WE WANT YOU:

To make your own ash tree ID poster! Follow this grid to redraw the ash leaf in a larger size.

Color it in ... and spread the word to protect ash trees from the Emerald Ash Borer Beetle (EAB)!

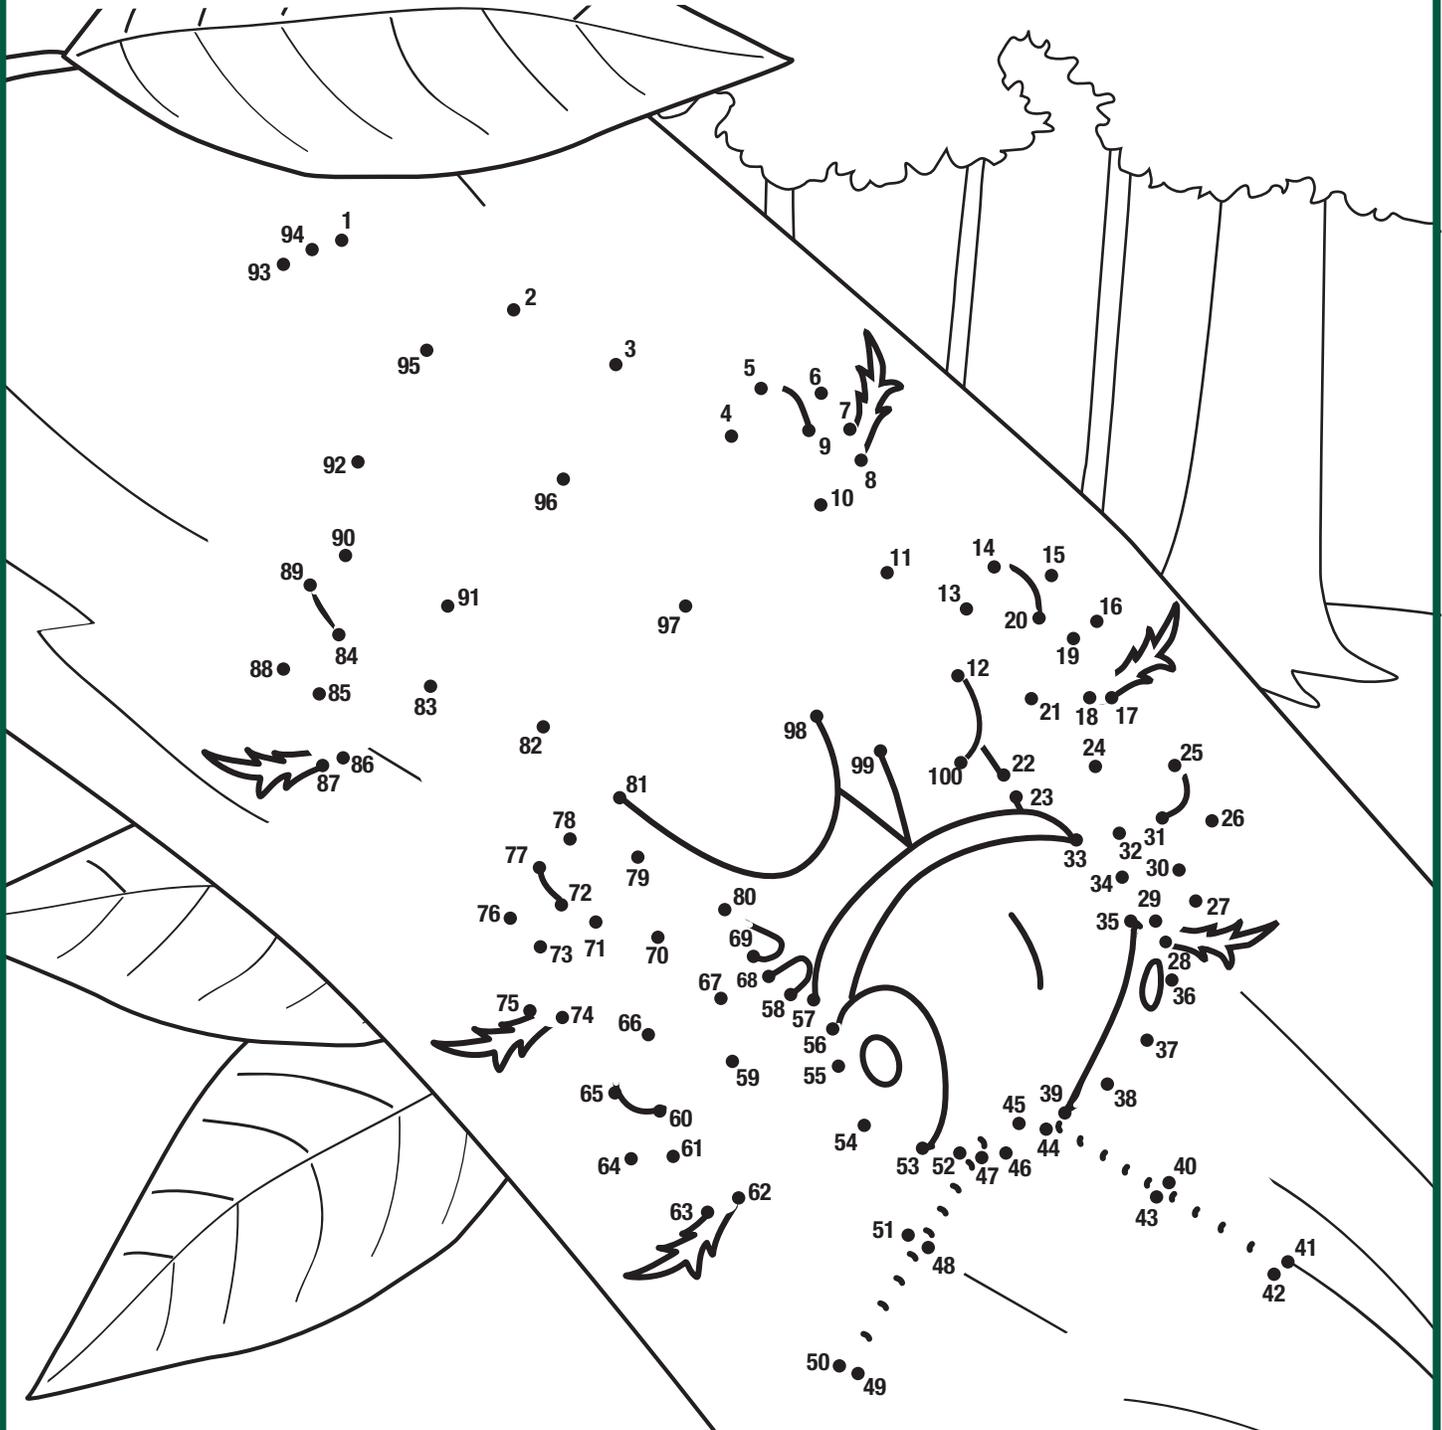

**Help USDA in its efforts to STOP the EAB.
It hides under the bark and destroys ash trees.**

Don't move firewood ... burn it where you buy it!

Dot-to-Dot Detective!

Something bad might be hiding under the bark of your firewood!
Connect the dots to see ...

This tiny pest can destroy ash trees ... but YOU can help stop the Emerald Ash Borer Beetle (EAB). Tell your family:
Don't move firewood - burn it where you buy it!

