DLD Import Notification Number:

Certification Statements:

I, the undersigned USDA accredited veterinarian, certify the following statements:

1. The animals for export come from an area where animal diseases are under control by veterinary authority (i.e., there are currently no ongoing disease outbreaks).
2. The animals for export are healthy and have no clinical signs of any infectious and contagious diseases including ectoparasitism at the time of inspection and are fit for travel.
3. The country or zone/state of origin is free from East Coast Fever, Rift Valley Fever, Lumpy Skin Disease, and Bluetongue serotype 8.
4. The country or zone/state of origin has been free from Rinderpest, Foot and Mouth Disease (FMD), Contagious Bovine Pleuropneumonia (CBPP) as defined by World Organization for Animal Health (WOAH).
5. In regard to bovine spongiform encephalopathy (BSE), the United States poses a negligible BSE risk as recognized by WOAH.
6. The animals for export must originate from an area (10 km zone) where no clinical cases of Bluetongue, Epizootic Hemorrhagic Disease, Vesicular Stomatitis, Rift valley fever, Crimean-Congo hemorrhagic fever, Heartwater and Bovine malignant catarrhal fever has been found during the 12 (twelve) months prior to export.
7. During the 12 (twelve) months prior to export, no clinical cases of Bovine Ephemeral Fever, Vesicular Stomatitis, Bluetongue, Anaplasmosis, Babesiosis, Theileriosis, Trypanosomiasis, Toxoplasmosis, Leptospirosis, Listeriosis, Melioidosis, Anthrax, Leptospirosis, Johne's Disease, Q Fever, Mycoplasmosis, Vesicular Stomatitis, Bluetongue, Campylobacter fetus infection, and Tritrichomonas foetus infection was found on the farms of origin.
8. No clinical cases of Brucellosis, Tuberculosis, Enzootic Bovine Leukosis, Infectious Bovine Rhinotracheitis /Infectious Pustular Vulvovaginitis (IBR/IPV), Bovine Viral Diarrhea/Mucosal Disease (BVD/MD), and Johne's Disease were confirmed in the cattle present in the farms of origin during the past 12 (twelve) months.
9. All animals for export to Thailand are subjected to pre-export isolation in premises approved and under the USDA accredited veterinarian during the 30 (thirty) days prior to export.
10. The animals for export were tested with negative results using test methods or other methods recommended by WOAH. The tests must be carried out during the 30 (thirty) days prior to export for the following diseases:

Additional Field(s):

Certification Statements:

10.1 Tuberculosis: Intradermal Tuberculin Test.

10.2 Brucellosis: Rose Bengal Test (RBT); OR Complement fixation (CF) test; OR Indirect ELISA (I-ELISA).

10.3 Bluetongue: Real-time RT-PCR.

10.4 Infectious Bovine Rhinotracheitis/Infectious Pustular Vulvovaginitis (IBR): ELISA; OR were vaccinated.

Date of Vaccination: _____

10.5 Johne's Disease: CFT; OR ELISA; OR fecal PCR.

10.6 Leptospirosis: microscopic agglutination test (MAT); OR PCR; OR were vaccinated.

Date of Vaccination: _____

Name of Vaccine: _____

Trade Name of Vaccine: _____

10.7 Campylobacter fetus*: Culture (including subspecies identification).

Trichomonas fetus*: Real-time PCR.

*Test not required for female cattle that have never been naturally mated.

10.8 Bovine Viral Diarrhea/Mucosal Disease (BVD): RT-PCR; OR ELISA; OR were vaccinated.

Date of Vaccination: _____

10.9 Enzootic Bovine Leukosis (EBL): ELISA; OR AGID.

11. The animals for export were treated for fluke, tapeworm, roundworm, and external parasites during the pre-export isolation.

Date(s) of Internal Parasite Treatment: _____

Name of Drug Administered for Internal Parasites: _____

Date and Name of Drug Administered for External Parasites: _____

12. During the pre-export isolation and throughout transportation, animals were protected from any insects with an application of effective insect repellent.

13. The vehicles and containers used for transporting the export animals will be thoroughly cleaned, disinfected, and vacated immediately prior to loading, in compliance with the relevant criteria laid down in the WOH.

14. The accommodations provided for the animals during shipping will be designed to avoid any risk of injury and unnecessary suffering which is compliant with the relevant criteria laid down in the WOH.
