cross Section

MP—marginal parenchyma
PP—paratracheal parenchyma
RPW—ring porous wood

Photo by Alex Wiedenhoeft
**Dalbergia spp. (rosewoods)**

*Dalbergia* spp. (rosewoods) are hardwoods.

**Dalbergia nigra (Brazilian rosewood)**

*Dalbergia nigra* (Brazilian rosewood) is a hardwood.

To identify the wood, check the following:

- Odor is pleasant, faintly sweet or spicy
- Parenchyma: aliform paratracheal parenchyma present; banded apotracheal parenchyma with prominent bands, irregularly spaced; parenchyma arrangements vary considerably
- Rays medium-storied
- Vessels large, relatively numerous
- Wood is **not** ring porous
- Wood is dark brown to black with darker streaks, hard, and heavy

![Figure E-5 Example of *Dalbergia nigra* (Brazilian rosewood) Wood Cross Section](image)

APP—aliform paratracheal parenchyma
BAP—banded apotracheal parenchyma

Photo by Alex Wiedenhoeft
Figure E-6  *Dalbergia nigra* (Brazilian rosewood) Rough Sawn Lumber

Figure E-7  *Dalbergia nigra* (Brazilian rosewood) Rough Sawn Lumber
Diospyros spp. (ebonies)
Diospyros spp. (ebonies) description and examples are not available.

Dipteryx panamensis (tonka bean)
Dipteryx panamensis (tonka bean) is a hardwood. The description and an example are not available.
Fitzroya cupressoides (alerce)

Fitzroya cupressoides (alerce) is a softwood.

To identify the wood, check the following:

◆ Heartwood is dark red to reddish brown
◆ Latewood is in relatively narrow bands; transition is abrupt between earlywood and latewood (see Figure E-8)
◆ Resin canals are absent
◆ Wood is moderately hard and heavy

![Figure E-8 Example of Fitzroya cupressoides (Alerce) Wood Cross Section](image)

Fraxinus mandshurica (manchurian ash)

Fraxinus mandshurica (manchurian ash) is a hardwood. The description and an example are not yet available.
**Gonystylus spp. (ramin)**

*Gonystylus* spp. (ramin) is a hardwood.

To identify the wood, check the following:

- Heartwood is whitish to pale yellow
- Parenchyma: distinct aliform parenchyma; marginal parenchyma sometimes present
- Wood is **not** ring porous
- Vessels are mostly solitary; some in radial multiples of 2 or 3
- Wood is moderately hard and heavy

![Figure E-9 Example of Gonystylus spp. (Ramin) Wood Cross Section](image-url)

APP—aliform paratracheal parenchyma  
MV—multiple vessels  
Photo by Alex Wiedenhoeft
**Guaiacum spp. (lignum vitae)**

*Guaiacum* spp. (lignum vitae) is a hardwood.

**NOTICE**

Although all species of *Guaiacum* are protected under CITES Appendix II, only two examples are shown in this appendix.

To identify the wood, check the following:

- Heartwood ranges from dark greenish to black or dark brown
- Rays are fine-storied
- Vessels are small, barely visible, and mostly solitary
- Wood is *not* ring porous

Wood is extremely hard and heavy

---

**Figure E-10** Example of *Guaiacum officinale* (Commoner lignum vitae) Wood Cross Section

**Figure E-11** Example of *Guaiacum sanctum* (Holy lignum vitae) Wood Cross Section

---

*Photo by Alex Wiedenhoeft*
**Guibourtia demeusei** *(red bubinga)*

*Guibourtia demeusei* (red bubinga) is a hardwood. A description and examples are **not** available.

**Guibourtia pellegriniana** *(rose bubinga)*

*Guibourtia pellegriniana* (rose bubinga) is a hardwood. A description and examples are **not** available.

**Guibourtia tessmannii** *(rose bubinga)*

*Guibourtia tessmannii* (rose bubinga) is a hardwood. A description and examples are **not** available.

**Khaya spp.** *(African mahogany)*

*Khaya spp.* (African mahogany) is a hardwood. The description and an example are **not** available.
**Magnolia liliifera var. obovata**

*Magnolia liliifera* var. *obovata* is a hardwood.

