

Egg Products

Exporters should contact the Food Safety and Inspection Service (FSIS) for information on the certification of PURE egg powders and liquids for export to Turkey for human consumption. APHIS can provide only the following exact certifications for products containing egg products as INGREDIENTS.

Turkey currently prohibits the import of egg products (or products containing egg products, e.g. cake mixes) from the United States, unless the products are certified with the following two certifications.

1. “The [insert name of egg origin ingredient] in the product described below has been heated to a minimum of X degrees Celsius for a minimum of Y.”

Note: X is the applicable minimum temperature noted below. Y is the applicable minimum time at the minimum temperature noted below.

Product	Minimum temperature (Celsius)	Time at Minimum Temperature
Whole egg	60	188 seconds
Whole egg blends	60	188 seconds
Whole egg blends	61.1	94 seconds
Liquid egg white	55.6	870 seconds
Liquid egg white seconds	56.7	232 seconds
10 % salted egg yolk	62.2	138 seconds
Dried Egg White	67	0.83 days
Dried Egg White	54.4	21.38 days

2. The statement “The product described below is freely sold in the United States.”

In all cases, exporters must have their importers in Turkey confirm prior to shipment that the exported material will be permitted entry with the endorsed certificate.
