

The export health certificate for laboratory animals (mice, opossums, guinea pigs) to South Korea should contain the following information:

- 1) The animal(s) is/are for laboratory use.
- 2) The animal(s) is/are healthy and not a concern for spreading communicable animal diseases.

If the animals are specific pathogen free (SPF) the health certificate should also contain:

- 3) The animal(s) is/are specific pathogen free (SPF).
