HEALTH CERTIFICATE FOR RE-ENTRY* FROM THE NETHERLANDS INTO THE UNITED STATES OF AMERICA OF U.S. ORIGIN HORSES

I. IDENTIFICATION OF THE HORSES

Product no.	Name of the horse	Identification no.	Sex	Breed	Date of birth	Color

II. ORIGIN OF THE HORSES

Product no.	Name and address of the place of export

Name and address of the exporter :
Dispatched from :

III. DESTINATION OF THE HORSES

Means of conveyance :
Name and address of the consignee :

IV. HEALTH ATTESTATION

The undersigned, being a veterinarian designated for such duties by the responsible veterinary authority of the Netherlands, certifies that the horse described above meets the following requirements:

- The horse was in the Netherlands for the last (number) days from (mm/dd/yyyy) to (mm/dd/yyyy)⁽¹⁾ immediately preceding exportation to the United States. If residing in the Netherlands for less than 90 days, the horse is accompanied by an original health certificate issued by a salaried veterinary officer of the national government of each country in which the horse has been for 90 days immediately preceding shipment to the United States, with the residency dates spent in each country specified⁽²⁾⁽³⁾;

Country

- The horse has been examined and found to be free of communicable diseases and, as far as can be determined, not exposed to communicable diseases for the entire duration of temporary exportation preceding exportation to the United States;
- The horse has not been vaccinated with a live or attenuated or inactivated vaccine during the last fourteen (14) days preceding export to the United States;
- As far as can be determined, the horse has not been on premises where African horse sickness, dourine, glanders, surra, epizootic lymphangitis, ulcerative lymphangitis, equine piroplasmiasis, Venezuelan equine encephalomyelitis, vesicular stomatitis, equine infectious anemia or contagious equine metritis (CEM) has occurred for the entire duration of temporary exportation preceding exportation to the United States, nor have these diseases occurred on any adjoining premises during the same period of time;
- The horse has not been on any premises or areas which have been subjected to restrictions with regard to foot and mouth disease within the five (5) days immediately prior to export;
- The horse has been examined on the premises of residency immediately prior to export and was found to be clinically free of ectoparasites.

Note:

- * Re-entry of U.S. horses following temporary export to CEM affected countries for purposes other than breeding and for a period of less than 90 days.
- (1) The health certificate from the final country that the horse resides in immediately prior to export must be endorsed by the examining veterinarian and the salaried veterinary officer of the national government of the country of export or can be endorsed solely by the salaried veterinary officer of the national government of the exporting country if they are also the examining veterinarian.
- (2) If the horse is residing in a European Union member state other than the member state of export or in the UK during the 90 days immediately preceding shipment to the United States, then the horse can be accompanied by a like health certificate issued by an examining veterinarian of each member state or of the UK, with the residency dates spent in each member state or in the UK specified.
- (3) Horses which have been residing outside EU member states or the UK, during the 90 days immediately preceding shipment to the United States, such as Norway, Switzerland and Monaco, will need to be accompanied by an official import health certificate into a European Union member state, endorsed by the competent authority of those countries. APHIS will not accept supplementary health certificates that are not endorsed by the competent authority of the non-EU member states.

Annex I

ADDITIONAL DECLARATION
FOR TEMPORARY EXPORTED HORSES FROM THE UNITED STATES OF AMERICA TO CEM AFFECTED
COUNTRIES FOR PURPOSES OTHER THAN BREEDING AND FOR A PERIOD OF LESS THAN 90 DAYS

The USDA permit is valid only if conditions and certification statements of this declaration are met and if such an official declaration is provided in each CEM affected country in which the horse has entered since his departure from the United States.

