<b>SPS Import Clearance No. (SPSIC):</b>	
<b>SPSIC Date Issued:</b>	
<b>SPSIC Must Ship Out by Date:</b>	
<b>Port of Arrival Name &amp; City:</b>	
<b>Country(ies) of Transit, if any:</b>	
<b>APHIS-Approved Isolation Start Date:</b>	
<b>APHIS-Approved Isolation Name &amp; Address:</b>	

**Certification Statements:**

I, the undersigned USDA accredited veterinarian, certify the following:

1. The United States is free of foot-and-mouth disease (FMD), where vaccination is not practiced.
2. The United States is free of African swine fever (ASF).
3. Either the United States is free of Classical swine fever (CSF), or the animals were tested using ELISA or PCR or were vaccinated within thirty (30) days of export.
4. The animals underwent a minimum of thirty (30) days pre-export isolation in premises approved by USDA, APHIS.
5. The animals were maintained in isolation to prevent direct contact with other non-tested animals from the time testing began, until export.
6. The animals for export were born and raised in the United States, or in an accredited country approved for export swine to the Philippines.
7. The animals originate from farm/s and/or herds which, to the best of my knowledge and belief as the issuing veterinarian, have not had any outbreak or confirmed case 12 months prior to movement, and that the animals are free of clinical signs of the following diseases:
  - a. Aujeszky's Disease (Pseudorabies)
  - b. Classical Swine Fever (Hog Cholera)
  - c. Porcine Reproductive and Respiratory Syndrome (PRRS)
  - d. Leptospirosis
  - e. Japanese Encephalitis
  - f. Swine brucellosis
  - g. Tuberculosis
8. The animals were isolated prior to shipment and were tested negative or vaccinated or treated as prescribed below during the mandatory pre-export isolation prior to export for the following (test date and methods used indicated on the table below):

**Veterinary Health Certificate for Export of  
Swine from the United States of America to Philippines**

**Veterinary Authority**

UNITED STATES DEPARTMENT OF AGRICULTURE

**Date Of Issue**

**Certificate Number**

-----  
**Additional Field(s):**  
-----

**Certification Statements:**

a. Swine brucellosis (B. suis):

☐ tested negative using rapid plate test (RPT) or ELISA or PCR.

☐ were vaccinated against swine brucellosis.

☐ originate from a swine brucellosis-free State or a validated swine brucellosis-free herd, according to APHIS.

b. Aujeszky's disease (Pseudorabies)

☐ tested negative using ELISA or PCR.

☐ were vaccinated against Aujeszky's disease.

☐ originate from a pseudorabies-qualified herd or a pseudorabies free State (Stage 5) according to APHIS, and have not been vaccinated against pseudorabies.

c. PRRS:

☐ tested negative with ELISA or PCR.

☐ were vaccinated against PRRS.

9. If the animals for export have been vaccinated against diseases not listed above during the thirty (30) days prior to export, vaccination information is provided in the table below.

10. The animals have been treated with an approved internal antiparasitic treatment at the time of entry to the pre-export isolation facility and then at regular intervals throughout the isolation period according to the manufacturer's instructions.

Date of Administration of Internal Parasite Treatment: \_\_\_\_\_

Manufacturer/Brand Administered: \_\_\_\_\_

Dose Administered: \_\_\_\_\_

11. The animals have been treated with an approved external antiparasitic treatment at the time of entry to the pre-export isolation facility and then at regular intervals throughout the isolation period according to the manufacturer's instructions.

Date of Administration of External Parasite Treatment: \_\_\_\_\_

Manufacturer/Brand Administered: \_\_\_\_\_

Dose Administered: \_\_\_\_\_

12. The animals will be transported directly from the pre-export isolation facility to the point of embarkation.

Proper vector control during pre-export isolation and during transport should be applied, including but not limited to the use of insecticides, according to the manufacturer's instructions.

13. Movement of animals will be made only in cleaned and disinfected vehicles.

**TEST TABLE**

Testing is not required for animals that are vaccinated for all of the following diseases. Indicate "N/A" where applicable.

Pooling of a maximum of 5 samples is allowed for the PCR test.

Row #	Official Animal Identification (RFID)	Swine Brucellosis Test Method RPT, ELISA or PCR	Swine Brucellosis Test Date	Swine Brucellosis Vaccination Date	Aujeszky's Test Method ELISA or PCR	Aujeszky's Test Date	Aujeszky's Vaccination Date	PRRS Test Method ELISA or PCR	PRRS Test Date	PRRS Vaccination Date

**VACCINATION TABLE**

All vaccinations should be conducted according to the manufacturer's instructions. Those vaccines not listed in the table above, administered during pre-export isolation, are listed below.

Row #	Official Animal Identification	Disease vaccinated against	Date of administration	Dose	Type of vaccine	Manufacturer / Brand
