May 2025	46	0	26777
June 2025	45	0	26822
July 2025	40	0	26862
August 2025	35	0	26897
September 2025	35	0	26932

There were 7 surveillance inspections conducted at 7 different sites for a total of 35 fish sampled this month. Samples are targeted to moribund and fresh mortalities. The water temperatures remained high in response to warm air temperatures. All sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
