II.a. Certificate reference no.	II.b.

- (c) were collected at a place separated from other parts of the premises or holding which is in good repair and was cleaned and disinfected prior to the collection;
- (d) were examined, processed and packed in laboratory facilities which are not situated in a zone subject to prohibition or quarantine measures as set out in points (e) to (l), in a section which is separated from the section for storing equipment and materials used in contact with donor animals and from the area where the donor animals are handled;
- (e) come from **donor mares** which: were continuously resident for a period of 3 months (or since entry if they were directly imported from Great Britain during the 3 months period) in the exporting country or, in the case of regionalisation in accordance with GB requirements, in that part of the territory of the exporting country which was during that period:
- (i) not considered to be infected with African horse sickness in accordance with GB requirements,
 - (ii) free from Venezuelan equine encephalomyelitis for a period of at least 2 years,
 - (iii) free from glanders and dourine for a period of at least 6 months;
- (f) **Vesicular stomatitis** come from donor mares which:
- (*) **EITHER** [(i) originated from a country of export which was on the day of collection free from vesicular stomatitis (VS) for a period of at least 6 months;]
 - (*) **OR** [(ii) were tested by a virus neutralisation test for vesicular stomatitis on a blood sample taken on (please **insert date**) _____ within 30 days prior to collection, with negative result at a serum dilution of 1 in 12]
- (g) **Holding requirements** come from donor mares which:
- (*) **EITHER** [during a period of the past 30 days prior to the date of the collection were located in holdings under veterinary supervision which fulfilled, from the day of the collection of the (*)[ova] (*)[embryos] until the date of their dispatch the GB requirements for a holding, and in particular:]
 - (*) **OR** [in the case of frozen (*)[ova](*)[embryos], during a period of the past 30 days prior to the date of the collection were kept in holdings under veterinary supervision which fulfilled, from the day of the collection of the (*) [ova] (*)[embryos] until the end of the period of 30 days mandatory storage at approved premises, the GB requirements for a holding, and in particular:]
 - (*) **EITHER** [(i) following a case of a disease mentioned below not all the animals of species susceptible to that disease located in the holding were slaughtered or killed and the holding has been free:
 - (1) from any type of equine encephalomyelitis for a period of at least 6 months, beginning on the day on which the equidae suffering from the disease are slaughtered,
 - (2) from equine infectious anaemia for at least the period required to obtain a negative result in an agar gel immunodiffusion test (AGID or Coggins tests) carried out on samples taken after the infected animals were slaughtered on two occasions 3 months apart from each of the remaining equidae,
 - (3) from vesicular stomatitis for a period of at least 6 months from the last recorded case,
 - (4) from rabies for a period of at least one month from the last recorded case,
 - (5) from anthrax for a period of at least 15 days from the last recorded case,]
 - (*) **OR** [(ii) following a case of a disease mentioned below all the animals of species susceptible to that disease located in the holding were slaughtered or killed and the premises disinfected, the holding was free for a period of at least 30 days from any type of equine encephalomyelitis, equine infectious anaemia, vesicular stomatitis and rabies or a period of at least 15 days in the case of anthrax,

II.a. Certificate reference no.	II.b.
--	--------------

beginning on the day on which following the destruction of the animals the disinfection of the premises was satisfactorily completed;]

- (h) come from donor mares which during the past 30 days prior to collection have been kept in holdings each of them having been free from clinical signs of contagious equine metritis for at least 60 days;
- (i) come from donor mares which were not used for natural breeding during at least 30 days prior to the date of collection of (*)[ova] (*)[embryos] and between the date of the first samples referred to in points (j) and (k) and the date of the collection of (*)[ova] (*)[embryos];
- (j) come from donor mares which have been subjected with negative result to an agar-gel immunodiffusion test (Coggins test) or an ELISA for equine infectious anaemia carried out on a blood sample taken on (please insert date) _____ being during the past 30 days prior to the date of the first collection of ova or embryos and the test was last carried out on a sample of blood taken on (please insert date) _____, being not more than 90 days before the ova or embryos were collected;
- (k) come from donor mares which have been subjected to an agent identification test for contagious equine metritis by isolation of *Taylorella equigenitalis* after a cultivation of 7 to 14 days carried out with negative results in each case on samples taken during the past 30 days prior to the date of the first collection of ova or embryos from mucosal surfaces of the clitoral fossa and clitoral sinuses on two consecutive oestrus periods on (please insert date) _____ and on (please insert date) _____, and on an additional culture specimen taken during one of the oestrus periods from the endometrial cervix on (please insert date) _____;
- (l) to the best of my knowledge and as far as I can ascertain, have not been in contact with equidae suffering from an infectious or contagious disease during the 15 days immediately preceding the collection;
- (m) come from donor mares which on the day of the collection of the (*)[ova] (*)[embryos] did not show clinical signs of an infectious or contagious disease;
- (n) were (*)[collected] (*)[produced] after the date on which the embryo (*)[collection] (*)[production] team described in Part I of this certificate Box I.11 was approved by the competent authority of the exporting country;
- (o) were processed and stored under approved conditions for a period of at least 30 days immediately after their (*) [collection] (*)[production], and were transported in accordance with GB requirements;

