

Reptile Hides and Skins for Export to Mexico

The bilingual certification statements below are for reptile hides and skins (green, fresh or salted) intended for further processing and should be provided in the Additional Declarations section of the Export Certificate for Animal Products (VS Form 16-4) and continuation page VS form 16-4A as needed. A notarized affidavit from the manufacturer is required to support these statements on the export certificate issued by APHIS Veterinary Services.

Please note that SENASICA Mexico requires that wet materials must be salted prior to import and then packaged in a manner that prevents leakage, specifically requesting that the container be plastic and have a sealable top.

Please note that SENASICA has implemented a quality requirement pertaining to fumigation or other treatment against fly larvae. Evidence of treatment should be presented at the time of importation and must give the product name and dose used. In the event that a shipment is found to need treatment, exporters may arrange with their importers for this treatment, which will be done in Mexico.

Certification statements on a VS Form 16-4:

This office has on file a notarized affidavit from [company name] verifying the accuracy of the following statements: / *Esta oficina cuenta en su expediente con una declaración notariada de [nombre de la compañía] que verifica la exactitud de las siguientes declaraciones:*
