Certification Statements:

I, the undersigned USDA Accredited Veterinarian, certify to the following statements:

1. The animals for export were visually examined prior to loading, showed no signs of any contagious diseases, and to the best of my knowledge were not exposed to infectious agents of diseases of concern.

2. There have been no occurrences of unexplained mortality events in the premises of origin of the animals for export during the 60 days prior to shipment.

3. There have been no cases of OIE-listed aquatic diseases in susceptible species from the population of animals for export during the 60 days prior to shipment, including acute hepatopancreatic necrosis disease (AHPND), Crayfish plague (Aphanomyces astaci), infectious hypodermal and haematopoietic necrosis virus (IHHNV), infectious myonecrosis (IMN), necrotising hepatopancreatitis (Hepatobacter penaei) (NHP), Taura syndrome virus (TSV), White spot syndrome virus (WSSV), White tail disease (WTD)/Macrobrachium rosenbergii nodavirus (MrNV), and yellow head virus genotype-1 (YHV).

4. If the shipment includes germplasm or post-larvae (PL), there have been no cases of OIE-listed aquatic diseases in the broodstock used for the production of the germplasm or PL for export during the 60 days prior to shipment.

5. If the shipment includes germplasm or post-larvae (PL), the broodstock used in the production of the animals for export have not experienced any unexplained morbidity or mortality events during the 60 days prior to shipment at the premises of origin.

6. If the shipment includes embryonated eggs, the eggs for export have been surface-disinfected according to the relevant section of the OIE Manual of Diagnostic Tests and Procedures for Aquatic Animals for the diseases of concern on this certificate.

7. The container/packaging in which the animals for export are transported is either new or has been cleaned and disinfected prior to use.
