Veterinary Health Certificate for Export of **In Vitro Produced Bovine Embryos from the United States of America to Israel**			
Veterinary Authority UNITED STATES DEPARTMENT OF AGRICULTURE	**Date Of Issue**	**Certificate Number**	

Certification Statements:

I, the undersigned, USDA Accredited Veterinarian certify that:

1. The embryos to be exported were collected in the United States, which was free from rinderpest during the 12 months immediately prior to their collection.

2. The embryos to be exported were collected in the United States, which was either:

a.   [O]   free from foot and mouth disease during the 12 months immediately prior to their collection and did not carry out vaccination against foot-and-mouth disease during that period.

b.   [O]   was not free from foot-and-mouth disease during the 12 months immediately prior to their collection and/or carried out vaccination against foot-and-mouth disease during that period, and:
-the embryos were not subjected to penetration of the zona pellucida,
-the embryos were stored under approved conditions for at least 30 days immediately after their collection,
-the donor females come from holdings on which no animal was vaccinated against foot-and-mouth disease during the 30 days prior to collection and no animal of a susceptible species showed clinical signs of foot-and-mouth disease during the 30 days prior to, and at least the 30 days after, the embryos were collected.

3. The embryos to be exported were collected by an embryo collection team:

a.   approved by USDA APHIS.

b.   which carried out the collection, processing, storing and transport of the embryos in accordance with Chapter 4.9 of the WOAH Terrestrial Animal Health Code.

c.   subject to inspection by USDA APHIS at least annually.

4. The embryos to be exported were collected and processed on premises on which there was no clinical cases of foot and mouth disease, epizootic hemorrhagic disease, vesicular stomatitis, Rift Valley fever, or contagious bovine pleuropneumonia in the 30 days immediately prior to their collection.

5. The embryos to be exported from the time of collection until 30 days thereafter they were stored on premises on which there was no clinical cases of foot and mouth disease, vesicular stomatitis, Rift Valley fever, or contagious bovine pleuropneumonia.

6. The embryos to be exported were collected from the donor females which:

a.   were located during the 30 days immediately prior to collection on premises on which there was no clinical cases of foot and mouth disease, bluetongue, epizootic hemorrhagic disease, vesicular stomatitis, Rift Valley fever, or contagious bovine pleuropneumonia.

b.   Showed no clinical signs of disease on the day of collection.

c.   Spent the six months immediately prior to collection within the territory of the United States in herds:
