II.	Health information	II.a.	Certificate reference No	II.b.

- **II.1. Public health attestation** [to delete when the Union is not the final destination of treated raw materials]
 - I, the undersigned, hereby certify that the treated raw materials described in Part I:
 - II.1.1. have been derived from establishments under the control of and listed by the competent authority,

And

- (1) [II.1.2. have been derived from
 - bones, and/or
 - hides and skins of domestic and farmed ruminant animals, pigs and poultry described in Part I derived from animals which were slaughtered in a slaughterhouse and the carcases which were found to be fit for human consumption following ante- and post-mortem inspection,]

And/or

(1) [II.1.3. are wild game hides, skins and bones described in Part I derived from animals whose carcases were found to be fit for human consumption following post-mortem inspection,]

And/or

(1) [II.1.4. are the hides and skins that did not undergo any tanning process, regardless of whether this process was completed.]

And/or

(1) [II.1.5. are the fish skins and bones derived from plants that produce fishery products for human consumption which are authorised for export of these products,]

And

- (1) Either [II.1.6. are dried bones of species from bovine, ovine, caprine, and porcine animals, including farmed and wild animals, poultry, ratites and feathered game for the production of gelatine and collagen, and they are derived from healthy animals slaughtered in a slaughterhouse, and they have been treated as follows:
 - (4) [crushed to pieces of approximately 15 mm and degreased with hot water at a minimum temperature of 70 °C for at least 30 minutes, a minimum of 80 °C for at least 15 minutes, or a minimum of 90 °C for at least 10 minutes; then separated and subsequently washed and dried for at least 20 minutes in a stream of hot air with an initial minimum temperature of 350 °C, or for 15 minutes in a stream of hot air with an initial temperature of over 700 °C,], or,
 - 1) [sun-dried for a minimum of 42 days at an average temperature of at least 20°C,], or,

[have undergone an acid treatment such that the pH maintained at less than 6 to the core for at least one how before drying,] [II.1.6.are hides and skins of farmed ruminant animals, pig skins poultry skins or wild game hides and skins that are derived from health animals and they: (1) [have undergone an alkali treatment which ensures a PH>1 to the core followed by salting for at least seven days,], or [were dried for at least 42 days at a temperature of at least 42 days at a temperature of at least 45 days at a temperature of at least 45 days at a temperature of at least 46 days at a temperature of at least 47 days at a temperature of at least 48 days at a d
poultry skins or wild game hides and skins that are derived from health animals and they: (1) [have undergone an alkali treatment which ensures a PH>1 to the core followed by salting for at least seven days,], or (1) [were dried for at least 42 days at a temperature of at least
to the core followed by salting for at least seven days,], or (1) [were dried for at least 42 days at a temperature of at least
20 °C,], or,
[have undergone an acid treatment that provides at least pH of less than 5 to the core for a minimum of one hour,] or
(4) [have undergone an alkali treatment which ensures a pH- 12 to the core for at least 8 hours,]]
[II.1.6 are bones, hides or skins of farmed ruminant animals, pig skins poultry skins, fish skins and wild game hides and skins from this countries or regions thereof referred to in Article 19 to Commission Implementing Regulation (EU) 2021/405 ^A , they have undergone an other treatment than those listed above, and come from a third country or region thereof, listed for entry into the Union of fresh meat or fisher products of the species of origin in accordance with Article 20(6) of Implementing Regulation (EU) 2021/405, and
(1)-{II.1.7. in the case of treated raw materials of bovine, ovine and caprine animal original and except for hides and skins,
(1) either [the country or region of origin is classified in accordance with Commissic Decision 2007/453/ECB as a country or region posing a negligible bovin spongiform encephalopathy (BSE) risk, and (5)
(1) [the animals from which the treated raw material is derived were born continuously reared and slaughtered in a country or region classified accordance with Decision 2007/453/EC as a country or region posing negligible BSE risk in which there have been no BSE indigenous cases;
