2019-APHIS-02887-F	Li, Liujun	-	3/20/2019	4/17/2019	Dear Sir, I am writing to request the photographs of: 1) ring-billed gull nests and/or eggs published in the manuscript written by Scott Beckerman and Dr. Richard Engeman in Illinois. [Scott F. Beckerman and John W. Hartmann, Rick M. Engeman, Thomas W. Seamans, Abu-Absi. The Chicago Ring-Billed Gull Damage Management Project. March 2010. DOI: 10.7287/PEERJ.PREPRINTS.2021] 2) other nest egg photograph via USDA/Wildlife Services, such as Canada Geese and their eggs and nests; 3) the photograph could be image or video that either manually taken or remote video camera recorded. The more and variety photo of nest and or egg, the better to train the computer to detect the nest egg automatically from the image database. We are exploring the best machine learning algorithm to detect the nuisance nest egg candidate for the further potential egg oiling operation. So the raw image data would be good for us, but it will be even better if you have the metadata for us to define the object classes, such as the species, growth stage, dates, etc. Your assistance and support would be much appreciated! Best, Liujun Li, Ph.D. Hitron Technologies Inc. (Date Range for Record Search: From 01/01/2007 To 03/20/2019)	-