A Bug's Life (Cycle)

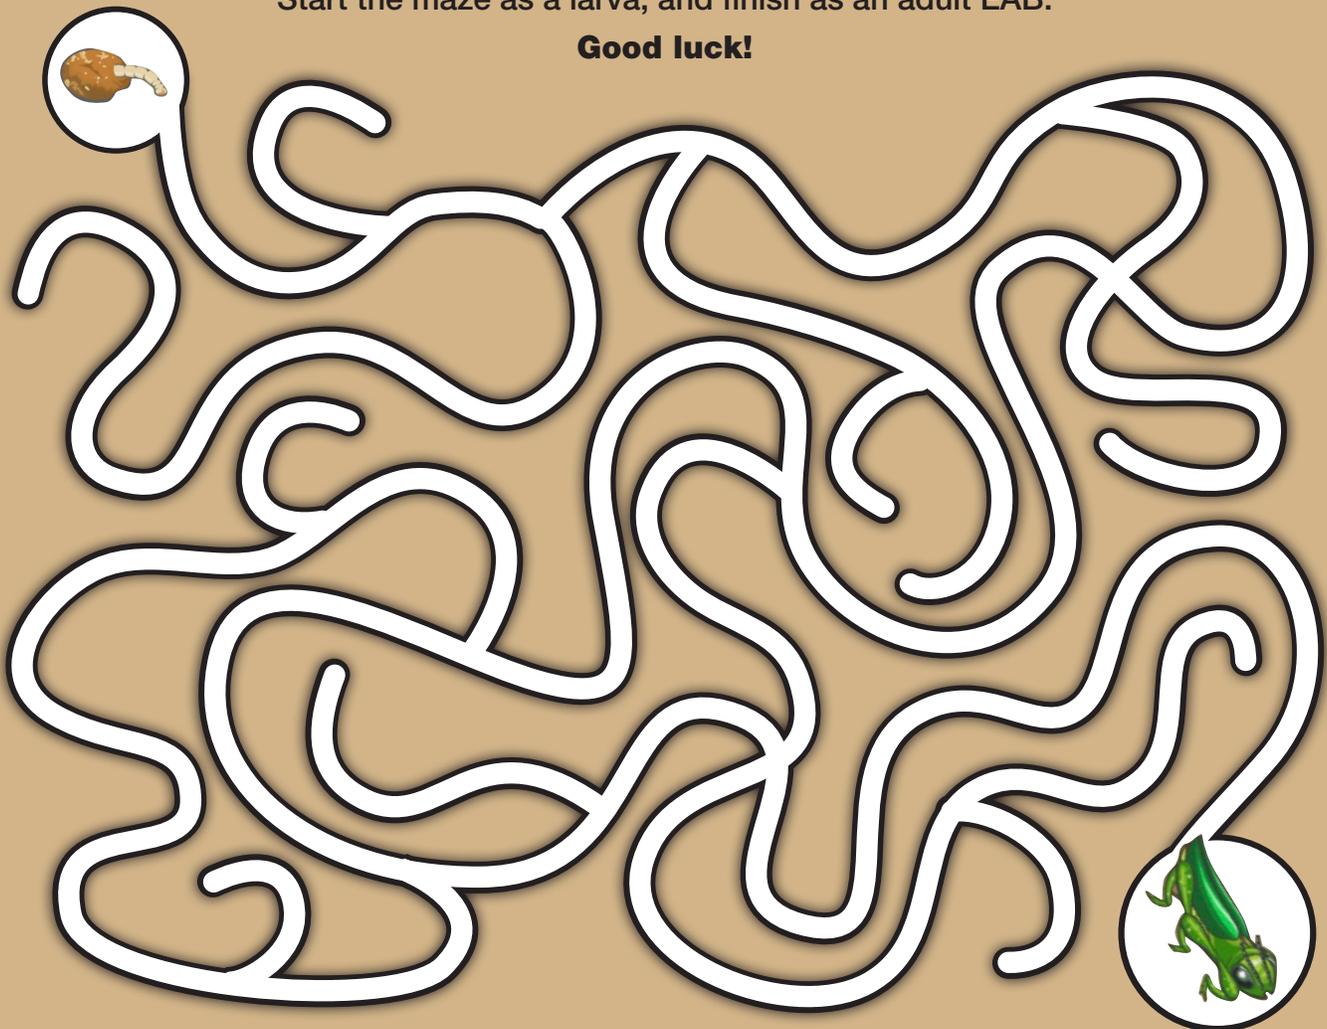

Can you follow the **Emerald Ash Borer Beetle (EAB)**'s life cycle?

