Additional Field(s):

SPS Import Clearance No. (SPSIC)::	
SPSIC Date Issued::	
SPSIC Must Ship Out by Date::	
Port of Arrival Name & City::	
Country(ies) of Transit, if any::	
APHIS-Approved Isolation Start Date::	
APHIS-Approved Isolation Name & Address::	

Certification Statements:

1. I, the undersigned USDA accredited veterinarian, certify the following:
2. The United States is free of foot and mouth disease (FMD), where vaccination is not practiced.
3. The United States is free or of negligible risk for Bovine Spongiform Encephalopathy (BSE).
4. The United States is free from Contagious Bovine Pleuropneumonia (CBPP).
5. The animals underwent a minimum of thirty (30) days pre-export isolation in premises approved by USDA, APHIS.
6. The animals were maintained in isolation to prevent direct contact with other non-tested animals from the time testing began, until export.
7. The animals for export were born and raised in the United States, or an accredited country approved to export cattle to the Philippines.
8. The animals originate from farm/s and/or herds which, to the best of my knowledge and belief as the issuing veterinarian, have not had any outbreak or confirmed case 12 months prior to movement, and that the animals are free of clinical signs of the following diseases:
 - a. Hemorrhagic septicemia
 - b. Bovine viral diarrhea (BVD)
 - c. Lumpy Skin Disease (LSD)
 - d. Bovine tuberculosis (TB)
 - e. Surra
 - f. Infectious Bovine Rhinotracheitis/Infectious Pustular Vulvovaginitis (IBR/IPV)
 - g. Cattle Tick Fever
 - h. Leptospirosis
 - i. Johne's disease
 - j. Vesicular stomatitis virus (VSV)
 - k. Cattle brucellosis
 - l. Bluetongue

Additional Field(s):

Certification Statements:

9. The animals were isolated prior to shipment and were tested negative or vaccinated or treated as prescribed below during the mandatory pre-export isolation prior to export for the following (test date and methods used indicated on the table below):

a. Bovine tuberculosis (M. bovis): tested negative using intradermal caudal fold test using bovine PPD tuberculin or Interferon-gamma ELISA test.

b. Cattle brucellosis (B. abortus):

☐ tested negative using Rapid plate test (RPT) or ELISA or PCR.

☐ were vaccinated against brucellosis.

Date of Vaccination: _____

c. Johne's disease (paratuberculosis):

☐ tested negative using ELISA or PCR or fecal PCR or culture.

☐ were vaccinated against Johne's disease.

Date of Vaccination: _____

d. Bluetongue:

☐ tested negative using ELISA or PCR.

☐ were vaccinated against bluetongue.

Date of Vaccination: _____

e. Q-fever:

☐ tested negative using ELISA or PCR.

☐ were vaccinated against Q-fever.

Date of Vaccination: _____

f. Enzootic Bovine Leukosis (EBL): tested negative using ELISA or PCR.

g. Bovine Viral Diarrhea (BVD):

☐ tested negative using ELISA or PCR.

☐ were vaccinated against BVD.

Date of Vaccination: _____

h. Infectious Bovine Rhinotracheitis/Infectious Pustular Vulvovaginitis (IBR/IPV):

☐ tested negative using ELISA or PCR.

☐ were vaccinated against IBR/IPV.

Date of Vaccination: _____

i. Leptospirosis:

☐ were vaccinated against leptospirosis.

Additional Field(s):

Certification Statements:

Date of Vaccination: _____

[O] were treated against leptospirosis with tetracycline, aminoglycosides, sulfa drugs or other antibiotics effective against leptospirosis.

Name of Drug Administered: _____

Date of Treatment: _____

10. If the animals for export have been vaccinated against diseases not listed above during the thirty (30) days prior to export, vaccination information is provided in the table below.

11. The animals have been treated with an approved internal antiparasitic treatment at the time of entry to the pre-export isolation facility and then at regular intervals throughout the isolation period according to the manufacturer's instructions.

Date of Administration of Internal Parasite Treatment: _____

Manufacturer/Brand Administered: _____

Dose Administered: _____

12. The animals have been treated with an approved external antiparasitic treatment at the time of entry to the pre-export isolation facility and then at regular intervals throughout the isolation period according to the manufacturer's instructions.

Date of Administration of External Parasite Treatment: _____

Manufacturer/Brand Administered: _____

Dose Administered: _____

13. The animals will be transported directly from the pre-export isolation facility to the point of embarkation.

Proper vector control during pre-export isolation and during transport should be applied, including but not limited to the use of insecticides effective against Culicoides, according to the manufacturer's instructions.

14. Movement of animals will be made only in cleaned and disinfected vehicles.

15. The animals will be inspected by USDA at the port of embarkation within 48 hours of departure, and a certificate of inspection (VS Form 17-37) that the animals for export are found to be free of evidence of communicable diseases and exposure thereto, shall be issued and accompany the shipment.

This certificate is valid for ten (10) days.

**TEST TABLE (required)**

Testing is not required for animals that are vaccinated for all of the following diseases. Indicate "N/A" where applicable.

Pooling of a maximum of 5 samples is allowed for the PCR test.

Row #	Official Animal Identification (RFID)	Johne's Test Method ELISA or PCR or fecal PCR	Johne's Test Date	Bluetongue Test Method ELISA or PCR	Bluetongue Test Date	Q-fever Test Method ELISA or PCR	Q-fever Test Date	EBL Test Method ELISA or PCR	EBL Test Date	BVD Test Method ELISA or PCR	BVD Test Date	IBR/IPV Test Method ELISA or PCR	IBR/IPV Test Date

TEST TABLE (if needed)

Testing is not required for animals that are vaccinated for all of the following diseases. Indicate "N/A" where applicable.

Pooling of a maximum of 5 samples is allowed for the PCR test.

Row #	Official Animal Identification (RFID)	Tuberculosis Test Method CFT or ELISA	Tuberculosis Test Date	Brucellosis Test Method RPT, ELISA or PCR	Brucellosis Test Date

VACCINATION TABLE

All vaccinations should be conducted according to the manufacturer's instructions. Those vaccines not listed in the table above, administered during pre-export isolation, are listed below.

Row #	Official Animal Identification (RFID)	Disease vaccinated against	Date of administration	Dose	Type of vaccine	Manufacturer / Brand

VACCINATION TABLE
All vaccinations should be conducted according to the manufacturer's instructions. Those vaccines not listed in the table above, administered during pre-export isolation, are listed below.