USDA permit no. :
 Date of entry in the Netherlands :
 Date of departure from the Netherlands :

The undersigned, being an official veterinarian designated for such duties by the responsible veterinary authority of the Netherlands, certifies that the horse described above meets the following requirements:

1. On (date), the horse was examined by me and found to be free from clinical signs of infectious or contagious diseases (including contagious equine metritis (CEM) and ulcerative lymphangitis), and
2. A declaration has been received from the owner stating that, since importation from the United States on (date), the horse has:
 - a. Been held separate and apart from all other horses not of the same certified health status except for the time the horse was actually participating in an event or was being exercised by his trainer;
 - b. Not been on any premises where horses were held or used for breeding purposes;
 - c. Not been bred nor had other sexual contact or genital examination while in said country;
 - d. Been transported only in cleaned and disinfected vehicles and was not accompanied by any other horse shipment not of the same certified health status.

HORSE DESCRIPTION

Horse name: :
 Microchip number: :
 Breed and gender: :
 Age and color: :

This is to certify that on _____ (enter date) I examined the horse identified above at _____ (address of inspection), and:

1. Either⁽¹⁾ The horse has not resided in a country that APHIS considers to be affected by screwworm⁽²⁾;
 Or⁽¹⁾ The horse has resided in one or more countries that APHIS considers free of screwworm⁽²⁾ for at least seven (7) days after residing in a country that APHIS considers screwworm affected AND after seven (7) days, the horse and their external genitalia were examined and found to be free of screwworm infestation⁽³⁾;

Country	Start residency (dd/mm/yyyy)	End residency (dd/mm/yyyy)

2. Either⁽¹⁾ The horse has not resided in a country that APHIS considers to be affected by VEE⁽²⁾;
 Or⁽¹⁾ The horse has resided in one or more countries that APHIS considers free of VEE⁽²⁾ for at least seven (7) days after residing in a country that APHIS considers VEE affected AND after seven (7) days, the horse was examined and found to be free of clinical signs of VEE;

Country	Start residency (dd/mm/yyyy)	End residency (dd/mm/yyyy)

3. Either⁽¹⁾ The horse has not resided in a country that APHIS considers to be affected by FMD⁽²⁾;
 Or⁽¹⁾ The horse has resided in one or more countries that APHIS recognizes as free of FMD⁽²⁾ for a minimum of five (5) consecutive days after residing in a country that APHIS considers FMD affected;

Country	Start residency (dd/mm/yyyy)	End residency (dd/mm/yyyy)

- Or⁽¹⁾ The horse has resided in a country that APHIS considers affected with FMD⁽²⁾ within the five (5) days immediately preceding export to the United States, and;

- a. The horse has not been on any premises or quarantined area identified to be affected with FMD, nor has the horse been in direct contact with domestic or wild animals, including ruminants or swine, that have been in an FMD region or on an FMD affected or quarantined premises.
- b. I have received information from the owner and/or exporter that, prior to loading for departure:
 - i. The horse was groomed to remove dirt and debris, and subsequently wiped, sprayed and/or sponged down with vinegar or a solution of 6.5 ounces of

concentrated glacial acetic acid in 1 gallon of water or another approved disinfectant;

- ii. The horse's hooves were cleaned and disinfected with a 4% sodium carbonate (soda ash) solution or Virkon S in a manner to ensure that the hooves are free of dirt, manure and debris;
- iii. Prior to loading the horse, all crates and transportation vehicles were cleaned and disinfected with an approved product;
- iv. Any equipment (tack, blankets, sheets, leg wraps, etc.) accompanying the horse has been laundered or cleaned to remove dirt and debris prior to disinfection with an approved product;
- v. The equipment was cleaned and disinfected with a 4% sodium carbonate (soda ash) solution immediately prior to shipment. The disinfectant used will have removed the risk of this equipment transmitting the foot-and mouth disease virus.

Notes:

- (1) Line out if not applicable.
- (2) The APHIS recognized animal health status of a region/country is online at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-region>.
- (3) Horses, including their external genitalia, must be examined thoroughly. Horses may require tranquilization or sedation for the examination.