To identify the wood, check the following:

- Heartwood is light brown, sometimes with a greenish tinge
- Parenchyma: marginal parenchyma is present and conspicuous
- Rays are *not* storied
- Vessels are often in multiples
- Wood is *not* ring porous
- Wood is moderately hard and heavy

Figure E-12  Example of *Magnolia liliifera* var. *obovata* (Ramin) Wood Cross Section

MP—marginal parenchyma
MV—multiple vessels

Photo by Alex Wiedenhoeft
**Oreomunnea pterocarpa (gavilan)**

*Oreomunnea pterocarpa* (gavilan) is a hardwood.

To identify the wood, check the following:

- Heartwood color is light brown
- Parenchyma: banded apotracheal parenchyma is present in long, wavy bands
- Rays are **not** storied
- Vessels mostly solitary, in radial or angled files
- Wood is **not** ring porous
- Wood is relatively soft and lightweight

---

**Osyris lanceolata (African sandalwood)**

*Osyris lanceolata* (African sandalwood) description and an example are **not** available.

**Paubrasilia echinata (Brazilwood)**

*Paubrasilia echinata* (Brazilwood) is a hardwood. The description and an example are **not** available.
**Pericopsis elata (Afrormosia)**

*Pericopsis elata* (Afrormosia) is a hardwood.

To identify the wood, check the following:

- Heartwood is medium to dark brown
- Parenchyma: aliform paratracheal parenchyma and confluent paratracheal parenchyma are present
- Rays are medium-storied (often hard to detect)
- Vessels are numerous (barley visible to the naked eye)
- Wood is **not** ring porous
- Wood is moderately hard and heavy

![Example of Pericopsis elata (Afrormosia) Wood Cross Section](image)

APP—aliform paratracheal parenchyma
CPP—confluent paratracheal parenchyma

*Figure E-14  Example of Pericopsis elata (Afrormosia) Wood Cross Section*

**Pilgerodendron uviferum (pilgerodendron)**

*Pilgerodendron uviferum* (pilgerodendron) is a softwood. A description and an example are **not** available.

**Pinus koraiensis (Korean pine)**

*Pinus koraiensis* (Korean pine) is a softwood. The description and an example are **not** available.
**Platymiscium pleiostachyum (cristobal, granadillo)**

*Platymiscium pleiostachyum* (cristobal, granadillo) is a hardwood.

To identify the wood, check the following:

- Heartwood is reddish brown, usually with a purplish cast
- Parenchyma: lozenge aliform paratracheal parenchyma are present
- Rays are storied medium
- Vessels are large and numerous (visible to the naked eye)
- Wood is **not** ring porous
- Wood is hard and heavy

![Figure E-15  Example of Platymiscium pleiostachyum (Cristobal, Granadillo) Wood Cross Section](image)
Podocarpus neriifolius (podocarp)

*Podocarpus neriifolius* (podocarp) is a softwood.

To identify the wood, check the following:

- Heartwood is light brown or tan
- Resin canals are absent
- Wood is light in color; soft, and lightweight

Figure E-16  Example of *Podocarpus neriifolius* (Podocarp) Wood Cross Section
**Podocarpus parlatorei (Parlatore’s podocarp)**

*Podocarpus parlatorei* (Parlatore’s podocarp) is a softwood.

To identify the wood, check the following:

- Heartwood is light brown or tan
- Resin canals are absent
- Wood is light in color, relatively soft and lightweight

![Podocarpus parlatorei Cross Section](image)

*Figure E-17  Example of Podocarpus parlatorei (Parlatore’s podocarp) Wood Cross Section*

**Prunus africana (African cherry, pygeum)**

*Prunus africana* (African cherry, pygeum) description and an example are **not** available.

**Pterocarpus spp. (African rosewood, kosso)**

*Pterocarpus* spp. (African rosewood, kosso) description and an example are **not** available.
**Pterocarpus santalinus (red sandalwood, redsanders)**

*Pterocarpus santalinus* (red sandalwood, redsanders) is a hardwood.

To identify the wood, check the following:

- Heartwood is dark red to reddish brown
- Parenchyma: aliform paratracheal parenchyma and prominent banded apotracheal parenchyma are present
- Rays are medium-storied
- Vessels are large and numerous
- Wood is **not** ring porous
- Wood is very hard and heavy

---

**Quercus mongolica (mongolian ash)**

*Quercus mongolica* (mongolian ash) is a hardwood. The description and an example are **not** available.

**Senna meridionalis (taraby)**

*Senna meridionalis* (taraby) description and an example are **not** available.
Swietenia humilis (Pacific Coast mahogany)

Swietenia humilis (Pacific Coast mahogany) is a hardwood.

