## Part II. Certification

### Animal Health

I, the undersigned official veterinarian, certify that the treated raw materials described in Part I of this certificate consist of animal products that satisfy the animal health requirements below and:

#### AH/T004 Territory health requirements

have been obtained in the country(ies) or region(s) thereof of:

(\*)**EITHER** (\*)[.....]

(\*)**AND/OR** (\*)[.....] from:.....;

#### AH/P003 Production requirements

have been obtained and prepared without contact with other materials that do not comply with the conditions required above, and have been handled so as to avoid contamination with pathogenic agents;

#### AH/P553 Product requirement (storage)

have been transported in clean and sealed containers or lorries;

### Public Health

I, the undersigned, certify that the treated raw materials described in Part I of this certificate comply with the following requirements:

#### PH/E200 Establishment requirements

they have been derived from establishments under the control of and listed by the competent authority;

#### PH/MS004 Raw material requirements

(\*)[if of bovine, ovine and caprine animal origin, except for hides and skins of ruminants, they have been derived from animals which passed ante-mortem and post-mortem inspections;]

[the raw materials are

(\*)**EITHER** [derived from domestic and farmed ruminant animals, pigs and poultry animals which were slaughtered in a slaughterhouse and have been found fit for human consumption following ante and post-mortem inspections;]

~~(\*)**AND/OR** [derived from killed wild game animals whose carcasses have been found to be fit for human consumption following post-mortem inspection;]~~

~~(\*)**AND/OR** [fish materials derived from plants that manufacture fishery products for human consumption which are authorised for export;]~~

#### PH/MS500 Regulated treatments

~~(\*)**EITHER** [they are dried bones from bovine, ovine, caprine, porcine and equine animals, including farmed and wild animals, poultry including ratites and feathered game for the production of gelatine and collagen, and they are derived from healthy animals slaughtered in a slaughterhouse, and they have been subject to regulated treatment (\*)[A] (\*)[B] (\*)[C] as set out in the notes for completion, meeting GB regulations;]~~

~~(\*)**OR** [if they are hides and skins of farmed ruminant animals, pig skins, poultry skins or wild game hides and skins, they are derived from healthy animals subject to regulated treatment (\*)[A] (\*)[B] (\*)[C] (\*)[D], as set out in the notes for completion, meeting GB regulations;]~~

(\*)**OR** [if they originate from listed third countries, parts of third countries or regions thereof referred to in GB regulations, not having undergone a regulated treatment as referred above, they come from establishments registered or approved in accordance with GB regulations;]

#### PH/D009 Bovine spongiform encephalopathy (BSE)

~~(\*)[if of bovine, ovine and caprine animal origin, except for hides and skins of ruminants;~~

~~(\*)**EITHER** (1) [the country or region is classified with a negligible BSE risk and;~~

~~(a) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning;~~

~~(b) the product does not contain and is not derived from specified risk material in compliance with GB regulations;~~

~~(\*)[(c) if the product contains or is derived from bovine, ovine or caprine mechanically separated meat that it complies with GB regulations;]]~~

~~(\*)[(d) if the animals originate from a country or region classified with an undetermined BSE risk and:~~

~~(i) they have not been fed with meat and bone meal or greaves, and~~

~~(ii) the product was produced and handled in compliance with GB regulations with regard to contamination with nervous and lymphatic tissues;]]~~

~~(\*)AND/OR (2) [the country or region is classified as posing a controlled BSE risk and:~~

~~(a) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning; and~~

~~(b) the product does not contain and is not derived from specified risk material or mechanically separated meat in compliance with GB regulations;]~~

~~(\*)AND/OR (3) [the country or region is classified as posing an undetermined BSE risk and:~~

~~(a) the animals were not fed meat and bone meal or greaves derived from ruminants;~~

~~(b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning; and~~

~~(c) the product does not contain and is not derived from specified risk material; nervous and lymphatic tissues exposed during the deboning process; or mechanically separated meat in compliance with GB regulations;]]~~

(\*) Keep as appropriate.