(*) Keep as appropriate.

Official Veterinarian

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

- Box reference I.11: The *place of origin* shall correspond to the embryo collection team or embryo production team by which the ova/embryos were collected/produced, processed, stored and approved in accordance with Article 17(3)(b) of Council Directive 92/65/EEC.
- Box reference I.22: The *number of packages* shall correspond to the number of containers.
- Box reference I.23: The identification of container and seal number shall be indicated.
- Box reference I.28: The *category*: specify if *in vivo* derived embryos, *in vivo* derived ova, *in vitro* produced embryos or micromanipulated embryos.
- The *donor identity* shall correspond to the official identification of the animal.
- The *date of collection* shall be indicated in the following format: dd/mm/yyyy

Part II

Animal Health

Only third countries or parts of the territory of third countries listed in columns 2 and 4 in a document relating to 'equidae' published on gov.uk, in accordance with Implementing Regulation 2018/659, respectively from which imports of registered equidae and equidae for breeding and production are also authorised and as indicated in column 14 of that document. ^(†)

AH/E353D Establishment requirement (Collection centre)

Delete if consignment is of ova only.

GB requirements refers to semen compliant to conditions laid down in Directive 92/65.

GB requirements refer to conditions for approval of semen collection centres laid down in Article 11(2) or 17(3)(b) of Directive 92/65. Semen must be collected from approved semen collection centres listed in accordance with Article 11(4) or Article 17(3)(b) of Directive 92/65.

Gov.uk listing refers to columns 2 and 4 of a document relating to 'equidae' published on gov.uk, in accordance with Implementing Regulation 2018/659 from which the import of equine semen collected from registered horses, registered equidae or equidae for breeding and production is authorised in accordance with Article 4 of Implementing Regulation 2018/659 and indicated in columns 11, 12 and 13 of that document. ^(†)

Imports of equine semen are authorised from third countries listed in column 2 in a document relating to 'equidae' published on gov.uk, in accordance with Implementing Regulation 2018/659 provided that the semen was collected in the part of the territory of the third country detailed in column 4 of that document

Equine ova or embryos Model 2 GBHC815

from a donor stallion of the category of equidae positively indicated in column 11,12 or 13 of that document. ^(†)

AH/E373B Establishment requirement

This Directive lays down animal health requirements governing - imports into Great Britain of animals, semen, ova and embryos not subject to animal health requirements laid down in legislation referred to in Annex D to the Directive.

Directive 2009/156 of 30 November 2009 on animal health conditions governing the movement and importation from third countries of equidae.

(a) Only approved embryo collection teams and embryo production teams listed in accordance with Article 17(3)(b) of Directive 92/65.

GB requirements refers to Chapter I(III) of Annex D to Directive 92/65.

(b) GB requirements refer to Chapter III(II) of Annex D to Directive 92/65.

(e) GB requirements refer to Article 13 of Directive 2009/156.

(e) (i) GB requirements refer to Article 5(2)(a) and (b) of Directive 2009/156.

(j) WOAHA Manual referred in point to the Manual of Diagnostic Tests and Vaccines for Terrestrial Animals of the WOAHA.

Points (f)(ii) and (j)(i), (j)(iii), (j)(iv) - Insert date.

(g) GB requirements refer to conditions for a holding laid down in Article 4(5) of Directive 2009/156.

(j) GB requirements refer to conditions provided for in Article 37 of Regulation 2017/625.

The agar gel immunodiffusion test (AGID or Coggins test) or the ELISA for equine infectious anaemia are not required for donor equidae which have continuously resided in Iceland since birth, provided that Iceland has remained officially free of equine infectious anaemia and no equidae and their semen, ova and embryos have been introduced into Iceland from outside prior to and during the period the ova or embryos were collected and the semen was used for fertilisation.

(n) GB requirements refer to conditions which satisfy the terms laid down in Chapter III(II) of Annex D to Directive 92/65.
