I, the undersigned official veterinarian or fish health inspector of the competent authority, certify that the live animals described above meet thefollowing conditions:

1. Spring Viremia of Carp (SVC):

a. The facility of origin participates in an ongoing Spring Viremia of Carp (SVC) monitoring program for species susceptible to SVC, by testing twice annually for a minimum of two (2) consecutive years, with at least three (3) months between tests. AND

b. Populations were tested at a ninety-five (95) percent confidence and two (2) percent assumed prevalence level, and found negative for SVC. AND

c. Sample collection was done at times when water temperatures are conducive to det cting SVC virus. AND

d. Samples were collected by a fish health inspector, employed by the competer. authority. AND

e. Cell cultures were incubated on epithelioma papulosum cyprinid (E_C) cell l^{*} es at twenty (20) degrees Celsius, in line with OIE recommended procedure. All testing results were constant for SVC.

2. The consignment was inspected by an official veterinarian confish health inspector employed by the exporting country's competent authority within seventy-two (72) hours of structure and found to be free of any clinical evidence of SVC disease.

3. Shipping Containers:

a. All shipping containers are new.
