COUNTRY UNITED STATES				Certificate model BOV-SEM-A-ENTRY						
	II. Health information				Certificate reference	e I	II.b	IMSOC reference		
	I, the u	_	fficial veterinarian, hereby certify that							
	II.1.		described in Part I is intended for artinate from a third country, territory or	nded for artificial reproduction and was obtained from donor animals territory or zone thereof						
		II.1.1.	authorised for entry into the Union of semen of bovine animals and listed in Annex IX to Commission Implementing Regulation (EU) 2021/404;							
	<sup>(1)</sup> either	·[II.1.2.	where foot-and-mouth disease was not reported for a period of at least 24 months immediately prior to collection of the semen and until its date of dispatch;]							
	<sup>(1)</sup> or [II.1.2.		where foot-and-mouth disease was not reported for a period starting on the date <sup>(2)</sup>							
		II.1.3. where infection with rinderpest virus			, infection with Rift Valley fever virus, contagious bovine sease were not reported for a period of at least 12 months e semen and until its date of dispatch;					
		II.1.4.	with Rift Valley fever virus and contaperiod of at least 12 months immedia	nd-mouth disease, infection with rinderpest virus, infection atagious bovine pleuropneumonia has been carried out for a diately prior to collection of the semen and until its date of ls entered into the third country, territory or zone thereof						
	II.2.		on described in Part I was obtained from donor animals which, before the commencement of the e referred to in point II.4.8., originate from establishments							
ification		II.2.1.	situated in an area where foot-and-mouth disease has not been reported within a 10-km radius centred on the establishment for a period of at least 30 days and in which foot-and-mouth disease has not been reported during a period of at least 3 months, and							
ert		<sup>(1)</sup> eithe	r [they were not vaccinated against foo	foot-and-mouth disease;]						
Part II: Certification		<sup>(1)</sup> 01	the date of collection of the sement prior to the date of collection of the quantity of semen taken from a done for foot-and-mouth disease with neg	out no semer or anii	t during the period n, and 5 % (with a mal at any time is	d of the minim	e last 3 num of	30 days immediately five straws) of each		
		II.2.2.	free from infection with <i>Mycobacter tuberculosis</i> ) and they have never be status;							
		II.2.3.	free from infection with <i>Brucella ab</i> kept previously in any establishment				and th	hey have never been		
	<sup>(1)</sup> either [II.2.4.		free from enzootic bovine leukosi establishment of a lower health status	is and they have never been kept previously in a s;]			previously in any			
			and have been produced by dams	ovine leukosis and the donor animals are younger than 2 years of d by dams which have been subjected, with negative results, otic bovine leukosis after removal of the animal from the dam;]			egative results, to a			
	<sup>(1)</sup> 01	· [II.2.4.	not free from enzootic bovine leukos and have been subjected, with a no leukosis;]					~ .		
	-		free from infectious bovine rhinotra never been kept previously in any est		-		_	initis and they have		
	(1) or [II.2.5. not free from infectious bovine rh				notracheitis/infectious pustular vulvovaginitis and the donor a negative result, to a serological test (whole virus) on a					
		II.2.6.	in which surra (Trypanosoma evansi)		=	_				
		<sup>(1)</sup> eithei	· [surra has not been reported in the es	tablis	hments during the	last 2	years;]			

- (1) or [surra has been reported in the establishments during the last 2 years and following the last outbreak the establishments have remained under movement restrictions until
  - the infected animals have been removed from the establishment, and
  - the remaining animals on the establishment have been subjected to a test for surra (*Trypanosoma evansi*) with one of the diagnostic methods provided for in Part 3 of Annex I to Commission Delegated Regulation (EU) 2020/688, carried out, with negative results, on samples taken at least 6 months after the infected animals have been removed from the establishment.]
- II.3. The semen described in Part I has been collected, processed and stored, and dispatched from the semen collection centre<sup>(3)</sup> which
  - II.3.1. is approved and listed by the competent authority of the third country or territory;
  - II.3.2. complies with requirements as regards responsibilities, operational procedures, facilities and equipment set out in Part 1 of Annex I to Commission Delegated Regulation (EU) 2020/686.
- II.4. The semen described in Part I was obtained from donor animals which
  - II.4.1. were not vaccinated against infection with rinderpest virus, infection with Rift Valley fever virus, contagious bovine pleuropneumonia and lumpy skin disease;
  - II.4.2. remained for a period of at least 6 months prior to the date of collection of the semen in a third country or territory or zone thereof referred to in Box I.7.;
  - II.4.3. did not show symptoms or clinical signs of transmissible animal diseases on the day of their admission to a semen collection centre and on the day of collection of the semen;
  - II.4.4. are individually identified as provided for in Article 21(1) of Commission Delegated Regulation (EU) 2020/692;
  - II.4.5. for a period of at least 30 days prior to the date of collection of the semen and during the collection period
    - II.4.5.1. were kept on establishments not situated in a restricted zone established due to the occurrence of foot-and-mouth disease, infection with rinderpest virus, infection with Rift Valley fever virus, contagious bovine pleuropneumonia or lumpy skin disease, or of an emerging disease relevant for bovine animals;
    - II.4.5.2. were kept on a single establishment where infection with *Brucella abortus*, *B. melitensis* and *B. suis*, infection with *Mycobacterium tuberculosis* complex (*M. bovis*, *M. caprae and M. tuberculosis*), rabies, anthrax, surra (*Trypanosoma evansi*), enzootic bovine leukosis, infectious bovine rhinotracheitis/infectious pustular vulvovaginitis, bovine viral diarrhoea, infection with epizootic haemorrhagic disease virus, infection with bluetongue virus (serotypes 1-24), bovine genital campylobacteriosis and trichomonosis have not been reported;
    - II.4.5.3. were not in contact with animals from establishments situated in a restricted zone due to the occurrence of diseases referred to in point II.4.5.1. or from establishments which do not meet the conditions referred to in point II.4.5.2.;
    - II.4.5.4. were not used for natural breeding;
  - II.4.6. have been subjected to a quarantine for a period of at least 28 days in quarantine accommodation, where only other cloven-hoofed animals with at least the same health status were present, which on the day of their admission to the semen collection centre complied with the following conditions:
    - II.4.6.1. it was not situated in a restricted zone established due to diseases referred to in point II.4.5.1.;
    - II.4.6.2. none of the diseases referred to in point II.4.5.2. has been reported for a period of at least 30 days;
    - II.4.6.3. it was situated in an area where foot-and-mouth disease has not been reported within a 10-km radius centred on the quarantine accommodation for a period of at least 30 days;

(l)ei	ther [II.4.9.1.	the semen	been kept for a period of at least 60 days prior to and during collection of in a third country, territory or zone thereof where EHDV 1-7 has not been r a period of at least the preceding 2 years within a radius of 150 km of the ent;]
(1)ar	nd/or [II.4.9.2.		been kept in a vector-protected establishment for a period of at least 60 days during collection of the semen;]
(1) ar	nd/or [II.4.9.3.	following	ent in the exporting country in which according to official findings the serotypes of EHDV exist:
			a serological test to detect antibodies to EHDV 1-7, with negative results, at least every 60 days throughout the collection period and between 28 and 60 days from the date of the final collection of the semen;]]
	<sup>(1)</sup> and/or	[II.4.9.3.2.	an agent identification test for EHDV 1-7, with negative results, on blood samples taken at the commencement and final collection of the semen and during the collection of the semen at intervals of at least every 7 days, in the case of virus isolation test, or of at least every 28 days, in the case of PCR.]]
II.4.	of 30 d negative II.4.10.5	ays prior to results, ex 5.2., required	to the following tests, carried out on blood samples taken within the period the commencement of the quarantine referred to in point II.4.6., with cept for the bovine viral diarrhoea antibody test referred to in point d in accordance with point 1(b) of Chapter I of Part 1 of Annex II to n (EU) 2020/686:
	II.4.10.	M. tube	ction with <i>Mycobacterium tuberculosis</i> complex ( <i>M. bovis, M. caprae</i> and <i>orculosis</i> ), an intradermal tuberculin test referred to in point 1 of Part 2 of I to Delegated Regulation (EU) 2020/688;
	II.4.10.2	referred	ction with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> , a serological test to in point 1 of Part 1 of Annex I to Delegated Regulation (EU) 2020/688;
	_	Annex	potic bovine leukosis, a serological test referred to in point (a) of Part 4 of I to Delegated Regulation (EU) 2020/688;]
	II.4.10.4	serolog	fectious bovine rhinotracheitis/infectious pustular vulvovaginitis, a ical test (whole virus) on a blood sample if the animals do not come from blishment free from infectious bovine rhinotracheitis/infectious pustular aginitis;
	II.4.10.5		ine viral diarrhoea:
			5.1. a virus isolation test, a test for virus genome or a test for virus antigen, and
			5.2. a serological test to determine the presence or absence of antibodies;
II.4.			to the following tests, carried out on blood samples taken within a period
			r 7 days in the case of the tests referred to in points II.4.11.4. and II.4.11.5., ment of the quarantine referred to in point II.4.6., with negative results,
			e viral diarrhoea antibody test referred to in point II.4.11.3.2., required in
		nce with poi	nt 1(c) of Chapter I of Part 1 of Annex II to Delegated Regulation (EU)
	II.4.11.		ction with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> , a serological test to in point 1 of Part 1 of Annex I to Delegated Regulation (EU) 2020/688;
	II.4.11.2		fectious bovine rhinotracheitis/infectious pustular vulvovaginitis, a ical test (whole virus) on a blood sample;
	II.4.11.3	3. for bov	ine viral diarrhoea:

			II.4.11.3.1. a virus isolation test, a test for virus genome or a test for virus antigen, and
			II.4.11.3.2. a serological test to determine the presence or absence of antibodies;
		II.4.11.4.	for bovine genital campylobacteriosis (Campylobacter fetus ssp. venerealis):
		<sup>(1)</sup> either	[II.4.11.4.1. a single test carried out on a sample of artificial vagina washings or preputial specimen, in the case of animals less than 6 months old or kept since that age in a single sex group without contact with females prior to the quarantine referred to in point II.4.6.;]
		<sup>(1)</sup> or	[II.4.11.4.2. tests carried out on samples of artificial vagina washings or preputial specimens taken on three occasions at intervals of at least 7 days;]
		II.4.11.5.	for trichomonosis ( <i>Trichomonas foetus</i> ):
		<sup>(1)</sup> either	[II.4.11.5.1. a single test carried out on a sample of preputial specimen, in the case of animals less than 6 months old or kept since that age in a single sex group without contact with females prior to the quarantine referred to in point II.4.6.;]
		<sup>(1)</sup> or	[II.4.11.5.2. tests carried out on preputial specimens taken on three occasions at intervals of at least 7 days;]
	II.4.12.	routine tests	ubjected at semen collection centre, at least once a year, to the following compulsory s, required in accordance with point 2 of Chapter I of Part 1 of Annex II to Delegated (EU) 2020/686:
		II.4.12.1.	for infection with <i>Mycobacterium tuberculosis</i> complex ( <i>M. bovis, M. caprae</i> and <i>M. tuberculosis</i> ), an intradermal tuberculin test referred to in point 1 of Part 2 of Annex I to Delegated Regulation (EU) 2020/688;
		II.4.12.2.	for infection with <i>Brucella abortus</i> , <i>B. melitensis</i> and <i>B. suis</i> , a serological test referred to in point 1 of Part 1 of Annex I to Delegated Regulation (EU) 2020/688;
		II.4.12.3.	for enzootic bovine leukosis, a serological test referred to in point (a) of Part 4 of Annex I to Delegated Regulation (EU) 2020/688;
		II.4.12.4.	for infectious bovine rhinotracheitis/infectious pustular vulvovaginitis, a serological test (whole virus) on a blood sample;
			for bovine viral diarrhoea, a serological test for detection of an antibody;]
		<sup>(1)(8)</sup> [II.4.12.6.	for bovine genital campylobacteriosis ( <i>Campylobacter fetus ssp. venerealis</i> ), a test on a sample of preputial specimen;]
		<sup>(1)(8)</sup> [II.4.12.7.	for trichomonosis ( <i>Trichomonas foetus</i> ), a test on a sample of preputial specimen;]
II.5.		nen described in	Part I
	II.5.1.		llected, processed and stored in accordance with animal health requirements set out I to Delegated Regulation (EU) 2020/686;
	II.5.2.	requiremen	n straws or other packages on which the mark is applied in accordance with ts provided for in Article 83(a) of Delegated Regulation (EU) 2020/692 and that icated in Box I.27;
	II.5.3.	is transport	ed in a container which:
		II.5.3.1.	was sealed and numbered prior to the dispatch from the semen collection centre under responsibility of the centre veterinarian, or by an official veterinarian, and the seal bears the number as indicated in Box I.19;
		II.5.3.2.	has been cleaned and either disinfected or sterilised before use, or is single-use container;
		<sup>(1)(4)</sup> [II.5.3.3.	has been filled in with the cryogenic agent which not have been previously used for other products.]
II.6.	The sen	nen is preserved	by the addition of antibiotics as follows:

- II.6.1. The following antibiotic or mixture of antibiotics, effective in particular against campylobacters, leptospires and mycoplasmas, has been added to the semen after final dilution, or is contained in the used semen diluents, to reach the indicated concentration per ml of semen:
- (1)either [a mixture of gentamicin (250 μg), tylosin (50 μg) and lincomycin-spectinomycin (150/300 μg);]
- [a mixture of lincomycin-spectinomycin (150/300  $\mu$ g), penicillin (500 IU) and streptomycin (500  $\mu$ g);
- (1) or [a mixture of amikacin (75  $\mu$ g) and divekacin (25  $\mu$ g);
- [an antibiotic or a mixture of antibiotics<sup>(9)</sup> ......, with a bactericidal activity at least equivalent to one of the following mixtures:
  - gentamicin (250 μg), tylosin (50 μg) and lincomycin-spectinomycin (150/300 μg);
  - lincomycin-spectinomycin (150/300 μg), penicillin (500 IU) and streptomycin (500 μg);
  - amikacin (75 μg) and divekacin (25 μg).]
- II.6.2. Immediately after the addition of the antibiotics, and before any possible freezing, the diluted semen was kept at a temperature of at least 5°C for a period of not less than 45 minutes, or under a time-temperature regime with a documented equivalent bactericidal activity.

## Notes

This certificate is intended for entry into the Union of semen of bovine animals, including when the Union is not the final destination of the semen.

In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland / Northern Ireland in conjunction with Annex 2 to that Protocol, references to European Union in this certificate include the United Kingdom in respect of Northern Ireland.

This animal health certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235.

### Part I:

Box reference I.11: "Place of dispatch": Indicate the unique approval number and the name and address of

the semen collection centre of dispatch of the consignment of semen. Only semen collection centres listed in accordance with Article 233(3) of Regulation (EU) 2016/429

on the Commission website:

http://ec.europa.eu/food/animal/semen ova/bovine/index en.htm

Box reference I.12: "Place of destination": Indicate the address and unique registration or approval number

of the establishment of destination of the consignment of semen.

Box reference I.19: Seal number shall be indicated.

Box reference I.24: Total number of packages shall correspond to the number of containers.

Box reference I.27: "*Type*": Indicate semen.

"Species": Select amongst "Bos taurus", "Bison bison" or "Bubalus bubalis" as

appropriate.

"Identification number": Indicate identification number of each donor animal.

"Identification mark": indicate mark on the straw or other packages where semen of the consignment is placed.

"Date of collection/production": Indicate the date on which semen of the consignment was collected.

"Approval or registration number of plant/establishment/centre": Indicate the unique approval number of the semen collection centre where the semen was collected.

"Quantity": Indicate number of straws or other packages with the same mark.

"Test": Indicate for BTV-test: II.4.8.5. and/or II.4.8.6., and/or for EHD-test: II.4.9.3.1.

# **COUNTRY UNITED STATES**

and/or II.4.9.3.2., if relevant.

## Part II:

- Delete if not applicable.
- Only for a third country, territory or zone thereof with opening date in accordance with column 9 of the table in part 1 of Annex II to Implementing Regulation (EU) 2021/404.
- Only semen collection centres listed in accordance with Article 233(3) of Regulation (EU) 2016/429 on the Commission website: http://ec.europa.eu/food/animal/semen\_ova/bovine/index\_en.htm .
- Applicable for frozen semen.
- (5) Applicable for fresh and chilled semen.
- Not applicable to animals which come from an establishment not free from enzootic bovine leukosis and which are less than 2 years of age as referred to in Article 20(2)(a) of Delegated Regulation (EU) 2020/686.
- Applicable only to seronegative animals.
- Applicable only to bulls in semen production or having contact with bulls in semen production. Bulls returning to collection after a lay-off period of more than 6 months shall be tested during a period of 30 days prior to resuming production.

(9) Insert the name(s) of the antibiotic(s) added and its(their) condiluent containing antibiotics.	ncentration or the commercial name of the semen
