<b>Veterinary Authority</b> Canadian Food Inspection Agency	<b>Date of Issue</b>	<b>Certificate Number</b>
<b>Certification Statements:</b>  I hereby certify that following due enquiry and to the best of my knowledge and belief, the birds covered under this health certificate comply with the following statements:		
1. <b>EITHER</b> During the ninety (90) days prior to export, the birds have been continuously maintained in the region of export. Any bird that was imported from a country other than the United States has met Canadian domestic residency requirements <input type="checkbox"/>		
<b>OR</b> The birds have been imported from a country other than the United States, have met all Canadian permanent entry conditions but have been in the region of export for less than ninety (90) days. The shipment will be accompanied by a health certificate from each country in which the birds have resided during the ninety (90) days prior to entry into the United States <input type="checkbox"/>		
2. The birds were inspected on the premises of origin within the thirty (30) days preceding the date of export and the birds were found to be clinically free of signs of communicable diseases of poultry.		
3. In so far as can be determined, the birds were not suspected to have any communicable disease of poultry during the ninety (90) days prior to the inspection date.		
4. The birds were not vaccinated for any H5 or H7 subtype of avian influenza.		
5. The birds were either: A. Not vaccinated against Newcastle disease <input type="checkbox"/>		
<b>OR</b> B. Vaccinated against Newcastle disease (avian paramyxovirus) at least twenty-one (21) days prior to export, using vaccines that do not contain any velogenic strains of Newcastle disease virus <input type="checkbox"/>		
Date: _____ Name and Manufacturer of vaccine: _____		
6. The birds either: A. Do not originate from and have not transited through a control zone established by the Canadian Food Inspection Agency (CFIA) due to outbreaks of Newcastle disease or Highly Pathogenic Avian Influenza (HPAI) and are not currently under quarantine nor have any restrictions to their movement <input type="checkbox"/>		
<b>OR</b> B. Do not originate from but will transit a control zone established by the CFIA due to outbreaks of Newcastle disease or HPAI and arrangements have been made for quarantine after importation. The exporter has been advised that the shipment must be handled without commingling with any of other avian animals after leaving the premises of origin <input type="checkbox"/>		
7. The exporter has been advised that the birds must be maintained in the region of export until movement of the shipment for export and the birds must be placed in new, clean containers or appropriately sanitized packaging materials prior to movement from the premises of origin.		
<b>Note:</b> The following is a <u>Canadian import requirement</u>		
<b>Pigeons that will be returning to Canada must be vaccinated prior to export to the USA for avian paramyxovirus at least thirty (30) days and not more than one hundred eighty (180) days prior to their departure.</b>		
*****Certificate shall be valid for 30 days from date of issue*****
