

U.S. exports of day-old chicks, hatching eggs, and SPF eggs to Taiwan originating from a State that is not considered by Taiwan as an HPAI free zone

1. The following process applies to United States origin day-old chicks, hatching eggs, and SPF eggs (further referred to as “poultry”) that originate from States that have been removed from Taiwan’s Bureau of Animal and Plant Health Inspection and Quarantine (BAPHIQ) “List of Infectious Animal Disease-free Countries (Zones and Bovine Spongiform Encephalopathy Risk Status” list of HPAI free zones.
2. The process is valid from April 29, 2022 until October 29, 2022 unless modified by BAPHIQ and notified to APHIS

Obtaining an Import Permit:

US exporters will need to provide the following information

- a. USDA accredited veterinarian attestation letter with the following statement:
“Highly Pathogenic Avian Influenza, in poultry as defined by OIE, has not occurred within a 10 km radius of the establishment for at least 28 days prior to export.”
- b. Example (picture or complete description) of the seal or sticker that will be placed on the container of animals prior to leaving the hatchery/farm that will not be removed until arrival in Taiwan.

Health Certificate:

A modified health certificate, indicated in the title as “[Temporary]” that indicates the HPAI statues of the establishment will be issued by a USDA accredited veterinarian and endorsed by APHIS with the temporary HPAI language.
