<b>Part II. Animal Health Information</b>		Certificate reference number:
	<p>II . The undersigned Certifying Official certifies that live crustaceans/molluscs for aquaculture or rearing purpose described above satisfy(ies) the following requirements:</p> <p>II .1 The animals have been kept for at least fourteen days prior to exportation at a water area or an aquaculture facility which is under the supervision of the exporting country’s government. Within a period of three months prior to the exportation, there have been no incidents of high mortality occurring in that specific species of crustaceans/molluscs which are caused by communicable diseases or unknown etiology in the water area or aquaculture facility of origin.</p> <p>II .2 The consignment meets one of the following conditions (please mark “X” as applicable):</p> <p><input type="checkbox"/> A. The pertinent diseases of concern listed in the attached tables of the Quarantine Requirements for the Importation of Live Crustaceans and Molluscs are notifiable diseases in the exporting country. The following basic biosecurity measures have been implemented at the water area or aquaculture facility of origin for at least the previous two years</p> <ol style="list-style-type: none"> <li>1. The water area or aquaculture facility of origin has been subjected to an official health surveillance scheme conducted by a laboratory designated by the exporting country’s government. According to the surveillance results, the pertinent diseases of concern listed in the attached tables of the Quarantine Requirements for the Importation of Live Crustaceans and Molluscs have not occurred for a minimum period of two consecutive years in the water area or aquaculture facility of origin; and</li> <li>2. The water area or aquaculture facility of origin only introduced aquatic broodstock from areas free from the pertinent diseases of concern listed in the attached tables of the Quarantine Requirements for the Importation of Live Crustaceans and Molluscs, or from water areas or aquaculture facilities where basic biosecurity measures have been implemented.</li> </ol> <p>Name of the diseases which are under official surveillance complying with this condition :</p> <p>_____</p> <p><input type="checkbox"/> B. Within a period of thirty days immediately preceding the exportation, samples were collected from the water area or aquaculture facility of origin for testing by a laboratory designated by the exporting country’s government for the pertinent diseases of concern listed in the attached tables of the Quarantine Requirements for the Importation of Live Crustaceans and Molluscs. The results were negative.</p>	

**Part II. Animal Health Information**

Certificate reference number:

Results of quarantine inspection:

Disease name	Date of sample collection	Number of samples collected	Name of the laboratory testing the samples	Test methods	Results of the tests

II .3 Within seven days prior to its leaving from the water area or aquaculture facility of origin, the animal were inspected and found healthy and be free from infestation of ectoparasites or any clinical signs of communicable diseases.

II .4 Sample collection, testing and surveillance as referred to in this certificate were conducted in accordance with relevant provisions in the Manual of Diagnostic Tests for Aquatic Animals of the World Organization for Animal Health (hereinafter referred to as the WOAHP Aquatic Manual). For diseases with no sampling, testing or surveillance methods prescribed in the WOAHP Aquatic Manual, methods that have been published in international scientific journals were used.
