

Trade Samples (Human Food Items)

Denmark does not accept the Regulation (EU) 142/2011 Chapter 8 Health Certificate for trade samples of human foods. While Denmark does not require any government certification for these samples, the Danish importer must obtain an import permit, which will have special requirements for handling of the samples in Denmark.

For more information on obtaining import permit, the Danish importer may contact:

The Danish Veterinary and Food Administration

Head Office

Stationsparken 31-33