### Official Veterinarian

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.

Name (in capital letters):

Qualification and title:

Date:

Signature:

Stamp:

### Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

### Part I

- Box reference I.8: Provide the code of the territory as it appears in:
- a document relating to 'poultry and poultry products' published on gov.uk, in accordance with Commission Regulation (EC) No 798/2008 or
  - a document relating to 'meat of wild leporidae, certain wild land mammals and of farmed rabbits' published on gov.uk, in accordance with Commission Regulation No 119/2009 or
  - a document relating to 'fresh meat of ungulates' published on gov.uk, in accordance with Commission Regulation (EU) No 206/2010. <sup>(†)</sup>
- Box reference I.25: Insert the appropriate Harmonised System (HS) code(s) such as: 0210, 0305, 0505, 0506, 0511 91, 0511.99, 1602, 1604, 4101, 4102 or 4103.
- Box reference I.25: *Nature of commodity:* hides, skins, bones, tendons and sinews; *Manufacturing plant:* includes slaughterhouse, factory vessel, cutting plant, game handling establishment and processing plant.
- Approval number:* when applicable

### Part II

#### Animal Health

In the case of products derived from fishery products, the whole section "Animal health" should be deleted.

#### AH/T004 Territory health requirements

Insert the name and ISO code number of the exporting country or territory or zone as laid down in: Documents relating to 'fresh meat of ungulates', 'poultry and poultry products' and 'meat of wild *leporidae*, of certain wild land mammals and of farmed rabbits' published by the Secretary of State, with the consent of the Scottish and Welsh Ministers. <sup>(†)</sup>

If parts of the materials were derived from animals originating from an(other) third country(ies) or regions thereof listed Article 15 or 16 (only when treated as laid down in the public health attestations) to Implementing Regulation (EU) 2019/626, the code(s) of country(ies) or region(s) shall be stated.

#### AH/P003 Production requirements

No further notes for completion.

#### AH/P553 Product requirement (storage)

No further notes for completion.

## Public Health

By signing this certificate, you, the undersigned, are certifying that the treated raw materials described in Part I of this certificate comply with the following requirements:

### PH/E200 Establishment requirements

They have been derived from establishments under the control of and listed by the competent authority.

### PH/MS004 Raw material requirements

If of bovine, ovine and caprine animal origin, they have been derived from animals which passed ante-mortem and post-mortem inspections.

The raw materials being:

- EITHER** Bones, hides and skins of domestic and farmed ruminant animals, pigs and poultry, as well as tendons and sinews must be derived from animals which were slaughtered in a slaughterhouse and the carcasses of which were found to be fit for human consumption following ante- and post-mortem inspection.
- AND/OR** ~~In the case of wild game hides, skins and bones, they are derived from killed animals whose carcasses have been found to be fit for human consumption following post-mortem inspection.~~
- AND/OR** ~~In the case of fish skins and bones, they are derived from plants that manufacture fishery products for human consumption which are authorised for export.~~

