

Products Derived from Peritoneal Fluid

Regulation (EU) 142/2011 Chapter 4(A), 4(C), and 4(D) certificates may not be endorsed for peritoneal fluid (or derivatives) for export to Italy. Some derivatives can be imported under Regulation (EU) 142/2011 Chapter 20 as Intermediate Products.

[Note- Italy does not require certification for these products derived from rodents and similar non-livestock animals, nor that are embedded on microscope slides. For more information on the requirements for certification of other samples (and derivatives) of peritoneal fluid, please see the pertinent article on Samples (research and diagnostic).]