To identify Swietenia humilis, confirm the following:

- Heartwood is reddish brown
- Parenchyma: prominent marginal parenchyma are present
- Rays are coarse-storied
- Vessels are large (easily visible with the naked eye), often in two or three radial multiples; black or red deposits are common in vessels
- Wood is not ring porous
- Wood is moderately hard and heavy

Figure E-19  Example of Swietenia humilis (Pacific Coast mahogany) Wood Cross Section
**Swietenia macrophylla (bigleaf mahogany)**

*Swietenia macrophylla* (bigleaf mahogany) is a hardwood.

To identify the wood, check the following:

- Heartwood is reddish brown
- Parenchyma: prominent marginal parenchyma
- Rays are coarse-storied
- Vessels are large (easily visible with naked eye), often in multiples of 2 or 3
- Wood is moderately hard and heavy

![Swietenia macrophylla (Bigleaf mahogany) Wood Cross Section](image)

**Swietenia mahogani (Caribbean mahogany)**

*Swietenia mahogani* (Caribbean mahogany) is a hardwood.

To identify the wood, check the following:

- Heartwood is reddish brown
- Parenchyma: prominent marginal parenchyma
- Rays are usually coarse-storied, but sometimes not storied
- Vessels are large (visible with the naked eye), often with radial multiples of two or three; reddish black or white deposits common
- Wood is not ring porous
- Wood is moderately hard and heavy

---

**Figure E-25 Example of *Swietenia mahogani* (Caribbean mahogany) Wood Cross Section**

---

**Tetracentron sinense (tetracentron)**

*Tetracentron sinense* (tetracentron) is a hardwood. The description and an example are not available.
Introduction

Use this glossary to find the meaning of specialized words, abbreviations, acronyms, and terms. To locate where in the manual a given definition, term or abbreviation is mentioned, refer to the index.

Definitions, Terms, and Abbreviations

**aliform paratracheal parenchyma (APP).** An arrangement of parenchyma cells, as seen in cross section, that are grouped around pores and form wing-like lateral extensions.

**artificially propagated.** Timber taken from trees grown in monospecific plantations.

**apotracheal parenchyma (AP).** Longitudinal (axial) parenchyma that is not associated with pores.

**banded apotracheal parenchyma (AP).** Layer or band of parenchyma cells not associated with the vessels within a growth ring.

**banded parenchyma.** Parenchyma cells that collectively appear as thin lines when viewed in cross section.

**cancel.** As relates to CITES documents used to import into the U.S., to stamp to show that the CITES document has been used.

**CITES Appendix I.** Includes species threatened with extinction. Trade in specimens of these species is permitted only in exceptional circumstances; commercial trade is prohibited.

**CITES Appendix II.** Includes species not necessarily threatened with extinction, but in which trade must be controlled in order to avoid utilization incompatible with their survival.

**CITES Appendix III.** Includes species that are protected in at least one country which has asked other CITES parties for assistance in controlling the trade of these species.
confluent paratracheal parenchyma (CPP). An arrangement of parenchyma cells that completely surrounds a vessel and extends to connect another vessel appearing as bands when viewed in cross section.

Conventions. Standard formats used in the manual, such as advisories, boldface, examples, etc.

country of origin. Country from which the tree was cut or removed.

deposits. Metabolites that accumulate in cells of wood.

earlywood (EW). First formed position of single growth ring, located on the inside portion of a growth ring. Characterized by large cells and low density.

engaged in commercial business. Trade for the purpose of selling, bartering, collecting, or otherwise as a livelihood or enterprise for gain or profit.

extract. Any substance obtained directly from plant material by physical or chemical means regardless of the manufacturing process. An extract may be solid (e.g. crystals, resin, fine or coarse particles), semi-solid (e.g. gums, waxes) or liquid (e.g. solutions, tinctures, oil and essential oils).

Finished musical instruments. A musical instrument (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is ready to play or needs only the installation of parts to make it playable. This term includes antique instruments (as defined by the Harmonized System codes 97.05 and 97.06; Works of art, collectors’ pieces and antiques).

Finished musical instrument accessories. A musical accessory (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is separate from the musical instrument, and is specifically designed or shaped to be used explicitly in association with an instrument, and that requires no further modification to be used.

Finished musical instrument parts. A part (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) of a musical instrument that is ready and is specifically designed and shaped to be used explicitly in association with the instrument to make it playable.
finished products packed and ready for retail trade. Products, shipped singly or in bulk, requiring no further processing, packaged labeled for final use or the retail trade in a state fit for being sold to or used by the general public.

general permit (GP). The general permit is no longer issued and is not valid. The general permit was replaced by the Protected Plant Permit (PPP).

growth ring (GR). The layer of wood added to the stem during one growth period.

hardwood. Woods from broad-leaved trees in the botanical group angiosperms, characterized by having vessels. Also referred to as porous woods.

Harmonized System of the World Customs Organization (HS). An international numerical system of tariff codes.

heartwood. Wood associated with the central portion of a mature tree, and no longer conducts sap. Infiltration of various organics impart a darker color to this wood.

latewood (LW). Later formed portion of a growth ring located on the outside portion of the growth ring. Characterized by smaller cells and higher density.

logs. All wood in the rough whether or not stripped of bark or sapwood, or roughly squared for processing, notably into sawn wood, pulpwood, or veneer sheets.

lozenge aliform paratracheal parenchyma (LAPP). Aliform paratracheal parenchyma that forms a lozenge shape.

lumber (sawn wood). Wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded, or finger-jointed, of a thickness exceeding 6mm.

Management Authority. A national authority designated in accordance with CITES Article IX as competent to grant permits and certificates.

marginal parenchyma. Cells of parenchyma forming a line at the beginning or end of the growth ring.

multiple vessel (MV). Several vessels adjacent and in-line to one another.
**Neotropics.** Includes the Caribbean, Central America, Mexico, and North America.

**Paratracheal parenchyma (PP).** Parenchyma that is associated with and often surrounds the vessels.

**Parenchyma.** Thin-walled wood cells noted for storage of food reserves appearing light-colored when grouped together, or in continuous bands when viewed in cross section.

**Party.** A State for which the present Convention has entered into force.

**Phloem.** Tissue of the inner bark that conducts food upward through the tree.

**Plywood.** Consisting of three or more sheets of wood that is glued and pressed one on the other and generally disposed so the grains of successive layers are at an angle.

**Pore.** Cross-section of a hardwood vessel.

**Powder.** A dry, solid substance in the form of fine or coarse particles.

**Protected Plant Permit (PPP).** USDA-issued permit required for the commercial trade of CITES or ESA regulated terrestrial plants.

**Radial.** A direction in wood perpendicular to the longitudinal grain direction.

**Radial section.** A section of wood cut in a plane parallel to the rays.

**Ray.** Flattened bands of tissue extending horizontally in a radial plan seen in cross section radiating in a direction from the center toward the bark of a tree.

**Re-export.** Export of any specimen that has previously been imported.

**Resin canal.** Tubular passageways in the wood of some softwoods.

**Ring porous wood (RPW).** Wood in which an arrangement of larger pores are concentrated in the earlywood and smaller pores are found in the latewood.

**Sawn wood.** See lumber (sawn wood).

**Scientific authority.** A national authority designated in accordance with CITES Article IX as responsible for determining if trade will be detrimental to the survival of the species.
**seizure date.** Date CBP or PPQ determines a shipment warrants forfeiture procedures and verifies the physical location of the shipment as either in a CBP- or PPQ-owned, leased, or approved facility within a Customs-bonded operation.

**shipment.** Cargo transported under the terms of a single bill of lading or waybill, irrespective of the quantity or number of containers, packages, or pieces.

**single vessel.** A vessel that is **not** adjacent to or touching another vessel.

**softwood.** Wood without vessels produced by coniferous trees in the botanical group gymnosperms. Also referred to as nonporous woods.

**Species (spp).** Any species, subspecies, or geographically separate population thereof.

**storied ray (SR).** Rays arranged side-by-side forming horizontal rows which appear as undulant bands seen in tangential section. There are three categories of storied rays: fine (more than 6 rows of rays per millimeter (mm)); medium (more 3 to 6 rows of rays per mm); coarse (2 rows or less per mm).

**tangential section.** Section of wood cut in a plane perpendicular to the rays.

**trade.** To export, re-export, or import.

**transformed wood.** Defined by Harmonized System code 44.09: Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed.

**transverse section (cross section).** Section of wood cut in a plane across the grain.

**tyloses.** Bubble-like structures that form in the vessels of certain hardwood species.

**veneer.** Thin layers of wood of uniform thickness, usually 6 mm or less, usually peeled or sliced for use in making plywood, for veneering furniture, veneer containers, etc.

**vessel (V).** A longitudinal conductive passageway formed by an aligned series of vessel elements.

**woodchips.** Wood that has been reduced to small pieces.
