2025-APHIS-05724-F	(b) (6), (b) (7)(D)	(b) (6), (b) (7)(D)	Pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. § 552, I hereby submit this request for records concerning serious animal welfare concerns at the National Institutes of Health (NIH)/National Institute of Allergy and Infectious Diseases (NIAID) Building 50 animal facility in Bethesda, Maryland. I request expedited processing of this FOIA request in light of ongoing and previously documented violations at this federally funded research facility that pose an imminent risk to animal welfare and implicate significant public interest in government oversight. This request is made consistent with USDA's legal obligations under the Animal Welfare Act (AWA) and FOIA's provisions for urgent public-interest disclosures, as detailed below. Background and Context Building 50 (the Louis Stokes Laboratories on the NIH campus) houses an intramural research animal facility for NIAID. Multiple reports and complaints since at least January 2024 indicate systemic animal welfare violations at this facility, including allegations of veterinary misconduct by the attending veterinarian, (b) (6), and critical deficiencies in animal care practices. Specific issues that have been raised include: failure to provide adequate veterinary treatment (e.g. missed BID treatments meant to be given twice daily), improper or falsified "red card" documentation of animal health issues, and egregious husbandry errors such as animals being left in cages during the cage-wash process leading to inadvertent euthanasia or death. These documented incidents suggest severe non-compliance with AWA standards designed to ensure humane care and use of research animals. They also point to a breakdown in oversight and veterinary supervision at the facility, which falls under APHIS jurisdiction as a registered research facility.