The female EAB lays an egg . When the egg hatches, a larva  emerges. The larva burrows into the tree, where it begins to feed and develop under the bark. As it feeds, it makes S-shaped tunnels  that damage the tree. Eventually the larva turns into a pupa  and then an adult EAB . The adult EAB chews through the bark and escapes , leaving behind a D-shaped exit hole .

When the egg hatches, a larva emerges and burrows under the bark.

Start the maze as a larva, and finish as an adult EAB.

Good luck!

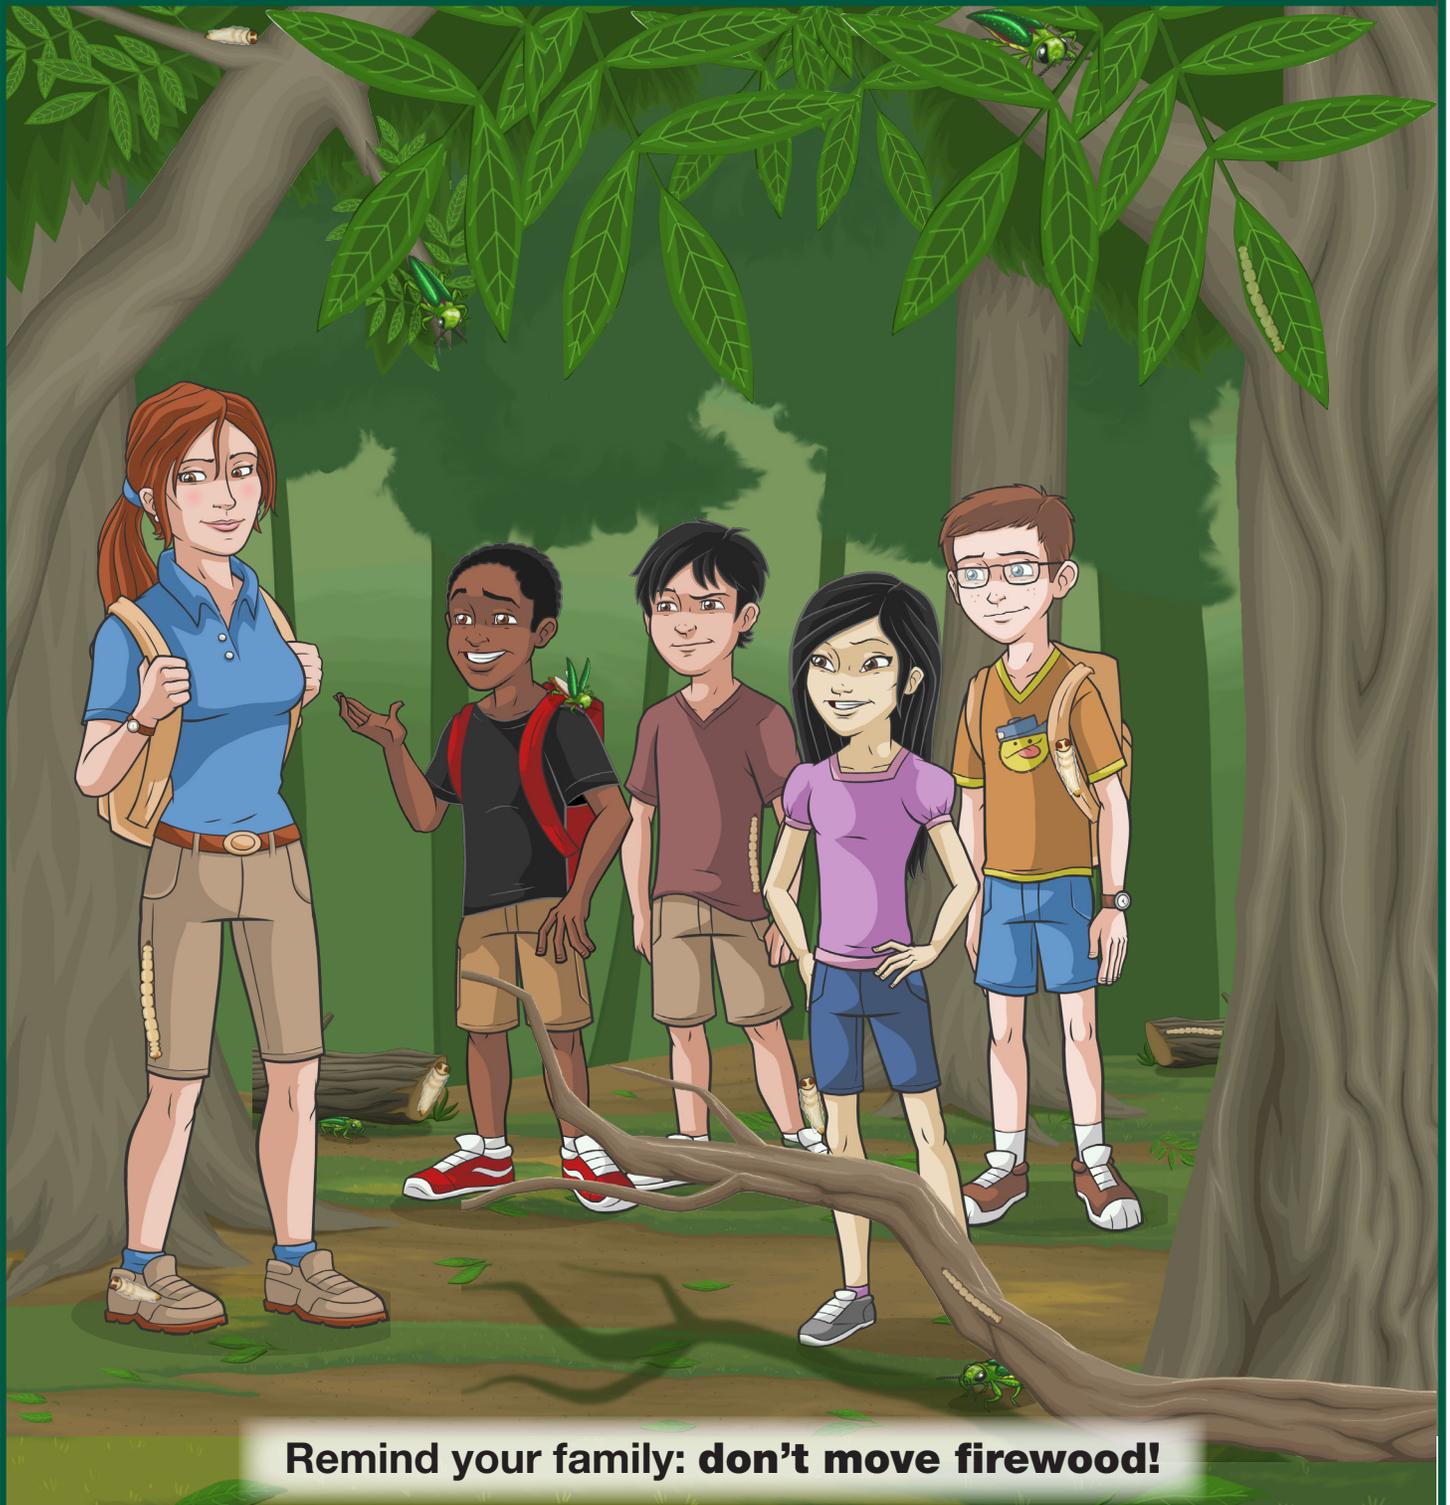

**YOU can help stop the EAB. Tell your family:
Don't move firewood ... and burn it where you buy it.**

Undercover Beetles...

The EAB is hard to spot in nature ... but don't be fooled!
They may be hidden, but they can kill trees if we don't stop them.

Can you find the **Emerald Ash Borer Beetles (EABs)** hidden in this picture?

There are 5 larva , 5 pupa  and 5 adult EABs .

Remind your family: don't move firewood!