### PH/MS500 Regulated treatments

- EITHER** ~~They are dried bones of species from bovine, ovine, caprine, porcine and equine animals, including farmed and wild animals, poultry including ratites and feathered game for the production of gelatine and collagen, and they are derived from healthy animals slaughtered in a slaughterhouse, and they have been treated as follows:~~
- ~~(A) either crushed to pieces of approximately 15 mm and degreased with hot water at a minimum temperature of 70°C for at least 30 minutes, a minimum of 80°C for at least 15 minutes, or a minimum of 90°C for at least 10 minutes; then separated and subsequently washed and dried for at least 20 minutes in a stream of hot air with an initial minimum temperature of 350°C, or for 15 minutes in a stream of hot air with an initial temperature of over 700°C, or~~
- ~~(B) sun-dried for a minimum of 42 days at an average temperature of at least 20°C, or~~
- ~~(C) have undergone an acid treatment such that the pH is maintained at less than 6 to the core for at least one hour before drying.~~
- OR** ~~If they are hides and skins of farmed ruminant animals, pig skins, poultry skins or wild game hides and skins, they are derived from healthy animals and they:~~
- ~~(A) either have undergone an alkali treatment which ensures a pH > 12 to the core followed by salting for at least seven days, or~~
- ~~(B) were dried for at least 42 days at a temperature of at least 20°C, or~~
- ~~(C) have undergone an acid treatment that provides at least a pH of less than 5 to the core for a minimum of one hour, or~~
- ~~(D) have undergone an alkali treatment which ensures a pH > 12 to the core for at least 8 hours.~~
- OR** If they are bones, hides or skins of farmed ruminant animals, pig skins, poultry skins, fish skins and wild game hides and skins from third countries, parts of third countries or regions thereof referred to in Article 15 to Commission Implementing Regulation (EU) 2019/626, that they have undergone any other treatment than those listed above, and that they come from establishments registered or approved in accordance with Regulation (EC) No 852/2004 or in accordance with Regulation (EC) No 853/2004.

**PH/D009 Bovine spongiform encephalopathy (BSE)**

In the case of treated raw materials of bovine, ovine and caprine animal origin, except for hides and skins of ruminants:

- ~~(1) This must be certified when they come from a country or a region classified in accordance with Regulation (EC) No 999/2001 as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK.<sup>(1)</sup>~~
- ~~(a) The animals, from which the treated raw materials are derived, were not slaughtered after stunning by means of gas injected into the cranial cavity or killed by the same method or slaughtered, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, except if the animals were born, continuously reared and slaughtered in a country or region classified in accordance with Regulation (EC) No 999/2001 as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK.<sup>(2)</sup>~~
- ~~(b) They do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001.~~
- ~~(c) They do not contain and are not derived from mechanically separated meat obtained from bones of bovine, ovine or caprine animals, except for treated raw materials derived from animals that were born, continuously reared and slaughtered in a country or region classified in accordance with Regulation (EC) No 999/2001 as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK<sup>(2)</sup> and in which there has been no indigenous BSE cases.~~
- ~~(d) In the case that the animals, from which the treated raw materials are derived, originate from a country or region classified in accordance with Regulation (EC) No 999/2001 as posing an undetermined BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK<sup>(1)</sup>, the animals were not fed with meat and bone meal or greaves, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health; and the treated raw materials were produced and handled in a manner which ensures that they did not contain and were not contaminated with nervous and lymphatic tissues exposed during the deboning process.~~
- ~~(2) This must be certified when they come from a country or a region classified in accordance with Regulation (EC) No 999/2001 as posing a controlled BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK.<sup>(1)</sup>~~
- ~~(a) The animals, from which the treated raw materials of bovine, ovine and caprine animal origin intended for export are derived, were not killed, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity.~~
- ~~(b) The treated raw materials of bovine, ovine and caprine animal origin do not contain and are not derived from specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001, or mechanically separated meat obtained from the bones of bovine, ovine or caprine animals.~~
- ~~(3) This must be certified when they come from a country or a region classified in accordance with Regulation (EC) No 999/2001 as posing an undetermined BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK.<sup>(1)</sup>~~
- ~~(a) The animals, from which the treated raw materials are derived, were not fed meat and bone meal or greaves derived from ruminants, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health.~~
- ~~(b) The animals from which the treated raw materials of bovine, ovine and caprine animal origin are derived, were not killed, after stunning, by laceration of central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity.~~
- ~~(c) The treated raw materials are not derived from:~~

- ~~(i) specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001;~~
- ~~(ii) nervous and lymphatic tissues exposed during the deboning process;~~
- ~~(iii) mechanically separated meat obtained from the bones of bovine, ovine or caprine animals.~~
